The Syntax Of Complex Predicates In Urdu:

The Structure of Complex Predicates in Urdu Miriam Butt, 1995-07 This book takes a detailed look at two differing complex predicates in the South Asian language Urdu. The Urdu permissive in particular brings into focus the problem of the syntax semantics mismatch. An examination of the syntactic properties of this complex predicate shows that it is formed by the combination of two semantic heads but that this combination is not mirrored in the syntax in terms of any kind of syntactic or lexical incorporation.

The Syntax of Complex Predicates in Urdu Zafeer Hussain Kiani, 2013-01 This study aims to analyze the syntax of complex predicates in Urdu. Complex predicate is a widespread phenomenon across the world languages and in Urdu as well. Urdu complex predicates are made up of a V1V2 sequence where V1 is main verb and V2 is light verb. The main verb occurs in stem form and light verb contributes aspectual information to the clause. Complex predicates phenomenon of Urdu is analyzed under the Minimalist Program Chomsky 1993, 1995, 2001 which has two levels of representation i.e. logical form and phonological form.

The Handbook of Lexical Functional Grammar Mary Dalrymple, 2023-12-14 Lexical Functional Grammar (LFG) is a nontransformational theory of linguistic structure first developed in the 1970s by Joan Bresnan and Ronald M Kaplan which assumes that language is best described and modeled by parallel structures representing different facets of linguistic organization and information related by means of functional correspondences. This volume has five parts. Part I Overview and Introduction provides an introduction to core syntactic concepts and representations. Part II Grammatical Phenomena reviews LFG work on a range of grammatical phenomena or constructions. Part III Grammatical modules and interfaces provides an overview of LFG work on semantics argument structure prosody information structure and morphology. Part IV Linguistic disciplines reviews LFG work in the disciplines of historical linguistics learnability psycholinguistics and second language learning. Part V Formal and computational issues and applications provides an overview of computational and

formal properties of the theory implementations and computational work on parsing translation grammar induction and treebanks Part VI Language families and regions reviews LFG work on languages spoken in particular geographical areas or in particular language families The final section Comparing LFG with other linguistic theories discusses LFG work in relation to other theoretical approaches

The Oxford Handbook of Ergativity Jessica Coon, Diane Massam, Lisa deMena Travis, 2017-07-13 This volume offers theoretical and descriptive perspectives on the issues pertaining to ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects This pattern differs markedly from nominative accusative marking whereby transitive and intransitive subjects are treated as one grammatical class to the exclusion of direct objects While ergativity is sometimes referred to as a typological characteristic of languages research on the phenomenon has shown that languages do not fall clearly into one category or the other and that ergative characteristics are not consistent across languages Chapters in this volume look at approaches to ergativity within generative typological and functional paradigms as well as approaches to the core morphosyntactic building blocks of an ergative construction related constructions such as the anti passive related properties such as split ergativity and word order and extensions and permutations of ergativity including nominalizations and voice systems The volume also includes results from experimental investigations of ergativity a relatively new area of research A wide variety of languages are represented both in the theoretical chapters and in the 16 case studies that are more descriptive in nature attesting to both the pervasiveness and diversity of ergative patterns
