95 Strategies for Remodeling Instruction Laura E. Pinto, Stephanie Spares, Laura Driscoll, 2012-01-13 Give your lesson plans a makeover. Would you rather listen to a lecture or play classroom Jeopardy? Research shows that the most successful learning happens when teachers talk less and engage their students in actively applying concepts. This book shows you how to enhance lessons with 95 research-based strategies that work for all subjects and grade levels. In addition, the authors explain the research on student learning, describe best practices and provide tools for analyzing your lessons. This step-by-step guide shows how to remodel lessons to align with the Common Core State Standards, develop 21st-century skills, engage students, enhance content learning. The book's evidence-based Present Apply Review PAR model is highly effective for addressing shortfalls in student learning. Included are diagrams, examples, clear instructions for connecting lessons to CCSS anchors and a guide to sharing the strategies in a professional learning setting. Why teach tomorrow's adults with yesterday's lessons? Amplify your arsenal with storyboarding, Socratic role play, Wikis, peer huddles and more, and watch learning soar.

An Introduction to Teaching Composition in an Electronic Environment Eric Hoffman, Carol Scheidenhelm, 2000 An Introduction to Teaching Composition in an Electronic Environment is designed for instructors who have an average knowledge of computers overall and very little training or experience on how they can be used beneficially in the composition classroom. As such, the book focuses on offering practical explanations and specific ideas for lesson plans that can easily be incorporated into class time.

The book is divided into two parts. The first section explains the basics of the three main computer tools used in composition: word processor, e-mail, and the World Wide Web, and focuses on some basic ways these tools can be implemented for teaching writing. While the material assumes some basic knowledge, major concepts and terminology are always explained and defined fully. The second section addresses more directly the application of technology in the classroom. It includes practical advice on preparing for a course with an electronic component and what to do the first few days of class. This section also includes a series of lesson plans categorized according to pedagogical goals and technological requirements. A third section includes trouble-shooting guides for common problems in the lab, a glossary of computer terms, sample Web pages that teachers can adapt for their courses, a section on Netiquette, and an index of on-line writing and grammar resources on the Web. For teachers of college-level writing.
