The Taboo Of Subjectivity Towards A New Science Of Consciousness:

The Taboo of Subjectivity B. Alan Wallace, 2000 For many scientists the only true religion is science itself Wallace examines scientists long term resistance to spiritual study of consciousness and calls for a new science of religion *The Taboo of Subjectivity : Towards a New Science of Consciousness* Department of Religious Studies University of California B. Alan Wallace Visiting Lecturer, Santa Barbara, 2000-11-09 This book takes a bold new look at ways of exploring the nature origins and potentials of consciousness within the context of science and religion Alan Wallace draws careful distinctions between four elements of the scientific tradition science itself scientific realism scientific materialism and scientism Arguing that the metaphysical doctrine of scientific materialism has taken on the role of ersatz religion for its adherents he traces its development from its Greek and Judeo Christian origins focusing on the interrelation between the Protestant Reformation and the Scientific Revolution He looks at scientists long term resistance to the firsthand study of consciousness and details the ways in which subjectivity has been deemed taboo within the scientific community In conclusion Wallace draws on William James s idea for a science of religion that would study the nature of religious and in particular contemplative experience In exploring the nature of consciousness this groundbreaking study will help to bridge the chasm between religious belief and scientific knowledge It is essential reading for philosophers and historians of science scholars of religion and anyone interested in the relationship between science and religion *Alan Watts* *Here and Now* Peter J. Columbus, Donadrian L. Rice, 2012-06-01 Considers the contributions and contemporary significance of Alan Watts *The Greatest Achievement* Orest Bedrij, 2013-12 From ignorance we advance to belief Through belief we realize knowledge and understanding with knowledge and understanding we achieve wisdom Wisdom in action is freedom beauty and love Freedom beauty and love in action are God manifest **Psychosocial and Cultural Perspectives on the War in Ukraine** Bohdan Shumylovych, Magdalena Zolkos, 2024-04-15 This innovative and important book explores how war imprints on culture and the psychosocial effects of war on individuals and societies based on the first few months after the outbreak of war in Ukraine in 2022 The book approaches the conflict in Ukraine through the prism of creative and artistic material alongside scholarly analysis to highlight the multiplicity of subjective experiences Essays are complemented by material from the war diaries which comprise day diaries dream diaries artistic and poetic material composed by students and academics in February and March 2022 With chapters focusing on fear ruptures and resistance the book examines different aspects of subjective cultural and embodied experiences of war It examines elements that dominant perspectives of war often overlook the quotidian personal and emotive ways that war is registered individually and collectively in societies and cultures Highlighting different narratives that illuminate the complex effects of war this book is highly relevant for postgraduate students researchers and advanced undergraduate students in the fields of cultural psychology psychosocial studies peace and conflict studies and cultural history Chapter 4 Chapter 5 Chapter 7 and Chapter 10 of this book are freely available as

Emotions in Indian Thought-Systems Purushottama Bilimoria, Aleksandra Wenta, 2020-11-29 A stimulating account of the wide range of approaches towards conceptualising emotions in classical Indian philosophical religious traditions such as those of the Upanishads Vaishnava Tantrism Bhakti movement Jainism Buddhism Yoga Shaivism and aesthetics this volume analyses the definition and validity of emotions in the construction of The Daoist Tradition Louis Komjathy, 2013-06-20 Using a historical textual and ethnographic approach this is the most comprehensive presentation of Daoism to date In addition to revealing the historical contours and primary concerns of Chinese Daoists and Daoist communities The Daoist Tradition provides an account of key themes and defining characteristics of Daoist religiosity revealing Daoism to be a living and lived religion Exploring Daoism from a comparative religious studies perspective this book gives the reader a deeper understanding of religious traditions more broadly Beginning with an overview of Daoist history The Daoist Tradition then covers key elements of Daoist worldviews and major Daoist practices This is followed by a discussion of the importance of place and sacred sites as well as representative examples of material culture in Daoism The work concludes with an overview of Daoism in the modern world The book includes a historical timeline a map of China 25 images a glossary text boxes suggested reading and chapter overviews A companion website provides both student and lecturer resources <http://www.bloomsbury.com> the daoist tradition 9781441168733 *Constructivism and International Relations* Stefano Guzzini, Anna Leander, 2005-12-12 This new book unites in one volume some of the most prominent critiques of Alexander Wendt's constructivist theory of international relations and includes the first comprehensive reply by Wendt Partly reprints of benchmark articles partly new original critiques the critical chapters are informed by a wide array of contending theories ranging from realism to poststructuralism The collected leading theorists critique Wendt's seminal book *Social Theory of International Politics* and his subsequent revisions They take issue with the full panoply of Wendt's approach such as his alleged positivism his critique of the realist school the conceptualism of identity and his teleological theory of history Wendt's reply is not limited to rebuttal only For the first time he develops his recent idea of quantum social science as well as its implications for theorising international relations This unique volume will be a necessary companion to Wendt's book for students and researchers seeking a better understanding of his work and also offers one of the most up to date collections on constructivist theorizing *Pluralism and the Mind* Matthew Colborn, 2011-11-03 Paul Feyerabend noted that the world which we want to explore is a largely unknown entity We must therefore keep our options open and not restrict ourselves in

advance 1975 p 20 Given that consciousness is poorly understood and vaguely defined such advice seems sound but is frequently ignored in favour of an insistence that a scientific theory of consciousness must be reducible to current monist physics and biology This book argues that such an insistence is historically unsupportable theoretically incoherent and unnecessary The author instead makes the case for emergent property pluralism New concepts of emergent mental properties are needed in part because of the failure of mainstream approaches like computationalism or dynamical systems satisfactorily to address issues like subjective volition autonomy and creativity The author sees personal consciousness as active and classifiable as a subset of the wider problem of biological causation Biological causation is my term for issues like downwards causation final causes purposive behaviour and autonomy that are poorly handled by conventional evolutionary computational or dynamical systems models See Rosen 1991 Ho 2008 Rosen s approach is especially useful from a pluralistic perspective because of his insistence that no one mode of causal entailment suffices to understand anything Rosen 1991 p 13 The book is split into three sections Part one builds an historical case for pluralism Part two deconstructs insistent monism and mainstream models before addressing biological causation Part three explores the consequences of such an alternative approach by examining specific phenomena like free will the self and evolutionary emergence *IAAP Handbook of Applied Psychology* Paul R. Martin,Fanny Cheung,Michael C. Knowles,Michael Kyrios,Lyn Littlefield,J. Bruce Overmier,José M. Prieto,2011-03-01 The IAAP Handbook of Applied Psychology an up to date and authoritative reference provides a critical overview of applied psychology from an international perspective Brings together articles by leading authorities from around the world Provides the reader with a complete overview of the field and highlights key research findings Divided into three parts professional psychology substantive areas of applied psychology and special topics in applied psychology Explores the challenges opportunities and potential future developments in applied psychology Features comprehensive coverage of the field including topics as diverse as clinical health psychology environmental psychology and consumer psychology **Racial Profiling in Canada** Carol Tator,Frances Henry,Charles Smith,Maureen Brown,2006-01-01 Informed by a wealth of research and theoretical approaches from a wide range of disciplines Racial Profiling in Canada makes a major contribution to the literature and debates on a topic of growing concern **Daoism: A Guide for the Perplexed** Louis Komjathy,2014-03-13 Daoism is a global religious and cultural phenomenon characterized by multiculturalism and ethnic diversity Daoism A Guide for the Perplexed offers a clear and thorough survey of this ancient and modern religious tradition The book includes an overview of Daoist history including key individuals and movements translations of primary Daoist texts and discussions of key dimensions of Daoist religiosity covering primary concerns and defining characteristics of the religion Specifically designed to meet the needs of students and general readers seeking a thorough understanding of the religion this book is the ideal guide to studying and understanding Daoism as a lived and living religious community The Archaeology of Knowledge Traditions of the Indian Ocean World Himanshu Prabha Ray,2020-11-18 This book examines

knowledge traditions that held together the fluid and overlapping maritime worlds of the Indian Ocean in the premodern period as evident in the material and archaeological record. It breaks new ground by shifting the focus from studying cross pollination of ideas from textual sources to identifying this exchange of ideas in archaeological and historical documentation. The themes covered in the book include conceptualization of the seas and maritime landscapes in Sanskrit, Arabic, and Chinese narratives; materiality of knowledge production as indicated in the archaeological record of communities where writing on stone first appears and anchoring the coasts not only through an understanding of littoral shrines and ritual landscapes but also by an analysis of religious imagery on coins more so at the time of the introduction of new religions such as Islam in the Indian Ocean around the eighth century. This volume will be of great interest to researchers and scholars of archaeology, anthropology, museum and heritage studies, Indian Ocean studies, maritime studies, South and Southeast Asian studies, religious studies, and cultural studies. **Experiencing the Beyond** Gert Melville, Carlos Ruta, 2017-11-20

Experiencing the dimension that lies beyond our empirical grasp of the world has always been a challenge for human beings for it can expose the limitations of our agency. Such experience while potentially terrifying can also furnish a basis for religious faith or hope of a better future. The intercultural essays in this volume analyze ways of dealing with the beyond including magic, religion, myth, and all promising utopias. **Theory and Practice of Yoga** Knut A. Jacobsen, 2018-08-14. This collection of original essays provides fascinating insights into yoga as a historical and pluralistic phenomenon flourishing in a variety of religious and philosophical contexts. They cover a wide variety of traditions and topics related to Yoga: Classical Yoga, S khya, Tantric Yoga, Bhakti Yoga, the Guru, Indic, Islamic traditions of Yoga, Yoga and asceticism in contemporary India, and the reception of Yoga in the West. The essays are written by eighteen professors in the field of the history of religions, most of them former graduate students of Gerald James Larson. Larson is Rabindranath Tagore Professor Emeritus, Indiana University, Bloomington; Professor Emeritus, Religious Studies, University of California, Santa Barbara; an internationally acclaimed scholar on the history of religions and philosophies of India; and one of the world's foremost authorities on the Samkhya and Yoga traditions. The publication is in honour of him. **Medicine Across Cultures** Helaine Selin, 2006-04-11.

This work deals with the medical knowledge and beliefs of cultures outside of the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal, Australian, Indian, Egyptian, and Tibetan medicine, the book includes essays on comparing Chinese and western medicine and religion and medicine. Each essay is well illustrated and contains an extensive bibliography. **Machine Learning and Data Mining** Igor Kononenko, Matjaz Kukar, 2007-04-30. Good data mining practice for business intelligence: the art of turning raw software into meaningful information is demonstrated by the many new techniques and developments in the conversion of fresh scientific discovery into widely accessible software solutions. Written as an introduction to the main issues associated with the basics of machine learning and the algorithms used in data mining, this text is suitable for advanced undergraduates, postgraduates, and tutors in a wide

area of computer science and technology as well as researchers looking to adapt various algorithms for particular data mining tasks A valuable addition to libraries and bookshelves of the many companies who are using the principles of data mining to effectively deliver solid business and industry solutions *Engineering Reality* Cornelia Helmcke, 2023-09-22

Engineering Reality offers unprecedented insights into the power of environmental impact assessments in engineering a reality favourable to any investment focusing on the highly contested environmental study of a large hydroelectric dam project in southern Colombia El Quimbo The inclusion of environmental impact assessments to project proposals of environmental influence has been an undeniably important step to environmental governance in many countries around the world Regarding the science behind these studies as objective and their results as the closest in representing reality however is misleading Many activists and scholars made it their mission to uncover the limitations and work towards filling the gaps Participation processes are considered key to any successful evaluation but local knowledges and alternative perspectives are still often disqualified through more widely accepted scientific methods *Engineering Reality* systematically walks through and accounts for the shortcomings and injustices associated with environmental monitoring It compares the reality as presented in the dam's environmental impact study with first hand accounts from the local and affected populations and observations gathered through two periods of fieldwork in 2012 before and 2016-17 after the dam started operating It explores how the knowledge of the study was used politically and to what end Bringing the findings in conversation with the wider environmental impact assessment literature the book proposes a new framework to assess energy projects *Energy Data Justice* that regards the environmental impact assessment a strictly political tool aimed at reaching the just energy transition in Colombia and worldwide *A Complex Integral Realist Perspective* Paul Marshall, 2016-07-01 This book sketches the contours of a vision that moves beyond the dominant paradigm or worldview that underlies and governs modernity and postmodernity It does so by drawing on the remarkable leap in human consciousness that occurred during the Axial Age and on a cross pollination of what are arguably the three most comprehensive integrative metatheories available today Complex thought integral theory and critical realism i.e. a complex integral realism By deploying the three integrative metatheories this book recounts how the seeds of a number of biases within the Western tradition analytical over dialectical epistemology over ontology presence over absence and exterior over interior were first sown in axial Greece later consolidated in European modernity and then challenged throughout the 20th century It then discusses the remedies provided by the three integrative philosophies remedies that have paved the way for a new vision Outlining a new axial vision for the twenty first century which integrates the best of premodernity modernity and postmodernity within a complex integral realist framework this book will be of interest to students and scholars of the Axial Age critical realism integral theory and complex thought It will also appeal to those interested in a possible integration of the insights and knowledge gleaned by science spirituality and philosophy
