Is The Future In Our Hands-My Experiences With Sukyo Mahikari Andris K Tebecis, Einstein, Tagore and the Nature of Reality Partha Ghose, 2016-06-23 The nature of reality has been a long debated issue among scientists and philosophers In 1930 Rabindranath Tagore and Albert Einstein had a long conversation on the nature of reality This conversation has been widely quoted and discussed by scientists philosophers and scholars from the literary world The important question that Tagore and Einstein discussed was whether the world is a unity dependent on humanity or the world is a reality independent on the human factor Einstein took the stand adopted by Western philosophers and mathematicians namely that reality is something independent of the mind and the human factor Tagore on the other hand adopted the opposite view Nevertheless both Einstein and Tagore claimed to be realists despite the fundamental differences between their conceptions of reality Where does the difference lie Can it be harmonized at some deeper level Can Wittgenstein for example be a bridge between the two views This collection of essays explores these two fundamentally different conceptions of the nature of reality from the perspectives of theories of space time quantum theory general philosophy of science cognitive science and mathematics *Josiah Royce in Focus* Jacquelyn Ann K. Kegley, Richard B. Gunderman, 2008-10-17 This new approach to Josiah Royce shows one of American philosophy's brightest minds in action for today's readers Although Royce was one of the towering figures of American pragmatism his thought is often considered in the wake of his more famous peers Jacquelyn Ann K Kegley brings fresh perspective to Royce's ideas and clarifies his individual philosophical vision Kegley foregrounds Royce's concern with contemporary public issues and ethics focusing in particular on how he addresses long standing problems such as race religion community the dangers of mass media mass culture and blatant individualistic capitalism She offers a deep and fruitful philosophical exploration of Royce's ideas on conflict resolution memory self identity and self development Kegley's keen understanding and appreciation of Royce reintroduces him to a new generation of scholars and students The Future of Psychoanalysis Richard D. Chessick, 2012-02-01 The Future of Psychoanalysis explores the contemporary problem of multiple theories of psychoanalysis and argues for a return to a more classical position based on Freud's work Using his training in psychiatry psychoanalysis and philosophy Richard D Chessick examines the special combination of hermeneutics and natural science that characterizes Freud's psychoanalysis and investigates what goes on in the mind of the psychoanalyst during the psychoanalytic process He maintains that while relativistic and intersubjective theories of psychoanalysis have value they have gone too far and generated a plurality of theories removed from Freud which has led to chaos in the field The Future of Psychoanalysis challenges these trends and

places this debate in the context of current mind brain controversies and unresolved questions about human nature

take on Waldorf education where it comes from what it means today and how it still holds promise for the future Moral Choices for Our Future Selves Eleonora Viganò, 2022-06-28 This book investigates the relationship between our present and future selves It focuses specifically on diachronic self regarding decisions choices involving our earlier and later selves in which the earlier self makes a decision for the later self The author connects the scientific understanding of the neurobehavioral processes at the core of individuals perceptions of their future selves with the philosophical reflection on individuals moral relationship with their future selves She delineates a descriptive theory of the perception of the future self that is based on empirical evidence and that systematizes and integrates the current theoretical literature She then argues for the morality of prudence and interprets diachronic self regarding decisions as decisions between two agents the earlier and later selves that belong to the realm of intergenerational ethics which regulates the relationship between contemporary people and future generations Finally the author provides a moral theory of prudence based on respect for one s agency This theory identifies what the present and the future selves owe to one another in diachronic self regarding decisions Moral Choices for Our Future Selves will be of interest to scholars and students working in ethics moral psychology philosophy of mind and cognitive science *The Cinema; Its Present Position and Future Possibilities* National Council of Public Morals. The Future of Creation Order Gerrit Glas, Jeroen de Ridder, 2018-01-12 This work provides an overview of attempts to

assess the current condition of the concept of creation order within reformational philosophy compared to other perspectives Focusing on the natural and life sciences and theology this first volume of two examines the arguments for and against the beauty coherence and order shown in the natural world being related to the will or nature of a Creator It examines the decay of a Deist universe and the idea of the pre givenness of norms laws and structures as challenged by evolutionary theory and social philosophy It describes the different responses to the collapse of order that given by Christian philosophy scholars who still argue for the idea of a pre given world order and that of other scholars who see this idea of stable creation order and or natural law as redundant and in need of a thorough rethinking It studies the particular role that reformational philosophy has played in the discussion It shows how ever since its inception almost a century ago the concepts of order and law principle structure have been at the heart of this philosophy and that one way to characterise this tradition is as a philosophy of creation order Reformational philosophers have maintained the notion of law as holding for reality This book discusses the questions that have arisen about the nature of such law is it a religious or philosophical concept does law just mean orderliness How does it relate to laws of nature Have they always existed or do they emerge during the process of evolution
