and multiple crises the world is in Billions are being invested in these technologies accompanied by sharp geopolitical rivalries to secure an edge in the control over them Volume 8 in the Democratic Marxism series invites readers to think more deeply and critically about digital capitalism and its limits While most governments in the world including South Africa have accepted a techno nationalist narrative and have deliberated on the risks for the planet and humanity the volume interrogates the effects and consequences of advances in artificial intelligence and heightened technological innovation and industrialisation on employment democracy and the climate Viewing the grand social engineering of 4IR through a Marxist lens the volume contributors engage critically with the class project of digital monopoly capitalism and its powerful totalitarian tendencies They question the dangerous technotopian imaginary shaping this digital techno shift the implications of algorithmic data extractivism the securitisation of already weak market democracies the social consequences of digital learning lack of regulation and the power dynamics in the labour process Anchored in techno realism the interdisciplinary perspective captured in this volume puts forward alternatives for democratisation and a just transition to protect human and non human life

The Post-Snowden Era Kathleen Kuehn,2016-12-09 Surveillance is confusing Should we give up on expecting privacy because we re all being watched or stop worrying because it s all exaggerated Actually neither of those is right A much better idea is to find a book that is sane well researched and easy to read so you understand don t fear needlessly and can do something about the things that are wrong A book like this one Nicky Hager Revelations about the nature and extent of global surveillance programs have shocked many But what are their implications in the long term and for New Zealand Mapping New Zealand s role in international intelligence gathering from the Second World War to the present day Kathleen Kuehn asks probing questions about the behaviour of both the state and corporations in our current surveillance society Ultimately these questions force us to confront the way we value our individual privacy and civil liberties for as we often hear why should any of this matter if we have nothing to hide

Opening the Black Box Gavin Smith,2014-10-03 Closed Circuit Television CCTV cameras are a prominent if increasingly familiar feature of urbanism They symbolize the faith that spatial authorities place in technical interventions for the treatment of social problems CCTV was principally introduced to sterilize municipalities to govern conducts and to protect properties Vast expenditure has been committed to these technologies without a clear sense of how precisely they influence things CCTV cameras might appear inanimate but Opening the Black Box shows them to be vital mediums within relational circulations of supervision The book principally excavates the social relations entwining the everyday application of CCTV It takes the reader on a journey from living beneath the camera to working behind the lens Attention focuses on the labour exerted by camera operators as they

source and process distanced spectacles These workers are paid to scan monitor screens in search of disorderly vistas visualizing stimuli according to its perceived riskiness and or allurement But the projection of this gaze can draw an unsettling reflection It can mean enduring behavioural extremities as an impotent witness It can also entail making spontaneous decisions that determine the course of justice Opening the Black Box therefore contemplates the seductive and traumatic dimensions of monitoring telemediated riskscape through the prism of camera circuitry It probes the positioning of camera operators as vicarious custodians of a precarious social order and engages their subjective experiences It reveals the work of watching to be an ambiguous practice as much about managing external disturbances on the street as managing internal disruptions in the self

Race and Police Ben Brucato, 2023-09-15 In the United States race and police were founded along with a capitalist economy dependent on the enslavement of workers of African descent Race and Police builds a critical theory of American policing by analyzing a heterodox history of policing drawn from the historiography of slavery and slave patrols Beginning by tracing the historical origins of the police mandate in British colonial America the book shows that the peculiar institution of racialized chattel slavery originated along with a novel binary conception of race On one side for the first time Europeans from various nationalities were united in a single racial category Inclusion in this category was necessary for citizenship On the other Blacks were branded as slaves cast as social enemies and assumed to be threats to the social order The state determined not only that it would administer slavery but that it would regulate slaves authorizing the use of violence by agents of the state and white citizens to secure the social order In doing so slavery citizenship and police mutually informed one another and together they produced racial capitalism a working class defined and separated by the color line and a racial social order Race and Police corrects the Eurocentrism in the orthodox history of American police and in predominating critical theories of police That orthodoxy rests on an origin story that begins with Sir Robert Peel and the London Metropolitan Police Service

Predating the Met by more than a century America's first police often called slave patrols did more than maintain order it fabricated a racial order Prior to their creation all white citizens were conscripted to police all Blacks Their participation in the coercive control of Blacks gave definition to their whiteness Targeted as threats to the security of the economy and white society being policed defined Blacks who for the first time were treated as a single racial group The boundaries of whiteness were first established on the basis of who was required to regulate slaves given a specific mandate to prevent Black insurrection a mandate that remains core to the police role to this day
