Desert Weeds Garry Rogers, 2020-10-14 In their rapid colonization of soil exposed by fires floods and grazing animals weeds resemble the human specialists we label Emergency Medical Technicians EMTs Weeds are the first responders when disasters occur in nature They occupy bare soil and prevent erosion by wind and water In extreme cases such as a landslide weeds are essential to the healing processes that replace the lost soil Like a Band Aid on a skinned knee weeds protect the land while it recovers Besides protecting the soil after disaster weeds provide food for wildlife and some of them provide food and medicine for people Able to withstand harsh conditions weeds will proliferate as global warming and other human impacts intensify Thus nature s EMTs will increase while all other plants decline The book

provides a succinct definition of weeds according to their form and function in ecosystem processes The narrative uses a representative set of weed species from a desert location to illustrate the full range of weed characteristics **Weeds**

Richard Mabey, 2010-10-14 Ever since the first human settlements 10 000 years ago weeds have dogged our footsteps They are there as the punishment of thorns and thistles in Genesis and two millennia later as a symbol of Flanders Field They are civilisations familiars invading farmland and building sites war zones and flower beds across the globe Yet living so intimately with us they have been a blessing too Weeds were the first crops the first medicines Burdock was the inspiration for Velcro Cow parsley has become the fashionable adornment of Spring weddings Weaving together the insights of botanists gardeners artists and poets with his own life long fascination Richard Mabey examines how we have tried to define them explain their persistence and draw moral lessons from them One persons weed is another s wild beauty Weeds of the Farm and Garden Louis Hermann Pammel, 1925
