The Spirit Of Education:

Education in Search of the Spirit John Fentress Gardner, 1996 Real education will always seek to strengthen what is best in the human soul its longing for the experience of spiritual truth that brings into the self an objective appreciation of the noble aspects of its own nature together with a subjective sense of real affinity with the rest of humanity the earth planet as a whole and the great cosmos above and beyond The premise of this book is that a human being is a being of body soul and spirit whose core is eternal spirit from which center one should strive to live From this perspective the aim of true education is to help our children activate this deepest center in themselves For this living intuitive thinking must be brought to life in a new way The organ for such thinking is the heart where will and feeling join in uniting self and world morality and truth love and action This book is in three parts The first poses the problem the second describes the Waldorf approach as a solution and the third deals with questions of special interest to parents and educators alike such as authority discipline and freedom the nature of genius and the question of cultural pluralism The first edition of this book was titled *The Experience of Knowledge* in response to a clear call for experience in education Certainly if the sole purpose of education is to acquire information learning becomes dry abstract and deadening To have meaningful consequence in a person's life coming to know must become an experience Too often however such experience is understood simply as doing field trips class projects and so on But doing if unconnected to the whole person is just activity To become true experience it must speak out of and toward a student's secret center the spirit Hence the author affirms that authentic education is always in search of the spirit *The Spirit of Education*, 1868 **The Spirit of Education** E. M. McCarthy, Amable Béseau, 2024-05-05 **The Spirit of Education** Jeff White, 2006 What is education It's a term we use every day to describe the process of putting 25 or 30 young souls into a cinder block room and filling their heads with what all over the course of the first quarter of their lives But is that education If it's not what is it And what are its consequences Education true education is not a process of pouring in from without but of calling forth what is within It's not a process of memorization or socialization or instillation but a process of nurturing of allowing of evoking It's a process of bringing forth the person one is meant to be *The Spirit of Education* attempts to begin anew our conversations about education what it is and where it might take us **Killing the Spirit** Page Smith, 1990 History of higher education in America and an exploration of tenure publish or perish and other controversial issues **The Spirit of Education (Classic Reprint)** Amable Beesau, 2015-07-08 Excerpt from *The Spirit of Education* The volume of which an English translation is now for the first time offered has for some years been considered at once the most eloquent and the most practical treatise upon education in the French language The long experience of the author his earnest piety and his felicity of illustration rendered him eminently fit to prepare a volume to which Catholics might look with confidence and which they can not fail to read with interest and profit In these days of rapid change and almost morbid mental activity we can not too zealously guard the education of our children and the translator feels sure she offers to the
