Sheng, 2005-10-24 This book constitutes the proceedings of the 6th International Conference on Web Information Systems Engineering WISE 2005 held in New York NY USA in November 2005 The 30 revised full papers and 20 revised short papers presented together with 18 poster papers were carefully reviewed and selected from 259 submissions The papers are organized in topical sections on Web mining Web information retrieval metadata management ontology and semantic Web XML Web service method Web service structure collaborative methodology P2P ubiquitous and mobile document retrieval applications Web services and e commerce recommendation and Web information extraction P2P grid and distributed management and advanced issues The presentation is rounded off by 14 industrial papers and the abstracts of 4 tutorial sessions **Web Information Systems Engineering--WISE 2005 Workshops**, 2005 **Knowledge**

Discovery from XML Documents Richi Nayak, Mohammed J. Zaki, 2006-02-26 This book constitutes the refereed proceedings of the First International Workshop on Knowledge Discovery from XML Documents KDXD 2006 held in Singapore in conjunction with the 10th Pacific Asia Conference on Knowledge Discovery and Data Mining PAKDD 2006 The ten revised full papers presented together with two invited talks were carefully reviewed and selected from 26 submissions The papers are organized in topical sections **Web Information Systems Engineering - WISE 2009** Gottfried

Vossen, Darrell D. E. Long, Jeffrey Xu Yu, 2009-09-23 This book constitutes the proceedings of the 10th International Conference on Web Information Systems Engineering WISE 2009 held in Poznan Poland in October 2009 The 33 revised full papers and 17 revised short papers presented together with two keynote talks were carefully reviewed and selected from around 144 submissions The papers are organized in topical sections on web computing industrial session tagging semantics search visualization web services trust and uncertainty recommendation and quality of service user interfaces web understanding exploiting structures information on the web systems data mining and querying querying and workflow and architecture **Ontology-based Application Integration** Heiko Paulheim, 2011-09-08 Ontology based Application

Integration introduces UI level User Interface Level application integration and discusses current problems which can be remedied by using ontologies It shows a novel approach for applying ontologies in system integration While ontologies have been used for integration of IT systems on the database and on the business logic layer integration on the user interface layer is a novel field of research This book also discusses how end users not only developers can benefit from semantic technologies Ontology based Application Integration presents the development of a software framework including a detailed ontology about user interfaces and interactions This includes a running case study of a real world integrated emergency management system The last section of this book discusses useful features that can be built on top of the framework for improving the user experience with future integrated information systems Ontology based Application Integration is designed

as a reference book for practitioners and researchers who understand and work with the principles of applying semantic web technologies to a software engineering problem This book will also make an excellent reference or secondary text book for advanced level students concentrating on computer science Web Information Systems Engineering - WISE 2010 Lei Chen, Peter Triantafillou, Torsten Suel, 2010 Th Welcome to the Proceedings of WISE 2010 the 11 International Conference on Web Information Systems Engineering This year WISE returned to the place where the inaugural conference was held in 2000 Hong Kong WISE has also been held in 2001 Kyoto Japan 2002 Singapore 2003 Rome Italy 2004 Brisbane Australia 2005 New York USA 2006 Wuhan China 2007 Nancy France 2008 Auckland New Zealand and 2009 Poznan Poland Continuing its trend this year s WISE provided a forum for engineers and scientists to present their latest findings in Web related technologies and solutions The submitted contributions address challenging issues in Web services search modeling recommendation and data mining as well as keyword search social network analysis query languages and information retrieval and extraction This year WISE received 170 submissions from 25 countries including Argentina Australia Austria Belgium Canada China Czech Republic France Germany Hong Kong Greece Iran Ireland Italy Japan The Netherlands Norway Singapore South Korea Spain Sweden Switzerland Taiwan UK and the USA After a thorough reviewing process 32 papers were selected for presentation as full papers the acceptance rate was 18.8% In addition 19 papers were selected for presentation as short papers yielding an overall acceptance rate of 30% **4th International Conference on Web Information Systems Engineering (WISE 2003)**. IEEE Computer Society Staff, 2003 **Multimedia Semantics** Raphael Troncy, Benoit Huet, Simon Schenk, 2011-07-18 In this book the authors present the latest research results in the multimedia and semantic web communities bridging the Semantic Gap This book explains collects and reports on the latest research results that aim at narrowing the so called multimedia Semantic Gap the large disparity between descriptions of multimedia content that can be computed automatically and the richness and subjectivity of semantics in user queries and human interpretations of audiovisual media Addressing the grand challenge posed by the Semantic Gap requires a multi disciplinary approach computer science computer vision and signal processing cognitive science web science etc and this is reflected in recent research in this area In addition the book targets an interdisciplinary community and in particular the Multimedia and the Semantic Web communities Finally the authors provide both the fundamental knowledge and the latest state of the art results from both communities with the goal of making the knowledge of one community available to the other Key Features Presents state of the art research results in multimedia semantics multimedia analysis metadata standards and multimedia knowledge representation semantic interaction with multimedia Contains real industrial problems exemplified by user case scenarios Offers an insight into various standardisation bodies including W3C IPTC and ISO MPEG Contains contributions from academic and industrial communities from Europe USA and Asia Includes an accompanying website containing user cases datasets and software mentioned in the book as well as links to the K Space NoE and the SMaRT society web sites <http://www.k-space.no>

Technology Integration to Business John T. Yee, Seog-Chan Oh, 2012-08-31 Today's global business environments drive companies to be more technology dependent and to remain competitive firms need to introduce or adopt a new technology to business In order to achieve a successful integration with maximum return on investment companies need a systematic approach that accommodates a comprehensive course of action of technology integration Technology Integration to Business Practical Methods and Case Studies suggests a business driven holistic approach of technology integration that consists of several steps First companies should examine the current state issues benefits and obstacles of technology integration in conjunction with their competitive business strategy and operational capability Second firms should investigate new emerging business technologies as to how those technologies can contribute to improve the business Third with the technology integration needs identified companies should complete preparatory tasks before actual implementation such as business process analysis technology assessment technology provider investigation business case development and cost benefit analysis Fourth because the nature of technology integration project involves many stakeholders in global locations firms should use effective project management knowledge from project initiation through planning execution control to close Students will learn real world technology integration processes in industry settings and become more prepared for industrial careers Practitioners will find thorough procedures and methods that are useful in practice to improve business performance Realistic examples for manufacturing logistics and supply chain management application domains give the reader practical implications for the methods presented

Collaborative Search and Communities of Interest: Trends in Knowledge Sharing and Assessment Francq, Pascal, 2010-07-31 Collaborative Search and Communities of Interest Trends in Knowledge Sharing and Assessment provides a comprehensive collection of knowledge from experts within the Information and Knowledge Management field Outlining various concepts from an application and technical stand point and providing insight on the various dimensions sociological psychological technical etc of social Internet collaboration This book provides solutions to the detection of interest communities as well as the study of how tools and knowledge sharing impact the environment where they are used

At Your Service Elisabetta Di Nitto, 2009 Research results from industry academic collaborative projects in service oriented computing describe practical achievable solutions Service Oriented Applications and Architectures SOAs have captured the interest of industry as a way to support business to business interaction and the SOA market grew by 4.9 billion in 2005 SOAs and in particular service oriented computing SOC represent a promising approach in the development of adaptive distributed systems With SOC applications can open themselves to services offered by third parties and accessed through standard well defined interfaces The binding between the applications and the services can be in this context extremely loose enabling the ad hoc creation of new services

when the need arises This book offers an overview of some current research in the field presenting the results of eighteen research projects funded by the European Community s Information Society Technologies Program IST The projects collaborations between industry and academia have produced practical achievable results that point the way to real world applications and future research The chapters address such issues as requirement analysis design governance interoperability and the dependability of systems made up of components owned by third parties The results are presented in the context of two roadmaps for research one developed by European industry involved in software development and the other by researchers working in the service area The contributors report first on the Infrastructure Layer then in the bulk of the book on the Service Integration Layer the Semantic Layer and finally on the issues that cut across the different layers The book concludes by looking at ongoing research on both roadmaps
