Digital Depression Dan Schiller, 2014-10-15 The financial crisis of 2007 08 shook the idea that advanced information and communications technologies ICTs as solely a source of economic rejuvenation and uplift instead introducing the world to the once unthinkable idea of a technological revolution wrapped inside an economic collapse In Digital Depression Dan Schiller delves into the ways networked systems and ICTs have transformed global capitalism during

the so called Great Recession He focuses on capitalism s crisis tendencies to confront the contradictory matrix of a technological revolution and economic stagnation making up the current political economy and demonstrates digital technology s central role in the global political economy As he shows the forces at the core of capitalism exploitation commodification and inequality are ongoing and accelerating within the networked political economy *Electronic Commerce* United States. Congress. House. Committee on Commerce. Subcommittee on Telecommunications, Trade, and Consumer Protection,1999 Security and Privacy John Kleinig,Seumas Miller,Peter Mameli,Douglas Salane,Adina Schwartz,2011-12-01 This study is principally concerned with the ethical dimensions of identity management technology electronic surveillance the mining of personal data and profiling in the context of transnational crime and global terrorism The ethical challenge at the heart of this study is to establish an acceptable and sustainable equilibrium between two central moral values in contemporary liberal democracies namely security and privacy Both values are essential to individual liberty but they come into conflict in times when civil order is threatened as has been the case from late in the twentieth century with the advent of global terrorism and trans national crime We seek to articulate legally sustainable politically possible and technologically feasible global ethical standards for identity management technology and policies in liberal democracies in the contemporary global security context Although the standards in question are to be understood as global ethical standards potentially to be adopted not only by the United States but also by the European Union India Australasia and other contemporary liberal democratic states we take as our primary focus the tensions that have arisen between the United States and the European Union **Privacy online fair information practices in the electronic marketplace : a report to Congress , Online Consumer Protection: Theories of Human Relativism** Chen, Kuanchin,Fadlalla, Adam,2008-09-30 Presents a broad range of international findings in online consumer protection Covers the nature of online threats consumer concerns and techniques for online privacy protection **The Consumer Privacy Protection Act of 2002** United States. a grip on the key problems right now and change the conversation That s exactly what Jules Polonetsky Omer Tene and Evan Selinger do They bring together diverse views from leading academics business leaders and policymakers to discuss the opportunities and challenges of the new data economy

Recent Developments in Privacy Protections for Consumers

United States. Congress. House. Committee on Commerce. Subcommittee on Telecommunications, Trade, and Consumer Protection,2000

The New Normal Amitai Etzioni,2014-11-05 Amitai Etzioni argues that societies must find a way to balance individual rights and the common good This point of balance may change as new technologies develop the natural and international environments change and new social forces arise Some believe the United States may be unduly shortchanging individual rights that need to be better protected Specifically should the press be granted more protection Or should its ability to publish state secrets be limited Should surveillance of Americans and others be curtailed Should American terrorists be treated differently from others How one answers these questions Etzioni shows invites a larger fundamental question Where is the proper point of balance between rights and security Etzioni implements the social philosophy liberal communitarianism Its key assumptions are that neither individual rights nor the common good should be privileged that both are core values and that a balance is necessary between them Etzioni argues that we need to find a new balance between our desire for more goods services and affluence particularly because economic growth may continue to be slow and jobs anemic The key question is what makes a good life especially for those whose basic needs are sated
