Autism Spectrum Disorders in Childhood Melanie Leukert, 2022-02-02 Bachelor Thesis from the year 2012 in the subject Social Work grade 1.0 Erfurt University of Applied Sciences language English abstract The focus of this Bachelor s thesis is the comparison of early childhood autism

with Asperger's syndrome I work out successively how these disorders differ and how social workers can act professionally through methodical procedures and programmes. Even though the causes of autism spectrum disorders are not yet clearly defined, the symptoms can be compensated for through targeted support. The studies focus on the treatment of these disorders. Therefore, the bachelor's thesis elaborates how social workers can contribute in a supportive and accompanying way to compensate for the symptoms of autism spectrum disorders in childhood. The central task is the early recognition of the corresponding disorder in order to be able to intervene in a targeted manner. This can be done through screening in early childhood, but in Germany the diagnosis of early childhood autism is often not made until the age of four. The diagnosis of Asperger's syndrome is sometimes more delayed because children develop normally in the first months and years of life. This gave rise to the following questions, which are discussed below: What are the similarities and differences between early childhood autism and Asperger's syndrome, and how do they manifest themselves? Which support options for building social and communicative skills can compensate for autistic behaviour, and how can social workers intervene?

Child and Adolescent Behavioral Health Edilma L. Yearwood, Geraldine S. Pearson, Jamesetta A. Newland, 2021-03-23. Research has shown that a range of adult psychiatric disorders and mental health problems originate at an early age, yet the psychiatric symptoms of an increasing number of children and adolescents are going unrecognized and untreated; there are simply not enough child psychiatric providers to meet this steadily rising demand. It is vital that advanced practice registered nurses (APRNs) and primary care practitioners take active roles in assessing behavioral health presentations and work collaboratively with families and other healthcare professionals to ensure that all children and adolescents receive appropriate treatment. Child and Adolescent Behavioral Health helps APRNs address the mental health needs of this vulnerable population, providing practical guidance on assessment, guidelines, intervention, and treatment strategies, indications for consultation, collaboration, referral, and more. Now in its second edition, this comprehensive and timely resource has been fully updated to include DSM-5 criteria and the latest guidance on assessing, diagnosing, and treating the most common behavioral health issues facing young people. New and expanded chapters cover topics including eating disorders, bullying, and victimization, LGBTQ identity issues, and conducting research with high-risk children and adolescents. Edited and written by a team of accomplished child psychiatric and primary care practitioners, this authoritative volume provides state-of-the-art knowledge about specific psychiatric and behavioral health issues in multiple care settings. Reviews the clinical manifestation and etiology of behavioral disorders, risk, and management issues and implications for practice, research, and education. Offers approaches for interviewing children and adolescents and strategies for integrating physical and psychiatric screening. Discusses special topics such as legal and ethical issues, cultural influences, the needs of immigrant children, and child and adolescent mental health policy. Features a new companion website containing clinical case studies to apply concepts from the chapters. Designed to specifically address the issues faced by APRNs, Child and Adolescent Behavioral Health is essential reading for

nurse practitioners and clinical nurse specialists particularly those working in family pediatric community health psychiatric and mental health settings Second Place in the Child Health Category 2021 American Journal of Nursing Book of the Year Awards
