

64E type power trim and tilt unit

The 64E type clamp bracket and power trim and tilt unit used for current V4 and V6 outboard motors have been adopted.

This allows easier interchanging of Yamaha outboards with the same classification because the mounting dimensions are the same.

For the power trim and tilt unit, only the impact absorber valve opening pressure of the tilt piston fluid circuit has been changed. The pressure is distinguished from those of other models by an identification mark stamped on the power trim and tilt unit.
