Impacts of Conflict on Nation-building in Iraq Dai Yamao, 2025-09-26 This is the first monograph to empirically analyze the impact of the myriad conflicts that arose within Iraq in the wake of the U S invasion of Iraq in 2003 on nation building It draws upon a plethora of primary sources including school textbooks and local newspapers in conjunction with a range of unique surveys quantitative text analysis and other methodologies This study represents a distinctive attempt to answer the question of why national cohesion has been maintained despite the occurrence of devastating conflicts and a brutal civil war in Iraq It employs unique data and a mixed methods approach to achieve this goal It has frequently been asserted that the Iraqi state descended into dysfunction and national unity was undermined as a consequence of the various conflicts that have occurred in the post war period However the author s multiple surveys revealed that despite a lack of trust in state institutions individuals have high expectations of their role Moreover there is a paucity of trust in non state actors who are responsible for fulfilling the functions of the state in its absence The surveys also indicate a robust sense of Iraqi identity in spite of the civil wars and conflicts that divide the population along with a high value placed on national integration policies This book elucidates the factors that have led to these contradictory attitudes Focusing centrally on issues surrounding post conflict nation building in Iraq the book also offers methodological suggestions for analyzing various aspects of the impact of conflict in other post war societies a topic that has not been thoroughly studied empirically History of Central Asia, The:
