QUESTION I recently purchased a new car and am considering whether to purchase a new car insurance policy. I am currently covered by my parents' policy. Should I purchase a new policy?

ANSWER The answer to this question depends on several factors, including your current coverage, the cost of a new policy, and your financial situation. If you are currently covered by your parents' policy, you may not need to purchase a new policy. However, if you are considering purchasing a new policy, you should compare the terms and costs of different policies to ensure you are getting the best value for your money.

- 10) **What is the difference between a statistic and a parameter?**
A **statistic** is a numerical value calculated from a sample of data. A **parameter** is a numerical value calculated from a population of data.
- 11) **What is the difference between a population and a sample?**
A **population** is the entire group of individuals being studied. A **sample** is a subset of the population.
- 12) **What is the difference between a qualitative variable and a quantitative variable?**
A **qualitative** variable is a variable that cannot be measured. A **quantitative** variable is a variable that can be measured.
- 13) **What is the difference between a discrete variable and a continuous variable?**
A **discrete** variable is a variable that has a finite number of possible values. A **continuous** variable is a variable that has an infinite number of possible values.
- 14) **What is the difference between a nominal variable and a ordinal variable?**
A **nominal** variable is a variable that has categories that cannot be ordered. An **ordinal** variable is a variable that has categories that can be ordered.
- 15) **What is the difference between a ratio variable and a interval variable?**
A **ratio** variable is a variable that has a true zero point. An **interval** variable is a variable that does not have a true zero point.
