

A stylized, abstract illustration of a staircase. The stairs are depicted with broad, flat planes of color in shades of brown, tan, and grey, creating a sense of depth and movement. A prominent, curved, light-colored balustrade or handrail sweeps across the middle of the frame. In the lower left, there is a decorative, circular, lattice-like pattern. In the lower right, a dark, shadowy figure is visible, possibly a person or a creature, adding a mysterious element to the scene. The overall style is graphic and architectural.

Human Behavior Theory and Applications Elizabeth DePoy, Stephen French Gilson, 2011-09-21 In Human Behavior Theory and Applications authors Elizabeth DePoy and Stephen Gilson use a critical thinking approach to engage students to think in depth about theory and its use in social work practice With a strong focus on diversity this book expands its theory coverage to include progressive and the most cutting edge contemporary thinking The authors skillfully introduce theory critically examine each theory including developmental theories environmental theories diversity theories systems theories and new and emerging theories and then apply each theory to social work practice providing a synthesis of classical and contemporary theory for scholarly analysis and application to professional intellectual and social action Small Things

Considered Henry Petroski, 2004-09-14 Why has the durable paper shopping bag been largely replaced by its flimsy plastic counterpart What circuitous chain of improvements led to such innovations as the automobile cup holder and the swiveling vegetable peeler With the same relentless curiosity and lucid witty prose he brought to his earlier books Henry Petroski looks at some of our most familiar objects and reveals that they are in fact works in progress For there can never be an end to the quest for the perfect design To illustrate his thesis Petroski tells the story of the paper drinking cup which owes its popularity to the discovery that water glasses could carry germs He pays tribute to the little plastic tripod that keeps pizza from sticking to the box and analyzes the numerical layouts of telephones and handheld calculators Small Things Considered is Petroski at his most trenchant and provocative casting his eye not only on everyday artifacts but on their users as well **The**

Architectural Model Matthew Mindrup, 2019-10-08 An investigation of different uses for the architectural model through history as sign souvenir funerary object didactic tool medium for design and architect's muse For more than five hundred years architects have employed three dimensional models as tools to test refine and illustrate their ideas But as Matthew Mindrup shows the uses of physical architectural models extend beyond mere representation An architectural model can also simulate instruct inspire and generate architectural designs It can be among other things sign souvenir toy funerary object didactic tool medium or muse In this book Mindrup surveys the history of architectural models by investigating their uses both theoretical and practical Tracing the architectural model's development from antiquity to the present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti's dictum that models be simple lest they distract from the architect's ideas analyzing the model as a generative tool and investigating allegorical analogical and anagogical interpretations of models Mindrup's histories show how the model can be a surrogate for the architectural structure itself or for the experience

of its formal tactile and sensory complexity and beyond that that the manipulation play experimentation and dreaming enabled by models allow us to imagine architecture in new ways

Questioning Architectural Judgment Steven A. Moore, Barbara B. Wilson, 2013-07-24 The book shines light on the problem of judgment particularly in the realm of architectural technics and the codes that regulate it The struggle to define sustainability and thus judge architecture through such lenses is but one dimension of the contemporary problem of judgment By providing the reader with an inherently interdisciplinary study of a particular discipline architecture it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline By situating architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded The authors are winners of the EDRA Place Research Award 2014 for their work on the Green Alley Demonstration Project used in the book

Monuments Decolonized Susan Slyomovics, 2024-07-23 Statuomania overtook Algeria beginning in the nineteenth century as the French affinity for monuments placed thousands of war memorials across the French colony But following Algeria's hard fought independence in 1962 these monuments took on different meaning and some were repatriated to France legally or clandestinely Today in both Algeria and France people are moving and removing vandalizing and preserving this contested yet shared monumental heritage Susan Slyomovics follows the afterlives of French built war memorials in Algeria and those taken to France Drawing on extensive fieldwork in both countries and interviews with French and Algerian heritage actors and artists she analyzes the colonial nostalgia dissonant heritage and ongoing decolonization and iconoclasm of these works of art Monuments emerge here as objects with a soul offering visual records of the colonized Algerian native the European settler colonizer and the contemporary efforts to engage with a dark colonial past Richly illustrated with more than 100 color images Monuments Decolonized offers a fresh aesthetic take on the increasingly global move to fell monuments that celebrate settler colonial histories

Sensory Design Joy Monice Malnar, 2004 Malnar architecture U of Illinois Urbana Champaign and Vodvarka fine arts Loyola U Chicago explore the nature of sensory response to the spatial constructs that people invest with meaning ranging from buildings of various sorts and purposes to gardens to constructions of fantasy These responses can serve as a typology for the design of space

History and Context in Comparative Public Policy Douglas E. Ashford, 2010-11-23 Douglas E. Ashford joins a growing number of scholars who have questioned the behaviorist assumptions of much policy science The essays in this volume show why policy analysis cannot be confined to prevailing methods of social science Policy making behavior involves historical contextual and philosophical factors that also raise critical questions about the concepts and theory of the discipline Ashford asks difficult questions about the contextual conjunctural and unintentional circumstances that affect

actual decision making His bridging essays summarize opposing viewpoints and conflicting interpretations to help form a new agenda for comparative policy analysis

Staircases James W. P. Campbell, Michael Tutton, 2013-11-07 The staircase dates back to the very beginning of architectural history Virtually every significant building from the ziggurats of ancient Mesopotamia to the present day has not only contained one or more staircases but has celebrated them For such an apparently simple part of a building they have been made in a bewildering variety of forms and from a wide range of materials Every age has sought to out perform the previous to produce ever more spectacular and gravity defying designs Staircases History Repair and Conservation is the first major reference volume devoted entirely to the understanding of staircases and the issues surrounding their repair and conservation Each chapter has been especially written by experts in their respective fields The book is essential reading for professionals and anyone with an interest in staircases It deals with the history dating archaeology surveying and recording engineering curating repair and conservation of the staircase in a single volume No other book offers such a wide range of detail The book is divided into three parts Part 1 covers the history development identification and dating of staircases providing detailed drawings and photographs and an introduction to the scientific techniques available to enable the accurate dating of staircases Part 2 covers the design engineering and maintenance of the staircase giving a clear guide to the latest research into the design of safe staircases and their structural stability Part 3 focuses on the materials commonly used to make stairs detailing the appropriate techniques for their conservation and repair The result is a comprehensive study encompassing considerable and far reaching research which aims to inform our understanding and advance the scholarship of the subject for years to come
