Street-Level Bureaucracy in Instructional Design Nirupama Akella, 2024-03-13 This book explores the role and function of instructional designers in higher education highlighting the real world discrepancy between their actual contributions to organizational growth and the official job descriptions provided by universities Investigating how higher education professionals navigate the daily conflict arising from this misalignment it highlights a number of approaches including improvising to accommodate additional tasks or strictly adhering job descriptions The volume is structured around main three themes the interpretation of instructional

design and the role of instructional designers the concept of street level bureaucracy and coping strategies and the contribution of instructional designers to organizational development The research is grounded in the sociological and management theory of street level bureaucracy allowing the author to dissect employee behavior into microelements and connect these to the macro outcomes of organizational development The study employs a qualitative approach using quantitative content analysis and qualitative interviewing on a sample of 17 instructional designers from three different regions in the US The findings challenge institutional and practice assumptions offering a new perspective of understanding which asks whether instructional designers are predominantly acting as street level bureaucrats or whether behavior and performance is framed by institutional culture and personal characteristics The author then discusses the implications of these findings for policy practice theory and future research It will be of interest to academicians post graduate students and higher education leadership professionals from fields across education management instructional design sociology and research methods

Measuring and Visualizing Learning in the Information-Rich Classroom Peter Reimann, Susan Bull, Michael Kickmeier-Rust, Ravi Vatrappu, Barbara Wasson, 2015-11-19 Integrated information systems are increasingly used in schools and the advent of the technology rich classroom requires a new degree of ongoing classroom assessment Able to track web searches resources used task completion time and a variety of other classroom behaviors technology rich classrooms offer a wealth of potential information about teaching and learning This information can be used to track student progress in languages STEM and in 21st Century skills for instance However despite these changes there has been little change in the kind of data made available to teachers administrators students and parents Measuring and Visualizing Learning in the Information Rich Classroom collects research on the implementation of classroom assessment techniques in technology enhanced learning environments Building on research conducted by a multinational and multidisciplinary team of learning technology experts and specialists from around the globe this book addresses these discrepancies With contributions from major researchers in education technology testing and assessment and education psychology this book contributes to a holistic approach for building the information infrastructure of the 21st Century school
