U S Naval Air Superiority Development Of Shipborne Jet Fighters 1943 196:

History of Acquisition in the Department of Defense, Volume 1 Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs Rearming for the Cold War, 1945-1960 Elliott Vanveltner Converse, 2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense author Elliott Converse presents a meticulously researched overview of changes in acquisition policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods **The Aeroplane and Commercial Aviation News** ,1943 **The Aeroplane** ,1943 *Aircraft Development* United States. General Accounting Office, 1990 The Pentagon Paradox James Perry Stevenson, 1993 Did the U S Navy avoid Congress s

explicit direction to navalize the winning design in a flyoff competition by lying to Congress with the argument that the winner was not carrier capable and then develop the losing aircraft into an even worse fighter for its carrier squadrons To find the answer James Stevenson an experienced aviation writer dug through government files and interviewed key players to present this hard hitting behind the scenes account of the development of one of the Navy s current front line aircraft His investigation exposes the politics of Pentagon weapons procurement a process that pits service against service the military against Congress admirals against generals pilots against engineers hard liners against reformers This book provides a developmental history of the F 18 Hornet from drawing board to its results in Desert Storm It is the story of a multi billion dollar aircraft design war between those military officers who insist that America s interests will be protected best by sophisticated aircraft even if America can afford fewer of them and a group known as the Fighter Mafia who claim that larger numbers have always won in warfare and that for equal dollars America can only produce greater numbers if each one is less sophisticated He shows that by picking the YF 17 and renaming the F 17 as the F 18 over the clearly superior YF 16 the Navy antagonized the Air Force Congress and its own F 14 community and sparked a major legal battle Undeterred the Navy took the light cheap YF 17 and loaded it with technology and weight which produced an F 18 that has less maneuverability less acceleration a range no better than the 1952 vintage A 4 and costs almost three times as much as the F 16 From its first flight in 1978 the F 18 performance continued to degrade Nevertheless in 1992 the Navy asked for additional money to modify the F 18 as the F 18E F This request was in reality funding for a brand new aircraft which Stevenson calls the F 19 designed to get back to the original requirements and help bail out the financially troubled McDonnell Douglas In this highly readable study Stevenson takes the reader into the Pentagon s corridors of power where test results are distorted history rewritten and requirements changed to match aircraft performance and the public s trust and treasure squandered Fascinating yet sobering The Pentagon Paradox will appeal to everyone interested in the military establishment the future of U S forces and how tax dollars are spent Vought F-8 Crusader Bill Spidle, 2017 Wins but losses Navy day fighter program First flights F8U 1 the crusade begins Fleet introduction record flights F8U 1T a crusader built for two F8U 2 improving the breed F8U 3 a super crusader Modernization Paper airplanes A date with NASA Epilogue
