Diffractional Technospaces Federica Timeto,2016-03-09 The entanglements of information and materiality in our media environment that new information and communication technologies make increasingly mobile and locative changes the mediations between space and society The fluidity and continual reworking of the boundaries of contemporary technospaces

the sociotechnical environments in which humans and machines relate and intersect is key to the production and consumption of contemporary technologies. Theoretical analyses of communication and space have tended to engage in the representation of such changes without interrogating the representational instruments used at a broader methodological level. Articulating a non-representational perspective on knowledge production and artistic practices combined with an analysis of space, this book offers a new performative and relational return to representation in contemporary technospaces. The radically materialist posthumanist and performative position from which this situated aesthetics of technospaces is elaborated aligns this book not only with non-representational theory but also with the theories of material feminism, feminist geography, situated epistemologies, science and technology studies, actor network theory, performance studies, and new media studies.

African Studies: Breakthroughs in Research and Practice Management Association, Information Resources, 2020-04-03. Global interest in African studies has been rapidly growing as researchers realize the importance of understanding the impact African communities can have on the economy, development, education, and more. As the use, acceptance, and popularity of African knowledge increases, it is crucial to explore how this community-based knowledge provides deeper insights, understanding, and influence on such things as decision making and problem solving. *African Studies Breakthroughs in Research and Practice* examines the politics, culture, language, history, socio-economic development, methodologies, and contemporary experiences of African peoples from around the world. Highlighting a range of topics such as indigenous knowledge, developing countries, and public administration, this publication is an ideal reference source for sociologists, policymakers, anthropologists, government officials, economists, instructors, researchers, academicians, and graduate-level students in a variety of fields.

Studies in the Sociology of Population Jon Anson, Walter Bartl, Andrzej Kulczycki, 2019-01-23. This book presents a cross-section of the work and concerns of social demographers worldwide, covering a broad range of topics from social structure through population structure to social policy, from fertility and mortality through migration to the way in which organisations deal with the demographic environment in which they operate. Topics addressed also include morbidity and health profiles and transitions, as well as policies and programs concerned with these and other issues. The volume touches on some of the major links between population and societal dynamics. It addresses demographic patterns and issues from micro-level, meso-level, and macro-level perspectives and helps put into focus the past, present, and future of the mutual relations between population dynamics and societal responses. With a unique introductory chapter discussing the global unevenness of population growth today, its associations with inequality, and the challenges it presents for the future, and a truly international approach to social and demographic change and policy responses, this book will serve as a valuable resource for professionals and students in sociology, demography, social policy, and local governance.
