Extraterrestrial Altruism Douglas A. Vakoch, 2013-09-14 Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence SETI that extraterrestrials will be transmitting messages to us for our benefit This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact Technological civilizations that transmit signals for the benefit of others but with no immediate gain for themselves certainly seem to be altruistic But does this make biological sense Should we expect altruism to evolve throughout the cosmos or is this only wishful thinking Is it dangerous to send messages to other worlds as Stephen Hawking has suggested or might humankind benefit from an exchange with intelligence elsewhere in the galaxy Would extraterrestrial societies be based on different ethical principles or would we see commonalities with Earthly notions of morality Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth providing new insights that are critical for SETI Chapters are authored by leading scholars from diverse disciplines anthropology astronomy biology chemistry computer science cosmology engineering history of science law philosophy psychology public policy and sociology The book is carefully edited by Douglas Vakoch Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies The Foreword is by Frank Drake This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth or whether they are built into the fabric of the universe

Psience Fiction Damien Broderick, 2018-05-31 Science fiction has often been considered the literature of futuristic technology fantastic warfare among the stars or ruinous apocalypses on Earth The last century however saw through John W Campbell the introduction of psience fiction which explores such themes of mental powers as telepathy precognition of the future teleportation etc and symbolic machines that react to such forces The author surveys this long ignored literary shift through a series of influential novels and short stories published between the 1930s and the present This discussion is framed by the sudden surge of interest in parapsychology and its absorption not only into the SF genre but also into the real world through military

experiments such as the Star Gate Program **Alan Moore, Out from the Underground** Maggie Gray, 2017-11-01 This book explores Alan Moore's career as a cartoonist as shaped by his transdisciplinary practice as a poet, illustrator, musician, and playwright as well as his involvement in the Northampton Arts Lab and the hippie counterculture in which it took place. It traces Moore's trajectory out from the underground comix scene of the 1970s and into a commercial music press rocked by the arrival of punk. In doing so, it uncovers how performance has shaped Moore's approach to comics and their political potential. Drawing on the work of Bertolt Brecht, who similarly fused political dissent with experimental popular art, this book considers what looking strangely at Alan Moore as cartoonist tells us about comics, their visual and material form, and the performance and politics of their reading and making.

The Monomyth in American Science Fiction Films Donald E. Palumbo, 2014-11-05 One of the great intellectual achievements of the 20th century, Joseph Campbell's *The Hero with a Thousand Faces* is an elaborate articulation of the monomyth, the narrative pattern underlying countless stories from the most ancient myths and legends to the films and television series of today. The monomyth's fundamental storyline, in Campbell's words, sees the hero venture forth from the world of the common day into a region of supernatural wonder; fabulous forces are there encountered, and a decisive victory is won; the hero comes back from this mysterious adventure with the power to bestow boons to his fellow man. Campbell asserted that the hero is each of us; thus, the monomyth's endurance as a compelling plot structure. This study examines the monomyth in the context of Campbell's *The Hero* and discusses the use of this versatile narrative in 26 films and two television shows produced between 1960 and 2009, including the initial Star Wars trilogy (1977, 1983), *The Time Machine* (1960), *Logan's Run* (1976), *Escape from New York* (1981), *Tron* (1982), *The Terminator* (1984), *The Matrix* (1999), the first 11 *Star Trek* films (1979-2009), and the Sci-Fi Channel's miniseries *Frank Herbert's Dune* (2000) and *Frank Herbert's Children of Dune* (2003).

The Graphic Novel Jan Baetens, Hugo Frey, 2015 This book provides both students and scholars with a critical and historical introduction to the graphic novel. Jan Baetens and Hugo Frey explore this exciting form of visual and literary communication, showing readers how to situate and analyse graphic novels since their rise to prominence half a century ago. Several key questions are addressed: what is the graphic novel? How do we read graphic novels as narrative forms? Why is page design and publishing format so significant? What theories are developing to explain the genre? How is this form blurring the categories of high and popular literature? Why are graphic novelists nostalgic for the old comics? The authors address these and many other questions raised by the genre. Through their analysis of the works of many well-known graphic novelists, including Bechdel, Clowes, Spiegelman, and Ware, Baetens and Frey offer significant insights for future teaching and research on the graphic novel.
