The Sunspacers Trilogy George Zebrowski, 2001-07-01 The Sunspacers Trilogy is a trio of novels of an alternate earth based civilization Sunspacer Young and idealistic philosophy student Joe Sorby must come to terms with adulthood while negotiating the gross injustices of interplanetary commerce In Stars Will Speak an alien signal is broadcast from the farthest reaches of the known galaxy but will the scientists of earth decipher its warning in time In Behind the Stars young Max Sorby returns to earth after spending all of his life on a mobile space habitat fearing that the only home he has ever known will be lost to him forever **Behind the Stars** George Zebrowski, 2012-06-11 Part three of the Sunspacers trilogy Young Max Sorby returns to Earth after spending all of his life on a mobile space habitat fearing that the only home he has ever known will be lost to him forever

**The Stars Will Speak** George Zebrowski, 2012-06-11 When the first alien communication signal reaches our solar system in the twenty first century Lissa leaves the safety of her artificial planet and joins those trying to decode the message *Swift Thoughts* George Zebrowski, 2014-04-01 This collection of stories showcases the work of George Zebrowski one of science fiction s masters and a writer Hugo and Nebula Award winner Robert J Sawyer has called one of the most philosophically astute writers in science fiction Like the writers Olaf Stapledon Arthur C Clarke and Stanislaw Lem Zebrowski explores the big questions the expansion of human horizons and the growth of power over our lives and the world in which we live In the title story scientists push the boundaries of human mentality to keep pace with ever evolving AIs In The Eichmann Variations a finalist for the Nebula Award exact copies of captured Nazi war criminal Adolf Eichmann stand trial for his crimes against humanity while in The Word Sweep all speech must be rationed because spoken words take on physical form In Wound the Wind another Nebula Award finalist unchanged humans roam freely until captured by those who know what s best for them and in Stooges a visiting alien hijacks the persona of Curly Howard From hard science fiction G del s Doom to alternate history Lenin in Odessa to first alien contact Bridge of Silence and with an introduction by renowned physicist writer Gregory Benford this collection presents one of the most distinctive voices writing in the field of science fiction today **Empties** George Zebrowski, 2014-04-01 A detective discovers bodies without brains and wonders if he s losing his mind in this tale of nightmarish terror What do you tell yourself when impossible things begin to happen What can you say You re a police detective but maybe you re just not good enough and that s what you have to

admit whether you like it or not You see evidence of things that can't be real but you just don't observe well enough to explain it in any natural way Can you ask rational questions and still be crazy Does it help any that you know your mind is gone You're trapped in a black comedy with a beautiful but fatal woman right out of an old poem by Keats hoping to wake up from the nightmare even if on a cold hillside as long as you wake up sane Detective William Benek is faced with an impossible crime bodies are turning up without their brains and without any indication of how the organs were removed His only lead an attractive woman becomes more than a lead and then drives him into a world of terror where his sanity is questioned and he must stop a monster he can barely comprehend Listed as a Best Book of 2009 by Edge Boston **In the Distance, and Ahead in Time** George Zebrowski, 2015-05-19 The ten stories of this collection present glimpses of our near middle and far futures Heathen God the author's first Nebula Award finalist reveals the consequences of learning that our solar system may have been engineered by an alien race In the Distance and Ahead in Time and Wayside World depict the rediscovery of a ruined Earth's interstellar colonies by a new culture of mobile habitats In Transfigured Night and Between the Winds we enter two possible destinies as we tamper with human reality and humankind mutates into vastly different offshoots

**Brute Orbits** George Zebrowski, 2014-04-01 Like his previous tales of technocratically engineered futures Macrolife Stranger Suns etc Zebrowski's latest evokes the pioneering SF of social philosopher Olaf Stapledon In the 21st century Earth incarcerates its undesirables in mined out asteroids launched into new orbits for the duration of their sentences This use of distance as a better prison wall is more than just an ingenious application of technology to the penal system it's also a convenient trick for disposing of the socially misfit since orbits are accidentally miscalculated to prevent their return The narrative follows the histories of several of these rocks as their prisoners fight unite and ultimately set out to create superior self-contained cultures free of the taint of earthly ways Individual asteroids house specific groups of offenders ranging from hardened convicts to sexual deviants juvenile delinquents and unwanted foreigners Zebrowski argues his points with conviction Publishers Weekly A brilliant and dramatic philosophical reflection on the nature of society technology and humanity itself Zebrowski is a deep thinker who writes about the big questions in the grand tradition of Wells Stapledon and Clarke Jack M Dann award winning author of The Silent and The Memory Cathedral High Crimes Call for High Punishment It is the twenty-first century Convicts are sentenced to asteroids that move in ever widening solar orbits timed to return when their terms run out But a few ambitious administrators discover that small errors in velocity can rid them of selected groups altogether the hardcore violent the mentally defective and especially the political dissidents Enduring the black void of interstellar space time these human rejects men and women mixed together create their own Darwinian societies struggling to survive Back on Earth a handful of sympathetic and curious scientists have not forgotten these lost citizens When a technological breakthrough makes it possible to overtake these scattered asteroids a courageous team sets out to go where none has willingly gone before What they discover in these brute orbits is both provocative and moving a startling vision of
