The Quest for a Universal Theory of Intelligence Christian Hugo Hoffmann, 2022-05-09 Recent findings about the capabilities of smart animals such as corvids or octopi and novel types of artificial intelligence AI from social robots to cognitive assistants are provoking the demand for new answers for meaningful comparison with other kinds of intelligence This book fills this need by proposing a universal theory of intelligence which is based on causal learning as the central theme of intelligence The goal is not just to describe but mainly to explain queries like why one kind of intelligence is more intelligent than another whatsoever the intelligence Shiny terms like strong AI superintelligence singularity or artificial general intelligence that have been coined by a Babylonian confusion of tongues are clarified on the way

The Evolution of the Sensitive Soul Simona Ginsburg, Eva Jablonka, 2019-03-12 A new theory about the origins of consciousness that finds learning to be the driving force in the evolutionary transition to basic consciousness What marked the evolutionary transition from organisms that lacked consciousness to those with consciousness to minimal subjective experiencing or as Aristotle described it the sensitive soul In this book Simona Ginsburg and Eva Jablonka propose a new theory about the origin of consciousness that finds learning to be the driving force in the transition to basic consciousness

Using a methodology similar to that used by scientists when they identified the transition from non life to life Ginsburg and Jablonka suggest a set of criteria identify a marker for the transition to minimal consciousness and explore the far reaching biological psychological and philosophical implications After presenting the historical neurobiological and philosophical foundations of their analysis Ginsburg and Jablonka propose that the evolutionary marker of basic or minimal consciousness is a complex form of associative learning which they term unlimited associative learning UAL UAL enables an organism to ascribe motivational value to a novel compound non reflex inducing stimulus or action and use it as the basis for future learning Associative learning Ginsburg and Jablonka argue drove the Cambrian explosion and its massive diversification of organisms Finally Ginsburg and Jablonka propose symbolic language as a similar type of marker for the evolutionary transition to human rationality to Aristotle s rational soul

Personalities on the Plate Barbara J. King,2017-03-07 In recent years scientific advances in our understanding of animal minds have led to major changes in how we think about and treat animals in zoos and aquariums The general public it seems is slowly coming to understand that animals like apes elephants and dolphins have not just brains but complicated inner and social lives and that we need to act accordingly Yet that realization hasn t yet made its presence felt to any great degree in our most intimate relationship with animals at the dinner table Sure there are vegetarians and vegans all over but at the same time meat consumption is up and meat remains a central part of the culinary and dining experience for the majority of people in the

developed world With Personalities on the Plate Barbara King asks us to think hard about our meat eating and how we might reduce it But this isn't a polemic intended to convert readers to veganism What she is interested in is why we've not drawn food animals into our concern and just what we do know about the minds and lives of chickens cows octopuses fish and more Rooted in the latest science and built on a mix of firsthand experience including entomophagy which yes is what you think it is and close engagement with the work of scientists farmers vets and chefs Personalities on the Plate is an unforgettable journey through the world of animals we eat Knowing what we know and what we may yet learn what is the proper ethical stance toward eating meat What are the consequences for the planet How can we live an ethically and ecologically sound life through our food choices We could have no better guide to these fascinatingly thorny questions than King whose deep empathy embraces human and animal alike Readers will be moved provoked and changed by this powerful book What the Chicken Knows Sy Montgomery, 2024-11-05 A charming and eye opening exploration of the special relationship between humans and chickens from Sy Montgomery one of our finest chroniclers of the natural world The New York Times For more than two decades Sy Montgomery whose *The Soul of an Octopus* was a National Book Award finalist has kept a flock of chickens in her backyard Each chicken has an individual personality outgoing or shy loud or quiet reckless or cautious and connects with Sy in her own way In this short delightful book Sy takes us inside the flock and reveals all the things that make chickens such remarkable creatures only hours after leaving the egg they are able to walk run and peck relationships are important to them and the average chicken can recognize more than one hundred other chickens they remember the past and anticipate the future and they communicate specific information through at least twenty four distinct calls Visitors to her home are astonished by all this but for Sy what's more astonishing is how little most people know about chickens especially considering there are about twenty percent more chickens on earth than people With a winning combination of personal narrative and science *What the Chicken Knows* is exactly the kind of book that has made Sy Montgomery such a beloved and popular author **Braille Book Review** ,2016 **Talking Book Topics** ,2016 **Summary of Sy Montgomery's *The Soul of an Octopus*** Everest Media, 2022-04-16T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 I wanted to meet the octopus I wanted to touch an alternate reality I wanted to explore a different kind of consciousness if such a thing exists Is it anything like being a human 2 The giant Pacific octopus is one of the fastest growing animals on the planet It can grow both longer and heavier than a man in three years It is also one of the most dangerous animals in the aquarium 3 Athena's suckers were extremely intimate and she was pulling me steadily into her tank I would not fit because my bones and joints would not allow me to go with her 4 The giant Pacific octopus is not as big as it used to be The largest octopus listed by The Guinness Book of Records weighed 300 pounds and had an arm span of 32 feet *The Congregationalist and Christian World* ,1910 *The Prose and Poetry Series* John R. Barnes, Harriet Marcelia Lucas, Elizabeth Frances Ansorge, Donald Maclean Tower, 1941 Time Briton Hadden, 1962 **The Father's Almanac**,

Revised St. Clair Adams Sullivan,1992 **Books Out Loud** ,2004 The New York Times Book Review ,1970 *How Many People are There in My Head?* Jonathan Charles Wright Edwards,2006 This book proposes that the only possible solution to the mind brain problem is that each nerve cell is conscious separately and that people have no other global consciousness **The New York Times Index** ,2005 *New Art Examiner* ,1986 The independent voice of the visual arts
