The Sustainable Learning Community The Sustainable Learning Community:

The Sustainable Learning Community John D. Aber, Tom Kelly, Bruce L. Mallory, 2009 Case studies from the University of New Hampshire explore all the dimensions of sustainability in campus life combining frugality and creativity **Bringing Your Learning Community to Life** Stephen S. Kaagan, Linda Headley, 2010-02-09 How can you take the concept of a professional learning community from theory to the school building This how to guide walks you through the process of establishing a PLC step by step over a flexible timeline of nine to twelve months Sustainable Improvement Coral Mitchell, Larry Sickney, 2019-02-11 Drawing on two decades of research into the nature of schools as learning communities the authors build on a prior model of learning communities that integrated three domains of capacity personal interpersonal and organizational In this text the authors move the capacity building model into practice and elaborate a theory of learning communities This book situates learning communities in living systems and ecological perspectives The fundamental premise is that all of human life and human activity is part of a deep planetary ecology of which mutuality and interdependence are cornerstone properties learning and renewal are key processes and emergent networks are foundational structures The text juxtaposes these conceptions with educational practices in order to understand what makes practice different in learning community schools The authors argue that sustainable educational improvement emerges from a reciprocal process of building people who are constantly learning building commitments to authentic learning and building schools with a relentless focus on learning The authors conclude that building a sustainable learning community requires a profound shift in how learning is understood discussed valued enabled and expressed This shift they argue is essential as schools face the challenges and opportunities in the knowledge society *Lesson Study for Learning Community* Eisuke Saito, Masatsugu Murase, Atsushi Tsukui, John Yeo, 2014-09-25 Lesson Study has been actively introduced from Japan to various parts of the world starting with the US Such introduction is heavily connected with a focus on mathematics education and there is a strong misconception that Lesson Study is only for mathematics or science The introduction is usually done at the departmental or form level and there has been a strong question about its sustainability in schools This book comprehensively explores the idea of Lesson Study for Learning Community LSLC and suggests that reform for the culture of the school is needed in order to change learning levels among the children teachers and even parents In order for this to happen the ways of management and leadership are also included as objectives of LSLC as are practices at the classroom level It argues that LSLC is a comprehensive vision and framework of school reform and needs to be taken up in a holistic way across disciplines Chapters include How to Create Time How to Build the Team How to Promote Reform How to Reform Daily Lessons How to Conduct a Research Lesson How to Discuss Observed Lessons How to Sustain School Reform based on LSLC Strong interest in LSLC is already prevalent in Asian countries such as Japan China Korea Taiwan Indonesia Vietnam and Singapore and is now being introduced more in the west This book will be of great interest to those involved in education

policy and reform and for practitioners of education at all levels Professional Learning in Higher Education and Communities O. Zuber-Skerritt, M. Fletcher, J. Kearney, 2015-02-05 By integrating neuroscience and social science this book introduces a bold new vision of Participatory Action Learning and Action Research PALAR The authors explain and enhance the art of action research through PALAR as a philosophy methodology and theory of learning and as a facilitation process for professional learning and social justice Organization Development Interventions on Chinese Language Learners: A Learning Community Perspective Ling Li, 2024-07-29 This book focuses on the interface of organizational development and language learning using mixed methods of qualitative reflective journals and quantitative analysis experimental design pre and post testing exam scores and questionnaires Employing organizational development interventions ODIs in the context of language learning enriches the diversity and expands the possibilities of higher education The action research cycle employed in the three semester ODI process offers readers a source of inspiration As the book shows the combination of ODI techniques with language learning strategies in a learning community can be both effective and efficient holding great potential for further research **Information Computing and Applications, Part II** Chunfeng Liu, Jincai Chang, Aimin Yang, 2011-12-22 The two volume set CCIS 243 and CCIS 244 constitutes the refereed proceedings of the Second International Conference on Information Computing and Applications ICICA 2010 held in Qinhuaingdao China in October 2011 The 191 papers presented in both volumes were carefully reviewed and selected from numerous submissions They are organized in topical sections on computational statistics social networking and computing evolutionary computing and applications information education and application internet and web computing scientific and engineering computing system simulation computing bio inspired and DNA computing internet and Web computing multimedia networking and computing parallel and distributed computing International Handbook of Education for the Changing World of Work Rupert Maclean, David Wilson, 2009-06-29 The aim of this Handbook is to review the developments that have occurred in Technical and vocational education and training TVET and that may help improve the field The Handbook provides information on TVET models that occur in different parts of the world reflects best and innovative practice and wherever possible uses case studies as examples The 220 authors are representative of the various regions of the world and major international organisations involved in TVET This volume presents the work of established researchers as well as the work of promising young researchers Intended as the universally accepted resource for the field the Handbook provides a comprehensive coverage of cutting edge developments in research policy and practice in TVET within a single source It will assist those involved in TVET at any level in making informed decisions and further advance and improve the field and to bridge the gap between vocational and academic education in the 21st century *International Handbook of Educational Evaluation* T. Kellaghan, D.L. Stufflebeam, 2012-12-06 Thomas Kellaghan Educational Research Centre St Patrick s College Dublin Ireland Daniel L Stufflebeam The Evaluation Center Western Michigan University MI USA Lori A Wingate The Evaluation Center

Western Michigan University MI USA Educational evaluation encompasses a wide array of activities including student assessment measurement testing program evaluation school personnel evaluation school accreditation and curriculum evaluation It occurs at all levels of education systems from the individual student evaluations carried out by class room teachers to evaluations of schools and districts to district wide program evaluations to national assessments to cross national comparisons of student achievement As in any area of scholarship and practice the field is constantly evolving as a result of advances in theory methodology and technology increasing globalization emerging needs and pressures and cross fertilization from other disciplines The beginning of a new century would seem an appropriate time to provide a portrait of the current state of the theory and practice of educational evaluation across the globe It is the purpose of this handbook to attempt to do this to sketch the international landscape of educational evaluation its conceptualizations practice methodology and background and the functions it serves The book's 43 chapters grouped in 10 sections provide detailed accounts of major components of the educational evaluation enterprise Together they provide a panoramic view of an evolving field

Building Inclusive Communities through Education and Learning Klara Skubic Ermenc, Borut Mikulec, 2019-08-22 The book addresses the complex relationships among learning education and the community It examines the significance of the community for the individual's development and the potential that learning and education have for the development of the community The volume gathers together the findings of a number of quantitative and qualitative studies conducted on different samples theoretical discussions set in comparative international contexts Although the studies employ Slovenian samples and analyse situations in this country the contributions address issues that are of concern to the global research community Moreover they respond to international debates and engage in the dialogue between the local partial and the global universal The book is unique in its embeddedness in the intellectual continental European tradition that has been characterised by the failed historical experience of attempting collective unity through the community understood as a common identity in former Yugoslavia

The Creation of a Professional Learning Community for School Leaders Amalia Humada- Ludeke, 2013-09-03 The unwavering culture of continuous improvement efforts to bring about school change has irrevocably changed the role expectations for the school leader The school leader in the 21st century is increasingly perceived as an instructional leader expected to implement whole school reform models that can shape teacher practice and influence student outcomes The significant changes in role expectations for school leaders present considerable challenges to an educational system that was not designed to incorporate these conceptualizations In light of the increased acceptance of changed leadership expectations the elements that are needed for developing supporting and sustaining instructional leaders who can lead systemic change efforts are frequently not present are fragmented or are observed at various developmental stages throughout the PK-20 pipeline This book is centered on the learning and changed behaviors of school leaders who engaged in a sustained job embedded professional learning community facilitated through a university district partnership

The learning from the findings suggested that job embedded learning with their peers can be instrumental for these principals to build the capacity to lead systemic change efforts The findings further suggested that creating conditions for new understanding to occur and sustained opportunities to apply new learning in context to their role entailed a collaborative effort by a partnership involving two separate institutions with different priorities The author makes a case for the educational pipeline to prioritize the support and understanding of complex systemic change efforts and innovations as they are linked to school improvement Green Education Julie Newman,2011-06-28
