organisations researchers and students of gender and women s studies development studies sociology economics and agriculture Witch Hunts: Culture, Patriarchy, and Transformation Govind Kelkar, Dev Nathan, 2020-10-29 This book is a unique intersectional analysis combining culture gender struggles and structural including economic transformations both in the formation of gendered class society patriarchy and capitalism **Labors of Division** Navyug Gill, 2024-01-16 One of the

most durable figures in modern history the peasant has long been a site of intense intellectual and political debate Yet underlying much of this literature is the assumption that peasants simply existed everywhere a general if not generic group traced backward from modernity to antiquity Focused on the transformation of Panjab during the nineteenth and early twentieth centuries this book accounts for the colonial origins of global capitalism through a radical history of the concept of the peasant demonstrating how seemingly fixed hierarchies were in fact produced legitimized and challenged within the preeminent agricultural region of South Asia Navyug Gill uncovers how and why British officials and ascendant Panjabis disrupted existing forms of identity and occupation to generate a new agrarian order in the countryside The notion of the hereditary caste peasant engaged in timeless cultivation thus emerged paradoxically as a result of a dramatic series of conceptual juridical and monetary divisions Far from archaic relics this book ultimately reveals both the landowning peasant and landless laborer to be novel political subjects forged through the encounter between colonialism and struggles over culture and capital within Panjabi society Questions of progress exploitation and knowledge come to animate the vernacular operations of power With this history Gill brings difference and contingency to understandings of the global past in order to

re think the itinerary of comparative political economy as well as alternative possibilities for emancipatory futures

Land, Labour and Livelihoods

Bina Fernandez, Meena Gopal, Orlanda Ruthven, 2016-11-25 This book brings together a unique collection of theoretical and empirical analyses of women's access to land labour and livelihoods in contemporary India. The authors recognize that gender relations must be viewed intersectionally along with other social relationships such as caste ethnicity religion sexuality and age in order to inform an integrated analysis of women's persistent disadvantage in India. The chapters examine a diverse range of rural and urban livelihoods within sectors such as tea plantations nursing hair salons sex work and waste collection. Documenting the shifts in these sectors in the context of economic liberalization the authors offer insights on the challenges of development interventions as women negotiate shifts in their livelihood options. Written to engage the contributions to this book will be of interest both to the general reader and to academics and practitioners in development and gender women's studies.

Feminist and Anti-caste

Activism in the Bodhgaya Land Movement of Rural Bihar Indulata Prasad, 2025-09-05 Feminist and Anti-caste Activism in the Bodhgaya Land Movement of Rural Bihar examines the long term social spatial and material impacts of the Bodhgaya Land Movement BGLM of the 1970s and 1980s on its participants and beneficiaries. This book presents an ethnography and oral history of radical feminist and anti-caste activism based on interviews with the urban educated Vahini activists who instigated the movement and oral narratives of the rural Bhuiyan Dalit women and men who led the protests. It also analyses the maps drawn by formerly enslaved Dalit laborers to document the social changes that resulted as well as those that failed to materialize from the land movement. In doing so this book theorizes the multiple oppressions and forms of resistance with which these activists engaged to bring forth their rich experiences and analyses of social conditions in Bihar. By centering caste and gender within its examination of the social movement this book makes multiple contributions to feminist scholarship that will be of use to social scientists and advanced undergraduate and graduate students in Gender Studies.

Asian Studies and other interdisciplinary fields Reinventing Revolution Gail Omvedt, 2019-09-16 This study describes and analyses the new social movements that have arisen in India over the past two decades in particular the anti caste movement of both the untouchables and the lower middle castes the women s liberation movement the farmers movement centred on struggles arising out of their integration into a state controlled capitalist market and the environmental movements opposition to destructive development including resistance to big dam projects and the search for alternatives Rooted in participant observation it focuses on the ideologies and self understanding of the movements themselves The central themes of this book are the origin of movements in the socio economic contradictions of post independence India their effect on political developments in particular the disintegration of Congress hegemony their relation to traditional Marxist theory and Communist practice and their groping toward a synthesis of theory and practice that constitutes a new social vision distinct from traditional Marxism

India Social Development Report 2023 Indira Hirway, 2024-01-20 This report highlights that gender inequalities and women s subordination in India are caused by two formidable macro structures patriarchy and the exclusion of unpaid work from the macro economy Both these structures reinforce each other and negatively impact women s empowerment Patriarchy imposes subordination on women and forces a disproportionately higher share of unpaid domestic services and unpaid care onto them This is unfair and unjust a violation of basic human rights Other structures like race religion and caste cut across these main structures The selected papers in this report show how patriarchy causes gender inequalities in all critical dimensions of women s life on the one hand and how unpaid domestic services and unpaid care sustains the macro economy and its growth on the other The contributors discuss pathways to integrate unpaid work with the macro economy such that the strength of patriarchy declines and at the same time gender equality is promoted To put it differently unless the structures are addressed by integrating unpaid work inequalities cannot be addressed effectively The report emphasizes that this is the only way to move to real macroeconomics The papers have explored pathways to break these structures gradually to achieve gender equality and empower women Though the path is challenging it is feasible to reach the goal of pervasive gender equality

Rice Plus Susan H. Lee, 2006-02-14 This book explores the economic coping practices of rural widows in the aftermath of the Cambodian civil war War produces a preponderance of widows often young widows with small children in their care Rural widows must feed their families and educate their children despite rural poverty and the lack of opportunities for women The economics of widowhood is therefore a significant social problem in less developed countries The widows predominant economic plan was to combine rice cultivation with an assortment of microenterprises a rice plus strategy Many widows were unable to grow enough rice on their land to feed their families They filled the hunger gap by raising cash through microenterprises to purchase additional rice Gender work roles were both permeable and persistent allowing a flexible sexual division of labor in the short run but maintaining traditional roles in the long run Most widows called on relatives or exchanged transplanting labor for male plowing services although a few women

took up the plow themselves The study also explores widows access to key economic resources such as land credit and education War decimated widows family support networks including the loss of children their social security The study concludes that Cambodia s gender arrangement offered many economic options to widows but also devalued their labor in a cultural structure of inequality Gender poverty and war interacted to reduce widows financial resources accounting for their economic vulnerability
