

Accounting for the Sources of Economic Growth

- Production Function (CRTS)**

$$Y = F(K, L)$$

- Increases in Capital and Labor**

$$\Delta Y = (MPK \times \Delta K) + (MPL \times \Delta L)$$

$$\Rightarrow \frac{\Delta Y}{Y} = \frac{MPK \times K}{Y} \frac{\Delta K}{K} + \frac{MPL \times L}{Y} \frac{\Delta L}{L}$$

$$\Rightarrow \frac{\Delta Y}{Y} = \text{Capital's share of output} \frac{\Delta K}{K} + \text{Labor's share of output} \frac{\Delta L}{L}$$

$$\Rightarrow \frac{\Delta Y}{Y} = \alpha \frac{\Delta K}{K} + (1 - \alpha) \frac{\Delta L}{L}$$

where α is capital's share and $(1 - \alpha)$ is labor's share.

Denison,Committee for Economic Development,1962 *The Sources of Economic Growth in India 1950-1 to 1999-2000* S. Sivasubramonian,2004 This book contains detailed empirical data on the sources of economic growth in India since it gained independence over 50 years ago This is an invaluable compilation of very useful data for researchers and policy makers **The Causes of Economic Growth** Rick Szostak,2009-03-02 What are the causes of economic growth As billions of people still live in poverty this is perhaps the most important question in human science It is also a very complex one as rates of economic growth are influenced by a multitude of economic as well as political geographical and sociological factors This books attempts to advance a nuanced understanding of the process of economic growth by synthesizing the insights of several social science disciplines Different theories and methods employed by economists and other social scientists to study the causes of economic growth are analyzed and it is shown how and why those insights should be integrated by applying best practice techniques of interdisciplinary analysis Scholars and practitioners are thus provided with a wide array of potential strategies for encouraging growth as well as guidance on how these strategies may interact **The Sources of Economic Growth in OECD Countries** Stefano Scarpetta,2003 What makes some countries seemingly able to thrive on new technological opportunities while others are held back **Sources of Economic Growth** Mr.Abdelhak Senhadji,1999-06-01 A growth accounting exercise is conducted for 88 countries for 1960 94 to examine the source of cross country differences in total factor productivity TFP levels Two differences distinguish this analysis from that of the related literature First the critical technology parameter the share of physical capital in real output is econometrically estimated and the usual assumption of identical technology across regions is relaxed Second while the few studies on the determinants of cross country differences in TFP have focused on growth rates of real output this analysis is on levels Recent theoretical as well as empirical arguments point to the level of TFP as the more relevant variable to explain

On the Causes of Economic Growth Carlos Sabillon,2008 What s the secret Can policies grow the economy How do leaders make their countries prosper Since the earliest of times humans have endeavored to uncover the causes of prosperity Step by step Sabillon tests the principal theories on the causes of economic growth against the facts of history Here for the first time the economic statistics of the world are presented in a rationalized format that allows for an easy comparison across countries and through time with a challenge to those who study them What do the

statistics show and what are the trends beyond cherished theories that suit various political purposes Tested against the historical data textbook ideas and theories consistently come up short Such analyses are highly troubling because they reveal an absence of correlation between theory and reality The data statistics illustrating the development of the world economy during the last several centuries was extracted from economic history and economic history books from publications of the World Bank the Organization for Economic Cooperation and Development the International Monetary Fund the World Trade Organization the United Nations specialized agencies research institutes and country statistical publications and other books and journals Analyzing the data over geography and time Sabillon concludes that contrary to contemporary wisdom left to market forces alone the economy will not and does not flourish Only decisive intervention in support of manufacturing and technological advancement can provide growth This systematic review of history and test of accepted dogma challenges economic theorists to consider one part of the equation of economic policy that has been wiped off the blackboard in today's politically correct debates

The Sources of Economic Growth in OECD Countries Organización para la Cooperación y el Desarrollo Económicos, 2003 Productivity in the U.S. Services Sector Jack E. Triplett, Barry P. Bosworth, 2004-09-21 The services industries which include jobs ranging from flipping hamburgers to providing investment advice can no longer be characterized as they have in the past as a stagnant sector marked by low productivity growth They have emerged as one of the most dynamic and innovative segments of the U S economy now accounting for more than three quarters of gross domestic product During the 1990s 19 million additional jobs were created in this sector while growth was stagnant in the goods producing sector Here Jack Triplett and Barry Bosworth analyze services sector productivity demonstrating that fundamental changes have taken place in this sector of the U S economy They show that growth in the services industries fueled the post 1995 expansion in the U S productivity and assess the role of information technology in transforming and accelerating services productivity In addition to their findings for the services sector as a whole they include separate chapters for a diverse range of industries within the sector including transportation and communications wholesale and retail trade and finance and insurance The authors also examine productivity measurement issues chiefly statistical methods for measuring services industry output They highlight the importance of making improvements within the U S statistical system to provide the more accurate and relevant measures essential for analyzing productivity and economic growth
