Educational Inequality (RLE Edu L) William Tyler,2012-05-16 What is the most significant factor for explaining why some individuals are more successful than others genetic inheritance privileged background or luck Although conventional approaches stress the prime importance of one of these Tyler argues that such theories fail to deal adequately with the complexity of educational inequality and suggests that Boudon s model of opportunity and mobility would provide us with a more productive explanation By applying this model to post war British education he shows how we might effectively think our approaches to the cycle of deprivation comprehensive reform and educational spending **Education (RLE Edu L**

Towards Successful Schooling (RLE Edu L Sociology of Education) Hugh Lauder, Cathy Wylie, 2012-05-23 The editors have compiled this critical and comparative study of changes which took place in the New Zealand education system in the second half of the twentieth century For other Western societies who have felt the impact of New Right policies the New Zealand case is interesting because it provides some indication of how policies of decentralization in education might be used to develop egalitarian and democratic educational policies In recent years there have been major changes to educational systems in the Western world Often these changes have been justified by reference to successful educational practices in other countries However it is not always possible simply to abstract educational practices from one context and apply them in another successfully Moreover claims that policies in one country are more successful than those in another have to be treated cautiously there are always problems in making valid comparisons between the educational performances of different countries It is important therefore that critical and comparative studies are made of educational systems which take full account of the contexts in which they are embedded

Educational Theory and Its Foundation Disciplines (RLE Edu K) Paul Hirst,2012-05-04 At the time this book was first published the disciplines of philosophy of education educational psychology sociology of education and the history of education had developed rapidly The papers in this volume outline the developments that took place The first paper analyses the nature of a theory concerned with determining practice and the place of academic disciplines within that What emerges is the crucial role of these disciplines but also the need to develop much more adequately a domain of practical principles assessed and critically reformulated in the light of those disciplines The following papers are concerned with the contributions four of those disciplines are now making

Dilemmas of Schooling (RLE Edu L) Ann Berlak,Harold Berlak,2012-04-27 This study illuminates how the everyday activity of teachers raises profound economic cultural ethical political and research issues and provides a new and fruitful way of examining the practice of teaching The first part of the book offers a detailed description of sensitively recorded school situations arising from work carried out in a number of British primary schools From the analysis of their research the authors constructed a theoretical perspective for looking at schooling in the form of sixteen dilemmas the second half of the book is concerned with this perspective and shows how the dilemmas constitute a language for looking at everyday schooling and relating it to more general political social and cultural issues The book thus spans the gap in educational thinking between work with a firm empirical base and specifically theoretical studies

Curriculum and Culture (RLE: Education) Leslie Claydon,Tony Knight,Marta Rado,2012-05-04 This book demonstrates how it is possible to value respect and utilise cultural diversity and yet achieve a good education for all The authors contend that few issues in education can be examined in isolation from the world outside This must surely apply to the question of cultural social and economic differences among children and this book continually emphasises the importance of a healthy social climate as well as mastery of language literacy and numeracy The book examines different teaching procedures and advises on curriculum construction and content especially the relationships between the teaching and learning of language and teaching and learning in a language In short the authors have examined the why the what and the how of schooling to accommodate educational diversity and have suggested an approach that is constructive and stimulating rather than simply therapeutic

Dependence and Interdependence in Education (RLE Edu A) Keith Watson,2012-05-31 This volume provides an international perspective on educational

dependency in considering both theories and actual developments throughout the world. Some less developed countries in expanding their education systems have emulated Western academic style systems and have increased their dependence on Western models in various respects including examination validation. Others have deliberately avoided this path and have experimented with systems more relevant to development often in a radical way. At a theoretical level, Marxist and neo-Marxist development theorists argue that education systems dependent on the West are evidence of economic dependency and confirmation of Marxist development theories, while others argue that the evidence suggests an interdependent world and that dependency theories do not apply in education.

Education and the Social Construction of 'Race' (RLE Edu J)
Peter Figueroa, 2012-06-14. Does the education system help or hinder the fight against racism? This volume provides a constructive critique of the Swan Report of 1985 and of sociological research into racial and ethnic relations. The author undertakes a searching philosophical and sociological analysis of multicultural and antiracist education. He shows how the education system itself can reinforce racist assumptions and behaviour in society but also argues that through educational and social reconstructing it can promote constructive cross-cultural relations.
