

Climate Change

High School Lesson Plan

Topic: Climate – climate change and the impact on plants life

Grade Level: 9 – 12

Overview

How do changes in the climate impact maple in northern New England? Climate change is global, ongoing, and a long-term phenomenon. It has effects both large and small on environmental systems, although the effects are not necessarily easy to observe in our daily lives. However, local climate change can be gauged by studying certain regional indicators, such as maple syrup production.

Gathering sap for maple syrup is part of northern New England's cultural heritage. The collection and boiling off sap for maple syrup began with the native people of the region and continues today. The main subject of sap depends largely on two factors: individual maple tree species and temperature variations in northern New England, and particularly Minnesota, the climate is ideal for growing sugar maple trees. The normal maple sap season runs from late October or early November through April if regional temperature patterns change, then what happens to the trees and their sap production?

Introduction

QUEST Climate Change addresses many aspects of this topic as it affects New England. This lesson plan constitutes with suggested actions that students and families can take to reduce the factors leading to regional climate changes. Lesson activities focus on the particular impact of climate change in northern New England: the production of maple syrup. How may we as educators explore certain environmental factors in more depth, such as land development, water precipitation, abundance of trees in the watershed, and water access. All of these affect the forest in northern New England.

Time Allotment: Plan to use 15-minute class periods.

Accessing Prior Knowledge

Students should have some basic understanding of the factors that lead to changes in climate, such as gas production from certain human activities and the reduction in the amount forests. More detailed knowledge of these factors is helpful but not necessary. This lesson does not require students to solve the problem. Rather, it enables them to make the connections between the cause (specific gas emissions) and the effect (temperature increases) and to consider why the cause-and-effect relationship is important to them.

QUEST Knowledge: How Warm is an important youth education series.

Using Understanding by Design in the Culturally and Linguistically Diverse Classroom Amy J. Heineke, Jay McTighe, 2018-07-11 How can today's teachers whose classrooms are more culturally and linguistically diverse than ever before ensure that their students achieve at high levels? How can they design units and lessons that support English learners in language development and content learning simultaneously? Authors Amy Heineke and Jay McTighe provide the answers by adding a lens on language to the widely used Understanding by Design framework. UbD framework for curriculum design which emphasizes teaching for understanding not rote memorization. Readers will learn the components of the UbD framework, the fundamentals of language and language development, how to use diversity as a valuable resource for instruction by gathering information about students' background knowledge from home, community, and school; how to design units and lessons that integrate language development with content learning in the form of essential knowledge and skills; and how to assess in ways that enable language learners to reveal their academic knowledge. Student profiles, real-life classroom scenarios, and sample units and lessons provide compelling examples of how teachers in all grade levels and content areas use the UbD framework in their culturally and linguistically diverse classrooms. Combining these practical examples with findings from an extensive research base, the authors deliver a useful and authoritative guide for reaching the overarching goal of ensuring that all students have equitable access to high-quality curriculum and instruction.

Environmental Change in South-East Asia Raymond Bryant, Michael Parnwell, 2005-08-03 *Environmental Change in South East Asia* brings together scholars, journalists, consultants, and NGO activists to explore the interaction of people, politics, and ecology. Ostensibly green activities—plantation, forestry, eco-tourism, hydro-electricity—are revealed as guises used by elites to promote their own political and economic interests. Highlighting fatal flaws in presently exclusive economic and ecological approaches, the authors stress that neither the quest for sustainable development nor the process of environmental change itself can be understood without reference to political processes.

The Oxford Handbook of Preservice Music Teacher Education in the United States Colleen Marie Conway, Kristen Pellegrino, Ann Marie Stanley, Chad West, 2020 *The Oxford Handbook of Preservice Music Teacher Education in the United States* advocates for increased cultural engagement in Pre-K-12 music education.

Adaptable Teaching Jonathan Ryan Davis, Maureen Connolly, 2022-04-01 This book is designed for all K-12 educators and teacher preparation faculty. Reading this book is like being in the room with 30 teacher mentors from different grade levels and school settings who are sharing strategies for 1. building and maintaining a positive classroom climate, 2. planning, 3. instruction, and 4. professional development. Discover step-by-step breakdowns of how to implement each strategy, as well as professional reflections from contributors representing two different grade levels and a range of suburban and urban settings from all over the globe. Education students and novice teachers will learn from the in-depth descriptions of how to implement each strategy. Veteran teachers will be inspired by contributing teachers' professional reflection regarding why and how they

utilize each strategy Readers in ALL school contexts will benefit from narrative descriptions of each strategy in action which bring to life the ways that the strategies have made an impact on student learning and teacher development The adaptations modeled throughout the book based on students and schools assets and needs help readers to think about how to make each strategy a good fit for their unique classroom If you are looking for practical ideas from the field look no further this is a book designed to build your teaching toolbox with strategies that you will use for years to come TESOL and Sustainability Jason Goulah, John Katunich, 2020-05-14 In the burgeoning field of ecolinguistics little attention has been given to the ways in which English language teaching is and has become implicated in global ecological crises This book begins a dialogue about the opportunities and responsibilities presented to the TESOL field to re orient professional practice in ways that drive cultural change and engender alternate language practices and metaphors Covering a diverse range of topics including anthropogenic climate change habitat loss food insecurity and mass migration chapters argue that such crises require not only technological innovation but also cultural changes in how human beings relate to each other and their environment Arguing that it is incumbent upon the field of English language teaching to reckon with such cultural changes in how and what we teach TESOL and Sustainability addresses the ways in which discourses such as eco pedagogy the critique of neo liberalism non Western philosophy and post humanist thought can and must inform how and what is taught in ESL and EFL classrooms
