The Science of Neurolearning from Neurobiology to Education Seren Gülşen GÜRGEN, Hasan KAZDAĞLI, 2024-10-16

The Oxford Handbook of Deaf Studies in Learning and Cognition Marc Marschark, Harry Knoors, 2020-04-15

In recent years the intersection of cognitive psychology developmental psychology and neuroscience with regard to deaf individuals has received increasing attention from a variety of academic and educational audiences Both research and pedagogy have addressed questions about whether deaf children learn in the same ways that hearing children learn how signed languages and spoken languages might affect different aspects of cognition and cognitive development and the ways in which hearing loss influences how the brain processes and retains information There are now a number of preliminary answers to these questions but there has been no single forum in which research into learning and cognition is brought together The Oxford Handbook of Deaf Studies in Learning and Cognition aims to provide this shared forum focusing exclusively on learning cognition and cognitive development from theoretical psychological biological linguistic social emotional and educational perspectives Each chapter includes state of the art research conducted and reviewed by international experts in the area Drawing this research together this volume allows for a synergy of ideas that possesses the potential to move research theory and practice forward

Intelligence of Apes and Other Rational Beings Duane M. Rumbaugh, David A. Washburn, 2008-10-01

What is animal intelligence In what ways is it similar to human intelligence Many behavioral scientists have realized that animals can be rational can think in abstract symbols can understand and react to human speech and can learn through observation as well as conditioning many of the more complicated skills of life Now Duane Rumbaugh and David Washburn probe the mysteries of the animal mind even further identifying an advanced level of animal behavior emergents that reflects animals natural and active inclination to make sense of the world Rumbaugh and Washburn unify all behavior into a framework they call Rational Behaviorism and present it as a new way to understand learning intelligence and rational behavior in both animals and humans Drawing on years of research on issues of complex learning and intelligence in primates notably rhesus monkeys chimpanzees and bonobos Rumbaugh and Washburn provide delightful examples of animal ingenuity and persistence showing that animals are capable of very creative solutions to novel challenges The authors analyze learning processes and research methods discuss the meaningful differences across the primate order and point the way to further advances enlivening theoretical material about primates with stories about their behavior and achievements

What Makes Humans Unique Michael Robbins, 2023-09-08 Through an integrated multi disciplinary theory Michael Robbins proposes that the human mind consists of two mental structures the one we share with other animate creatures and a capacity for reflective representational thought which is unique As an alternative to Freud's model of the human mind as structured by the id ego and superego this book contends that the prolonged period of post natal immaturity otherwise known as neoteny which is specific to humans gives rise to reflective representational thought that in turn allows for the acquisition of complex knowledge Robbins examines how Freud's conception of the human mind was limited by his ignorance of the related disciplines of sociology primatology cultural anthropology and most notably evolution which were then in their infancy to explore the implications of the non unitary nature of the human mind for us as individuals as a society and for our future as a species Drawing on a broad range of influences from psychoanalysis to anthropology biology psychology sociology and politics this book will be of interest to students and scholars of these disciplines alike

Boles, 2022-07-18 Cognitive Evolution provides an in depth exploration of the natural history of cognition from the beginning of life on Earth to present day humans Drawing together evolutionary comparative and neuroscience research the book brings a unique cognitive perspective to evolutionary psychology The second edition features the latest research and illustrations on emerging topics making it a true update of the field After introducing evolution Boles adopts an information processing perspective from inputs to outputs with all the mental processes in between to provide a systematic overview of the evolution of cognition including its sensory motoric perceptual and cognitive components The combination of evolutionary comparative and neuroscience perspectives provides an insight on topics like vision handedness tools and planning spatial perception pattern recognition memory language and consciousness Cognitive Evolution is a comprehensive essential read for advanced undergraduate and postgraduate students of cognitive and evolutionary psychology Researchers will find it a useful and insightful synthesis of the field yet even the curious public will find in it much that is surprising and enlightening

The Human Difference Michael Robbins, 2023-10-02 From a multidisciplinary perspective grounded in psychoanalysis this book explores the manifestations of mind that distinguish humans from other species culture civilization and destructiveness Psychoanalysis was created by Freud in an effort to understand neurosis and psychosis the names he gave to individual human destructiveness His understanding was limited and incorrect because the science of evolution and the disciplines of sociology and cultural anthropology were in their infancy when he formulated his ideas He did not comprehend that destructiveness is qualitatively different in humans than in other species and he ignored the problem of how biological instincts become mental processes These limitations left psychoanalysis with one of its most perplexing unsolved problems the mysterious leap from mind to body This book explains how neoteny the prolonged period of postnatal

immaturity that distinguishes humans from other animals requires and enables complex learning from caregivers. It is the knowledge acquired from this learning and its intergenerational transmission that links the biological theory of evolution with the psychosocial theory of psychoanalysis and explains how the human species is unique. This book will be of interest to those who want to learn about how integrating the findings of evolutionary science, primatology, sociology, and cultural anthropology with the theory of psychoanalysis expands our understanding of what makes humans unique and its implications for the future of our species and how it empowers us to influence the destiny of humankind. **Occupational Therapy**

Charles H. Christiansen, Julie Bass, Carolyn M. Baum, 2024-06-01. Occupational Therapy: Performance, Participation, and Well-Being, Fourth Edition, is a comprehensive occupational therapy text that introduces students to core knowledge in the profession and the foundations of practice. The occupations, person factors, and environment factors that support performance, participation, and well-being. Editors Drs. Charles H. Christiansen, Carolyn M. Baum, and Julie D. Bass are joined by more than 40 international scholars who bring students, faculty, and practitioners the evidence that supports occupational therapy practice. The PEOP Model, 4th Edition, is featured as an exemplar of a person-environment-occupation model and provides a valuable roadmap for understanding key concepts and developing strong clinical reasoning skills in the occupational therapy process. Features: Examines the theories, models, frameworks, and classifications that support contemporary knowledge of person, environment, and occupational factors. Presents detailed chapters on the occupations of children and youth, adults, older adults, organizations, and populations. Provides extensive coverage of the person factors: psychological, cognition, sensory, motor, physiological, spirituality, and environment factors; culture; social; physical; policy; technology that support occupational performance. Includes exceptional content on the essentials of professional practice: therapeutic use of self, evidence-based practice, professionalism, lifelong development, ethics, business fundamentals, and critical concepts. Builds clear links with the AOTA's Occupational Therapy Practice Framework, Third Edition, International Classification of Functioning, Disability, and Health, and accreditation standards for entry-level occupational therapy programs. Introduces emerging practice areas of self-management, community-based practice, technology, and teaching/learning and opportunities to work with organizations and populations. Incorporates international and global perspectives on core knowledge and occupational therapy practice. Documents assessments, interventions, resources, and evidence in user-friendly tables. Uses simple and complex cases to illustrate key concepts and ideas. New and Updated Sections in the Fourth Edition: Individual chapters on each person factor and environmental factor and occupations across the lifespan. Expanded coverage of approaches for organizations and populations and entry-level professional skills. Consistent framework of tables and language across chapters and sections. Included with the text are online supplemental materials for faculty use in the classroom, including PowerPoint presentations.

Animal Bodies, Human Minds: Ape, Dolphin, and Parrot Language Skills W.A. Hillix, Duane Rumbaugh, 2013-04-17. Several books chronicle attempts, most of them during the last 40 years, to teach animals to communicate with people in a

human designed language These books have typically treated only one or two species or even one or a few research projects We have provided a more encompassing view of this field We also want to reinforce what other authors for example Jane Goodall Sue Savage Rumbaugh Penny Patterson Birute Galdikas and Roger and Deborah Fouts so passionately convey about our responsibility for our closest animal kin This book surveys what was known or believed about animal language throughout history and prehistory and summarizes current knowledge and the controversy around it The authors identify and attempt to settle most of the problems in interpreting the animal behaviours that have been observed in studies of animal language ability

Autism and Gender Jordynn Jack, 2014-05-15 The reasons behind the increase in autism diagnoses have become hotly contested in the media as well as within the medical scholarly and autistic communities Jordynn Jack suggests the proliferating number of discussions point to autism as a rhetorical phenomenon that engenders attempts to persuade through arguments appeals to emotions and representational strategies In *Autism and Gender: From Refrigerator Mothers to Computer Geeks* Jack focuses on the ways gender influences popular discussion and understanding of autism's causes and effects She identifies gendered theories like the refrigerator mother theory for example which blames emotionally distant mothers for autism and the extreme male brain theory which links autism to the modes of systematic thinking found in male computer geeks Jack's analysis reveals how people employ such highly gendered theories to craft rhetorical narratives around stock characters fix it dad's heroic mother warriors rescuing children from autism that advocate for ends beyond the story itself while also allowing the storyteller to gain authority understand the disorder and take part in debates *Autism and Gender* reveals the ways we build narratives around controversial topics while offering new insights into the ways rhetorical inquiry can and does contribute to conversations about gender and disability
