Lowry, 2010-12-01 The national parks of North America are great public treasures visited by 300 million people each year Set aside to be kept in relatively natural condition these remarkable places of forests rivers mountains and wildlife still inspire our capacity for wonder Today however the parks are threatened by increasingly difficult problems from both inside and outside their borders This book enriched with personal anecdotes of the author s trips throughout the parks of North America examines changes in the park services of the United States and Canada over the past fifteen years William Lowry describes the many challenges facing the parks such as rising crime tourism and overcrowding pollution eroding funding for environmental research and the contentious debate over preservation versus use and the abilities of the agencies to deal with them The Capacity for Wonder provides a revealing comparison of the U S National Park Service NPS and the Canadian Parks Service CPS The author explains that while the services are similar in many ways the priorities of these two agencies have changed dramatically in recent years Lowry shows how increasing conflicts over agency goals and decreasing institutional support have made the NPS vulnerable to interagency disputes reluctant to take any risks in its operations and extremely responsive to political pressures As a result U S national parks are now managed mainly to serve political purposes

Lowry illustrates how in the 1980s politicians pushed the NPS to expand private uses of national parks through development timber harvesting grazing and mining while environmental groups push the NPS in the other direction Over the same period the CPS enjoyed a clarification of goals and increased institutional supports As a result the CPS has been able to decentralize its structure empower its employees and renew its commitment to preservation Lowry considers several proposals to change the institutions governing the parks His own recommendations are more in line with proposals to revitalize public agencies than with those that suggest replacing them with private enterprise state agencies or endowment boards Lowry concludes that preserving nature should be the primary explicit goal of the park services and he calls for a stronger commitment to that goal in the United States

Wonder-Full Education Kieran Egan,Annabella I. Cant,Gillian Judson,2013-07-24 For many children much of the time their experience in classrooms can be rather dull and yet the world the school is supposed to initiate children into is full of wonder This book offers a rich understanding of the nature and roles of wonder in general and provides multiple suggestions for to how to revive wonder in adults teachers and curriculum makers and how to keep it alive in children Its aim is to show that adequate education needs to take seriously the task of evoking wonder about the content of the curriculum and to show how this can routinely be done in everyday classrooms The authors do not wax flowery they present strong arguments based on either research or precisely described experience and demonstrate how this argument can be seen to work itself out in daily practice The emphasis is not on ways of evoking wonder that might require virtuoso teaching but rather on how wonder can be evoked about the everyday features of the math or science or social studies curriculum in regular classrooms
