The Superinsulated Home :

The Superinsulated Home Book J. D. Ned Nisson, Gautam Dutt, 1985-02-25 This book written by two authoritative figures in the area of energy technology is the first to thoroughly describe in simple clear language the technology known as superinsulation Appropriate for anyone involved in residential construction and for students of engineering technology it provides a conceptual understanding of the superinsulated house as well as details for assembling the construction elements of such a system Includes over 250 photos and architectural drawings **Living Homes** Thomas J. Elpel, 2005 The house of your dreams does not have to be expensive Living Homes takes you through the planning process to design an energy and resource efficient home that won't break the bank Then from the footings on up to the roof author Thomas J Elpel guides you through the nuts and bolts of slipform stone masonry tilt up stone walls log home construction building with straw bales terra tile floors concrete countertops windows and doors solar water systems masonry heaters framing plumbing greywater septic systems swamp filters painting and much more *Super Insulated Houses and Double Envelope Houses* William A. Shurcliff, 1981 **The Superinsulated House** Ed McGrath, 1981 **The ENERGY EFFICIENT HOME** Patrick Waterfield, 2012-08-01 Reducing energy consumption and costs is an issue of ever increasing importance and European and national legislation aimed at reducing carbon emissions is tightening up minimum energy standards for new buildings as well as those being extended or renovated Energy saving measures in the home will therefore become ever more cost effective throughout our lifetimes This book covers every aspect of the efficient consumption of energy in the home including the following and much more the position of the dwelling its method of construction and the materials used energy rating and the legal framework insulation and U values windows and doors conservatories sunrooms and loft conversions heating and hot water systems lighting and making the best use of daylight ventilation renewable energy technologies appliances gadgets and housekeeping the wider environmental issues including water economy and recycling This non technical book is fully revised and updated to take account of recent legislation and developments in energy efficient products and techniques

How to Reduce Your Home Energy Bills Centaur Media, 2014-12-03 How to Save Money on Your Energy Bills is a unique publication designed to give homeowners expert advice on the best ways to make their home energy efficient generate their own energy and benefit from Government incentives Aimed at the homeowner looking to carry out long term investments as well as short term quick fixes this brilliant guide is the ultimate companion to reducing your energy bills for good **Midori Haus** Chie Kawahara, 2017-11-18 Managing a major remodel of your home involves learning various aspects of a construction project permitting hiring contractors clarifying what you really mean and want managing a budget overseeing quality avoiding regrets doing what's right for yourself and standing up for yourself It's a big job The learning curve is high and often we homeowners don't get to apply the skills we learned again In this book the stories of a couple going through this learning curve is told through the lens of a novice just like a conversation with a homeowner over a cup of

tea What they thought they wanted a brand new house in modern minimalist style with solar panels and recycled materials is very different than what they ended up with remodel of a 90 year old house in the classic Arts and Crafts style to meet the stringent international building standard called Passive House What caused this shift How did they choose the contractor How did they navigate out of overwhelm of green building choices How did they manage the relationships What would they do differently Was it worth it This book chronicles the journey by a couple from choosing the location through living in the house after the renovation completion It wasn't all about finding smart people and following expert guidance When expert opinions diverged and they got stuck in analysis paralysis they had to trust their judgment and chose what they felt was right for them After all they'll be living in the house for years after the experts are gone

Reviews for MIDORI HAUS Chie Kawahara is a storyteller Her book Midori Haus tells a compelling story in a conversational style about a couple who wanted to remodel an older home that would use as little energy as possible and was comfortable and healthy to live in Anyone who has an interest in green building doing right for oneself and the planet will find a friend in this book Jim Gunshinan Editor Home Energy Magazine Midori Haus serves as a journey of adapting learning greening nurturing and caring for an old house by renewing the house to address current and future environmental challenges The narrative is delightfully educational the design process of achieving the passive house standard will be better understood through these stories and conversations

Alison G Kwok Ph D AIA CPHC University of Oregon The international Passive House standard has gained a deserved reputation as the fastest growing building energy efficiency standard in the world Unsurprisingly publications about it have mostly been by and for industry professionals Midori Haus represents an alternative introducing readers to Passive House through the eyes of a homeowner undertaking a remodeling project Chie Kawahara takes readers along on her journey of discovery and remodeling triumph She makes the process understandable and accessible and readers are given practical tools they can use on their own Passive House projects There's nothing like a good case study told by the people involved to bring abstract concepts to life Midori Haus doesn't disappoint

Elrond Burrell Architect CPHD blogger In this delightful book Chie Kawahara describes the process she and her husband went through to purchase a 1920s bungalow and turn it into a state of the art healthy green Passive House This account of their experiences is highly instructional for anyone considering buying and renovating a house and it's a wonderful read

Alex Wilson Founder BuildingGreen Inc *The Home Design Handbook* June Cotner Myrvang, Steve Myrvang, 1992-04-15 This uniquely practical guide will help guarantee that the home you build buy or renovate will perfectly suit your needs desires and lifestyle

[Log Home Living](#), 1997 Log Home Living is the oldest largest and most widely distributed and read publication reaching log home enthusiasts For 21 years Log Home Living has presented the log home lifestyle through striking editorial photographic features and informative resources For more than two decades Log Home Living has offered so much more than a magazine through additional resources shows seminars mail order bookstore Web site and membership organization That's why the most serious log home buyers choose

Log Home Living **Home Sweet Zero Energy Home** Barry Rehfeld, 2011-11-01 Zero energy homes produce at least as much energy as they consume through a combination of energy efficiencies passive design and renewable energy production California has adopted zero net energy as the new residential standard for 2020 many other governments are considering similar policies Developing zero energy homes is the first step towards making all buildings zero energy a critical step in mitigating climate change since buildings account for 40% of material and energy use worldwide Home Sweet Zero Energy Home is the first practical guidebook that clearly shows how zero energy homes can be good livable affordable homes The author identifies all the pieces of the zero energy puzzle and how they fall into place and explains how homeowners and buyers can also take smaller steps towards sharply reducing the energy use of existing buildings Focusing on real costs and savings this book takes an in depth look at Site selection and passive design Insulation windows doors and building materials Heating and cooling Appliances and electronics Financial resources and incentives Whether you are a prospective buyer owner or developer Home Sweet Zero Energy Home is your complete guide to creating a more comfortable efficient environmentally friendly home without breaking your back or your bank account Intersol Eighty Five E. Bilgen, 2013-10-22 These volumes bring together from all over the world papers from specialists working in all the diverse forms of energy derived from the sun Experts in all fields of research in solar and renewable energy have also contributed an added feature the latest research and developments in related areas such as wind energy biomass photovoltaics and energy conversion Emphasis is placed on the many solutions solar and renewable energy offers to the global energy problem and the different ways of combining solar and renewable energy to solve these problems The work should stimulate readers to consider the broader horizons of renewable energy energy conservation and the impact of new technologies on society from the small remote village to the modern metropolis Designed for Habitat David Hinson, Justin Miller, 2013-05-07 If you're looking for ways to give back to your community then this book the first to profile thirteen projects designed and built by architects and Habitat for Humanity will help Detailed plans sections and photographs show you how these projects came about the strategies used by each team to approach the design and construction process and the obstacles they overcame to realize a successful outcome The lessons and insights presented here will aid you whether you're an architect architecture student Habitat affiliate leader or an affordable housing advocate Located all across the United States these projects represent the full spectrum of Habitat for Humanity affiliates from large urban affiliates to small rural programs These cases illustrate a broad range of innovative approaches to energy performance alternative construction strategies and responses to site context And each house demonstrates that design quality need not fall victim to the rigorous imperatives of cost delivery and financing Popular Science , 1984-08 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better Your Green Home Alex Wilson, 2006-06-01 A

guide to designing and building the environmentally friendly energy efficient home of your dreams More and more homeowners today want houses that are healthy to live in and cause minimal damage to the environment That s what green building is all about Your Green Home is written for homeowners planning a new home whether you are working with an architect or builder or serving as your own general contractor Intended to improve the overall environmental performance of new houses being built the book sets out to answer some of the big picture questions relating to having a home designed and built and getting what you want Your Green Home covers Home location and its relationship to the community Site design Construction systems Building design to optimize energy performance Renewable energy systems Material selection Indoor environmental quality Water efficiency Material selection Written by the founder of BuildingGreen North America s premier green building authority this book will prove useful not only to future homeowners but also to designers and builders seeking to meet this demand Building professionals well versed in green building may find this a useful book to give to potential clients to convey the scope and principles of green building

Use of Vegetation to Ameliorate Building Microclimates
