The Stability Imperative Human Rights And Law In China:

The Stability Imperative Sarah Biddulph, 2015 The Stability Imperative Human Rights and Law in China reveals how the systematic failure of the legal system to protect rights coupled with an overemphasis on coercive forms of stability preservation is undermining the authority of law in China and could ultimately damage the Communist Party's leadership. Provided by publisher Human Rights in China Eva Pils, 2017-11-10 How can we make sense of human rights in China's authoritarian Party State system? Eva Pils offers a nuanced account of this contentious area, examining human rights as a set of social practices. Drawing on a wide range of resources, including years of interaction with Chinese human rights defenders, Pils discusses what gives rise to systematic human rights violations, what institutional avenues of protection are available, and how social practices of human rights defence have evolved. Three central areas are addressed: liberty and integrity of the person, freedom of thought and expression, and inequality and socio-economic rights. Pils argues that the Party State system is inherently opposed to human rights principles in all these areas, and that, contributing to a global trend, it is becoming more repressive. Yet, despite authoritarianism's lengthening shadows, China's human rights movement has so far proved resourceful and resilient. The trajectories discussed here will continue to shape the struggle for human rights in China and beyond its borders. Handbook on Human Rights in China Sarah Biddulph, Joshua Rosenzweig, 2019 This Handbook gives a wide-ranging account of the theory and practice of human rights in China, viewed against international standards and China's international engagements around human rights. The Handbook is organised into the following sections: contested meanings, international dimensions, economic and social rights, civil and political rights, rights in action, and access to justice, political dimensions of human rights in Greater China, and new frontiers. **Global Constitutionalism from European and East Asian Perspectives** Takao Suami, Anne Peters, Dimitri Vanoverbeke, Matthias Kumm, 2018-11-29 Examines and compares East Asian and European perspectives of Global Constitutionalism. Democracy and Rule of Law in China's Shadow Brian Christopher Jones, 2021-06-03 This book provides detailed insight into some of the most contentious events occurring in jurisdictions operating within China's vast shadow. Epic clashes between law and politics have become a regular fixture throughout the world, and no region has seen more of these than Asia. In some cases, these conflicts have involved newfound democratic aspirations or democratic deepening, while in others, it has arisen because of pushback against authoritarian or semi-authoritarian governments. Indeed, many of these clashes centre on or involve the region's most powerful and controversial player, China. This book focuses on several of these critical struggles, examining how democracy and the rule of law play out in a number of jurisdictions highly influenced by China's presence. Chapters provide insightful analysis on issues such as major threats to the rule of law and attempts to uphold the principle of oath-taking, controversies over foreign judges, and the disparagement of the judiciary, unconstitutional and undemocratic provisions, changing ideas of representation, a right to democracy in international law, same-sex marriage rights, and the legal responses to civil disobedience in Taiwan and Hong

Kong among other topics Ultimately the book delivers a contemporary understanding of how democracy and the rule of law both complement and converge in this fascinating region

Grey Zones in International Economic Law and Global Governance Daniel Drache, Lesley A. Jacobs, 2018-10-15 Since the 2008 economic meltdown market driven globalization has posed new challenges for governments This collection

introduces the innovative concept of grey zones of global governance where international rules are bent or ignored. These zones are significant contested spaces for state policy and market behaviour to interact with respect to trade, the environment, food security and investment. Powerful incentives exist in the global economy for states to harmonize their policies through trade and investment agreements. But grey zones both promote uniformity in many areas of public life and facilitate diverse forms of capitalism in market societies. They enable governments to balance national and global economic benefits as they advance their core interests. At a time of growing nationalist sentiment, *Grey Zones in International Economic Law and Global Governance* explores creative local engagement with international economic law and offers a bold new way to understand public concerns about international trade and investment, food security, green energy subsidies and anti-dumping actions. **Global Health Security in China, Japan, and India** Lesley A. Jacobs, Yoshitaka Wada, Ilan Vertinsky, 2023-02-01

The COVID 19 pandemic has put a newfound emphasis on the importance of global health security, the idea that countries must coordinate their efforts globally to address pressing international public health threats while meeting their own specific domestic health care needs. *Global Health Security in China, Japan and India* investigates how global health security is evolving in three major Asian countries that have committed to adhering to the international health standards and targets in accordance with United Nations Sustainable Development Goals (SDGs). Contributors explore three areas of global health security in the SDG agenda: strengthening access to primary health care, protecting and promoting public health, and integrating global markets into health care provision. As this comprehensive volume demonstrates, despite having to balance cost and affordability, stakeholder demands, political ideology and global economic pressures with decisions about how to best meet global health standards, all three countries have made significant advances in health law and policy over the past decade. **Good Governance in Economic Development** Sarah Biddulph, Ljiljana Biuković, 2019-10-01

Globally, isolationism and protectionism are on the rise, and resurgent authoritarian nations are reasserting the centrality of the sovereign state. And with China's influence around the world intensifying, the dynamic interrelationship of the national and supranational in shaping norms of good governance has become increasingly relevant. *Good Governance in Economic Development* critically examines the ways in which transparency and accountability mechanisms are incorporated or reflected in international trade, finance and investment regimes. It also explores the Chinese state's engagement with these norms, shedding new light not only on how the principles of transparency, accountability and public participation are applied within China, but also on the ability of China to affect international rules. Through close analysis of how norms are adapted locally, the contributors offer insights into the global and national implications of international good governance rules.

Playing by the Informal Rules Yao Li, 2019. Sheds new light on social protest and its implications on power, rules, legitimacy and resistance in modern societies.
