The Southerners Handbook A Guide To Living The Good Life:

The Southerner's Handbook Editors of Garden and Gun, 2013-10-29 Whether you live below the Mason Dixon Line or just wish you did *The Southerner's Handbook* is your guide to living the good life Curated by the editors of the award winning Garden Home Julia Reed on the secrets of throwing a great party Jonathan Miles on drinking like a Southerner Jack Hitt on the beauty of cooking a whole hog John T Edge on why Southern food matters and much more As flavorful authentic and irresistible as the land and the people who inspire it *The Southerner's Handbook* is the ultimate guide to being a Southerner no matter where you live **A History of the Literature of the U.S. South: Volume 1** Harilaos Stecopoulos, 2021-05-20 A

History of the Literature of the U S South provides scholars with a dynamic and heterogeneous examination of southern writing from John Smith to Natasha Trethewey Eschewing a master narrative limited to predictable authors and titles the anthology adopts a variegated approach that emphasizes the cultural and political tensions crucial to the making of this regional literature Certain chapters focus on major white writers e g Thomas Jefferson William Faulkner the Agrarians Cormac McCarthy but a substantial portion of the work foregrounds the achievements of African American writers like Frederick Douglass Zora Neale Hurston and Sarah Wright to address the multiracial and transnational dimensions of this literary formation Theoretically informed and historically aware the volume's contributors collectively demonstrate how southern literature constitutes an aesthetic cultural and political field that richly repays examination from a variety of critical perspectives Navigating Souths Michele Grigsby Coffey, Jodi Skipper, 2017-08 The work of considering imagining and

theorizing the U S South in regional national and global contexts is an intellectual project that has been going on for some time Scholars in history literature and other disciplines have developed an advanced understanding of the historical social and cultural forces that have helped to shape the U S South However most of the debates on these subjects have taken place within specific academic disciplines with few attempts to cross engage *Navigating Souths* broadens these exchanges by facilitating transdisciplinary conversations about southern studies scholarship The fourteen original essays in *Navigating Souths* articulate questions about the significances of the South as a theoretical and literal home base for social science and humanities researchers They also examine challenges faced by researchers who identify as southern studies scholars as well as by those who live and work in the regional South and show how researchers have responded to these challenges In doing so this book project seeks to reframe the field of southern studies as it is currently being practiced by social science and humanities scholars and thus reshape historical and cultural conceptualizations of the region **Reconstructing Southern**

Rhetoric Christina L. Moss, Brandon Inabinet, 2021-11-01 Contributions by Whitney Jordan Adams Wendy Atkins Sayre Jason Edward Black Patricia G Davis Cassidy D Ellis Megan Fitzmaurice Michael L Forst Jeremy R Grossman Cynthia P King Julia M Medhurst Ryan Neville Shepard Jonathan M Smith Ashli Quesinberry Stokes Dave Tell and Carolyn Walcott Southern rhetoric is communication's oldest regional study During its initial invention the discipline was founded to justify the study of

rhetoric in a field of white male scholars analyzing significant speeches by other white men yielding research that added to myths of Lost Cause ideology and a uniquely oratorical culture Reconstructing Southern Rhetoric takes on the much overdue task of reconstructing the way southern rhetoric has been viewed and critiqued within the communication discipline The collection reveals that southern rhetoric is fluid and migrates beyond geography is constructed in weak counterpublic formation against legitimated power creates a region that is not monolithic and warrants activism and healing Contributors to the volume examine such topics as political campaign strategies memorial and museum experiences television and music influences commemoration protests and ethnographic experiences in the South The essays cohesively illustrate southern identity as manifested in various contexts and ways considering what it means to be a part of a region riddled with slavery Jim Crow laws and other expressions of racial and cultural hierarchy Ultimately the volume initiates a new conversation asking what southern rhetorical critique would be like if it included the richness of the southern culture from which it came

Consuming Identity Ashli Quesinberry Stokes, Wendy Atkins-Sayre, 2016-11-02 Southerners love to talk food quickly revealing likes and dislikes regional preferences and their own delicious stories Because the topic often crosses lines of race class gender and region food supplies a common fuel to launch discussion Consuming Identity sifts through the self definitions allegiances and bonds made possible and strengthened through the theme of southern foodways The book focuses on the role food plays in building identities accounting for the messages food sends about who we are how we see ourselves and how we see others While many volumes examine southern food this one is the first to focus on food's rhetorical qualities and the effect that it can have on culture The volume examines southern food stories that speak to the identity of the region explain how food helps to build identities and explore how it enables cultural exchange Food acts rhetorically with what we choose to eat and serve sending distinct messages It also serves a vital identity building function factoring heavily into our memories narratives and understanding of who we are Finally because food and the tales surrounding it are so important to southerners the rhetoric of food offers a significant and meaningful way to open up dialogue in the region By sharing and celebrating both foodways and the food itself southerners are able to revel in shared histories and traditions In this way individuals find a common language despite the divisions of race and class that continue to plague the South The rich subject of southern fare serves up a significant starting point for understanding the powerful rhetorical potential of all food

The Routledge Handbook of Commodification Elodie Bertrand, Vida Panitch, 2023-12-04 Some goods are freely traded as commodities without question or controversy For other goods their commodification their being made available in exchange for money or their being subject to market valuation and exchange is hotly contested Contested commodities range from labour and land to votes healthcare and education to human organs gametes and intimate services to parks and emissions But in the context of a market economy what distinguishes these goods as non commodifiable or what defines them as contestable commodities And why should their status as such justify restricting the market choices of rationally consenting

parties to otherwise voluntary exchanges This volume draws together wide ranging interdisciplinary research on the legitimate scope of markets and the kinds of goods that should be exempt therefrom In bringing diverse answers to this question together for the first time it finally identifies commodification studies as a unique field of scholarly research in its own right In so doing it fosters interdisciplinary dialogue advances scholarship and enhances education in this controversial important and growing field of research Contemporary theorists who examine this question do so from across the disciplinary spectrum and ground their answers in diverse scholarly literature and divergent methodological approaches Their arguments will be of interest to scholars and students of philosophy economics law political science sociology policy feminist theory and ecology among others The contributors to this volume take diverse and divergent positions on the benefits of markets in general and on the possible harms of specific contested markets in particular While some favour free markets and others regulation or prohibition and while some engage in more normative and others in more empirical analysis the contributors all advance nuanced and thoughtful arguments that engage deeply with the complex set of moral and empirical questions at the heart of commodification studies This volume collects their new and provocative work together for the first time
