The Subject Of Addiction The Subject Of Addiction:

The Subject of Addiction Rik Loose, 2018-06-27 Drugs and drug use are an integral part of human culture Yet we know hardly anything about drugs at least not the kind of knowledge that would help us to understand how drugs affect people and how people become addicted to drugs This is most surprising in the light of the vast amount of knowledge accumulated in the sciences Psychoanalysis might not be an obvious choice for the treatment of addiction Nevertheless it is in an excellent position to make a contribution to a problem that has so far defied much of our understanding By inviting people to speak about themselves psychoanalysis has established a unique way of collecting clinical material a material that surely must be immediately relevant coming as it does from the horse's mouth With addiction on the increase this fact alone justifies the necessity for a different approach Providing a theoretical foundation for the argument that psychoanalysis should be seriously considered and where possible incorporated into the treatment of addicts this thoughtful and innovative book can serve as an orientation in the ongoing front line battle with addicts and addiction

An Existential Phenomenology of Addiction Anna Westin, 2020-02-20 Existential phenomenology can be a particularly helpful philosophical method for understanding human experience Starting from the perspective of the subject it can clarify and problematize subtle everyday relations enabling greater insight into difficult situations Used by contemporary philosophers as a way of understanding the embodied experience of illness this method has been helpful for understanding physical illness in the medical humanities offering a fruitful way of reading the subjectivity of mental states An Existential Phenomenology of Addiction examines how the experience of addiction engages both mental and physical phenomena within the existence of a particular human life using the philosophy of Emmanuel Levinas and Søren Kierkegaard The book maps out an existential phenomenology of subject in relation Both Levinas and Kierkegaard use decidedly psychological and theological language to situate their philosophy discussing the subject through concepts of love otherness responsibility and hope while played out in a situation of anxiety suffering desire and revelation Combining

existential phenomenological discourse with contemporary addiction discourse Westin argues that the concept of subject as addict as found in the Twelve Steps Program and disease models of addiction ought to be replaced with the free and relational identity of subject as addicted **Addictions** David Belin,2012-10-19 Addiction increasingly perceived as a heterogeneous brain disorder is one of the most peculiar psychiatric pathologies in that its management involves various often non overlapping resources from the biological psychological medical economical social and legal realms Despite extensive efforts from the players of these various fields to date there are no reliably effective treatments of addiction This may stem from a lack of understanding of the etiology and pathophysiology of this disorder as well as from the lack of interest into the potential differences among patients in the way they interact compulsively with their drug This book offers an overview of the psychobiology of addiction and its current management strategies from pharmacological social behavioural and psychiatric points of view **World Congress of Medical Physics and Biomedical Engineering 2006**

Sun I. Kim,Tae S. Suh,2007-05-07 These proceedings of the World Congress 2006 the fourteenth conference in this series offer a strong scientific program covering a wide range of issues and challenges which are currently present in Medical physics and Biomedical Engineering About 2 500 peer reviewed contributions are presented in a six volume book comprising 25 tracks joint conferences and symposia and including invited contributions from well known researchers in this field

Lacan and Addiction Yael Goldman Baldwin,2018-05-08 With chapters from Rik Loose Fabian Naparstek Patricia Gherovici Bruce Fink Thomos Svolos and many others the anthology is for people interested in the topic of addictions or in Lacanian psychoanalysis and especially for those interested in how the two intersect Lacan and Addiction is based on papers presented at a 2006 conference where Lacanians from around the world gathered to speak about addictions Conference participants explored the complexity of the problem for the individual society clinicians and for treatment In the current climate where addiction is mostly treated by variations of twelve step approaches and psychopharmacological countermeasures it is all too easy to lose sight of the dimensions of addiction that render it not just a disease to be managed but rather a significant form of human suffering and a subjective responsibility both of which are critical components of addiction treatment More and more addiction treatment is turning away from psychological and psychoanalytic theorization and towards psychopharmacological measures this anthology attempts to rectify that situation **Substance Use and**
