The Source Power Of Happy Thoughts:

The Source Sirshree, 2018-08-30 WE ALL SEEK INNER PEACE We all seek inner peace lasting joy and unconditional love But it eludes us as we are drawn into challenges of daily life WE ALL SEEK WORLDLY SUCCESS We all seek to enjoy a perfect life brimming with harmony in relationships financial freedom and physical vitality But we believe all of this comes at the cost of inner peace WE CAN NOW ATTAIN BOTH Join millions of readers of the Source Series who are realizing inner peace and success through the Power of Happy Thoughts This book is meant for humanity If you are a good human being you should take it read it and follow the path Shahrukh Khan while releasing The Source Happy Thoughts are very right words First create inner peace through Happy Thoughts which shall then guide the external world His Holiness the Dalai Lama while releasing Sirshree's book **The Source ...power of Happy Thoughts** Saraśrī Tejapārakhījī, Man is all about his actions feelings and thoughts Actions include his words too And life is all about these three facets of hands heart and head But there is also a fourth facet that of consciousness on the background of which actions feelings and thoughts emanate from There is a lot said and written about these three facets There is a lot of training given to these three areas But what about the fourth In engineering everybody understands the three facets of input process and output People understand that improving the output is not possible until process and specially input is changed But is there a fourth aspect besides input process and output And the fourth aspect is the context in which workers are creating the output by changing the output through a process Visionary thinkers have now begun thinking and impacting the fourth aspect too They are understanding that the context or the culture in which workers operate are more important In human engineering actions are equivalent to output feelings are equivalent to the process and thoughts are the input Behaviour and actions are brought forth because of the input of thought and the further power that feelings process That is why to change behaviour it is important to change your feelings process and more importantly your thoughts input Yes thoughts are very important Change in thoughts through positive thinking is essential But the fourth dimension is even more important Yes the context in which actions feelings and thoughts arise is that of consciousness silence experience of being alive **The Source - Power of Happy Thoughts (Special Edition With VCD)** Sirshree Tejparkhi, 2011-11 The Source Power of Happy Thoughts The Fourth dimension By Sirshree Tejparkhi Man is all about his actions feelings and thoughts Actions include his words too And life is all about these three facets of hands heart and head But there is also a fourth facet that of consciousness on the background of which actions feelings and thoughts emanate from There is a lot said and written about these three facets There is a lot of training given to these three areas But what about the fourth In engineering everybody understands the three facets of input process and output People understand that improving the output is not possible until process and specially input is changed But is there a fourth aspect besides input process and output And the fourth aspect is the context in which workers are creating the output by changing the output through a process Visionary thinkers have now begun thinking and impacting the fourth

aspect too They are understanding that the context or the culture in which workers operate are more important In human engineering actions are equivalent to output feelings are equivalent to the process and thoughts are the input Behavior and actions are brought forth because of the input of thought and the further power that feelings process That is why to change behavior it is important to change your feelings process and more importantly your thoughts input Yes thoughts are very important Change in thoughts through positive thinking is essential But the fourth dimension is even more important Yes the context in which actions feelings and thoughts arise is that of consciousness silence experience of being alive Very little has been understood about this fourth dimension Some call it The Self When that is accessed then harnessing thoughts feelings and actions is very simple and easy When the context in an organization is changed then inputs processes and outputs can all take a quantum jump What a leader in an organization has to do is to precisely do that change the context The three facets are all lying on the foundation of the fourth As a leader leading your life it is similarly important to understand and access the consciousness from where actions feelings and thoughts arise from That is why it is called the source Imagine not being clear about your own source But that is what is happening most people don't know their own source The secret of the third aspect of thoughts is not just enough The source of the thoughts is what matters Even in the name of spirituality which is actually the study of the source everything other than the fourth dimension is being focused on The three dimensions spirituality focuses on are exercising breathing and thinking Yoga Pranayama and Gyan But the fourth dimension of silence that of Moun is the missing link In the name of spirituality yogic asanas or breathing exercises or concentration exercises in the name of meditation are given importance to But until the source is accessed until consciousness is manifested it is not complete Man is always comfortable with the three dimensions of length breath and depth But the fourth dimension is what gives colour to his life Spirituality talks about the three states of sleeping awakening and dream states But discovering the fourth state turiya is the missing link Discovering this fourth state should be the highest priority in life **The Greatest Freedom**
