Relevant Accounting Concepts and Applications (RLE Accounting) Harvey Hendrickson, 2013-11-26 C Rufus Rorem 1894-1988 was a pioneer in the development of group medical insurance and pre paid health care. At the time the concepts were radical but in 1937 he became head of the American Hospital Association's committee on hospital services which fostered the first prepaid hospitalization plans in New York and other cities followed in the 1940s by doctors group practice. This collection includes out of print and difficult to access primary and secondary sources on Rorem's work including his 1929 dissertation which presents his major and still relevant writings on financial accounting theory and practice in a comprehensive integrated context.

A History of Financial Accounting (RLE Accounting) J. Edwards, 2013-12-04 This volume deals with the evolution of accounting from earliest times and gives particular attention to corporate accounting developments since the Industrial Revolution. The author identifies the various sources of accounting practices employed by British companies to demonstrate the main changes which have taken place when they occurred and why. The author emphasises the need to understand the legal, social and economic context in which accountancy changes take place and also studies the conflicts which arise between suppliers and users of accounting statements. The study concludes with an examination of the duties performed by the professional accountant, the extent to which these have changed in the course of time and how his position in society is reinforced by the activities of professional institutions.
