Parkinson, 2023-01-15

Beyond the Lines explores the social underpinnings of rebel adaptation and resilience. How do rebel groups cope with crises such as repression, displacement and fragmentation? What explains changes in militant organizations' structures and behaviors over time? Drawing on nearly two years of ethnographic research, Sarah E. Parkinson traces shifts in Palestinian militant groups' internal structures and practices during the civil war of 1975 to 1990 and foreign occupations of Lebanon. She shows that most militants approach asymmetrical warfare as a series of challenges centered around information and logistics, characterized by problems such as supplying constantly mobile forces, identifying collaborators, disrupting rival belligerents' operations and providing essential services like healthcare. Effective negotiation of these challenges contributes to militant organizations' resilience and survival. In this context, the foundation of rebel resilience lies with militants' ability to repurpose their everyday social networks to organizational ends. In the Lebanese setting, *Beyond the Lines* demonstrates how regionalized differences in Israeli, Syrian and Lebanese deployment of violence triggered distinct social network responses that led to divergent organizational outcomes for Palestinian militants. **Beyond Recidivism**

Andrea Leverentz, Elsa Y. Chen, Johnna Christian, 2020-05-05 Understanding reentry experiences after incarceration. Prison in the United States often has a revolving door with droves of formerly incarcerated people ultimately finding themselves behind bars again. In *Beyond Recidivism*, Andrea Leverentz, Elsa Y. Chen and Johnna Christian bring together a leading group of interdisciplinary scholars to examine this phenomenon using several approaches to research on recently released prisoners returning to their lives. They focus on the social context of reentry and look at the stories returning prisoners tell, including such key issues as when they choose to reveal or not their criminal histories. Drawing on contemporary studies, contributors examine the best ideas that have emerged over the last decade to understanding the challenges prisoners face upon reentering society. Together they present a complete picture of prisoner reentry, including real world recommendations for policies to ensure the well being of returning prisoners regardless of their past mistakes. **The Job Search Solution**

Beyond the Valley Ramesh Srinivasan,2020-09-01

How to repair the disconnect between designers and users producers and consumers and tech elites and the rest of us toward a more democratic internet In this provocative book Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics economics and other inefficient inharmonious human activities We may love the immediacy of Google search results the convenience of buying from Amazon and the elegance and power of our Apple devices but it s a one way top down process We re not asked for our input or our opinions only for our data The

internet is brought to us by wealthy technologists in Silicon Valley and China It's time Srinivasan argues that we think in terms beyond the Valley Srinivasan focuses on the disconnection he sees between designers and users producers and consumers and tech elites and the rest of us The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy In search of a more democratic internet Srinivasan takes us to the mountains of Oaxaca East and West Africa China Scandinavia North America and elsewhere visiting the design labs of rural low income and indigenous people around the world He talks to a range of high profile public figures including Elizabeth Warren David Axelrod Eric Holder Noam Chomsky Lawrence Lessig and the founders of Reddit as well as community organizers labor leaders and human rights activists To make a better internet Srinivasan says we need a new ethic of diversity openness and inclusivity empowering those now excluded from decisions about how technologies are designed who profits from them and who are surveilled and exploited by them
