We Robots Staying Human In The Age Of Big Data:

We, Robots Curtis White, 2015 In the noble tradition of Jaron Lanier's *You Are Not a Gadget* Penguin 2011 Curtis White's *We Robots* takes the radical position that maybe we shouldn't cede every bit of control humanity and decision making to technology and that the techno futurists in our mix have things dangerously backwards What a notion In this sharply argued and rousing book White not only attacks the technology loving establishment but offers a beautiful and essential alternative

We, Robots Curtis White, 2015-11-03 In the tradition of Jaron Lanier's *You Are Not a Gadget* a rousing sharply argued and yes inspiring reckoning with our blind faith in technology Can technology solve all our problems Despite overwhelming evidence to the contrary many of our most famous journalists pundits and economists seem to think so According to them intelligent machines and big data will free us from work educate our children transform our environment and even make religion more user friendly This is the story they're telling us that we should stop worrying and love our robot future But just because you tell a story over and over again doesn't make it true Curtis White one of our most brilliant and perceptive social critics knows all about the danger of a seductive story and in *We Robots* he tangles with the so-called thinkers who are convinced that the future is rose-colored and robotically enhanced With tremendous erudition and a punchy wit White argues that we must be skeptical of anyone who tries to sell us on technological inevitability And he gives us an alternative set of stories taking inspiration from artists as disparate as Sufjan Stevens Lars von Trier and François Rabelais White shows us that by looking to art we can imagine a different kind of future No robots required *We Are Data* John

Cheney-Lippold, 2017-05-02 Do algorithms get to decide who we are Essential reading for anyone who cares about the internet's extraordinary impact on each of us and on our society Kirkus Reviews starred review Derived from our every search like click and purchase algorithms determine the news we get the ads we see the information accessible to us and even who our friends are These complex configurations not only form knowledge and social relationships in the digital and physical world but also determine who we are and who we can be both on and offline Algorithms create and recreate us using our data to assign and reassign our gender race sexuality and citizenship status They can recognize us as celebrities or mark us as terrorists In this era of ubiquitous surveillance contemporary data collection entails more than gathering information about us Entities like Google Facebook and the NSA also decide what that information means constructing our worlds and the identities we inhabit in the process We have little control over who we algorithmically are Our identities are made useful not for us but for someone else Through a series of entertaining and engaging examples John Cheney Lippold draws on the social constructions of identity to advance a new understanding of our algorithmic identities *We Are Data* will inspire those who want to wrest back some freedom in our increasingly surveilled and algorithmically constructed world

Living in a World that Can't Be Fixed Curtis White, 2019-11-05 An inspiring case for practicing civil disobedience as a way of life and a clear vision for a better world full of play caring and human connection In an era of peak global suffering and

uncertainty there has never been a more opportune time to re think and re build our entire social order And it has never been more clear that our politicians and authorities will not be up to the task only we can create the world we actually want to live in And we can do it now In *Living in a World that Can t Be Fixed* Curtis White argues that the only way to save the planet bypass social antagonisms and build communities that actually work for us is through a strong and vital counterculture He shows us the legacy and effectiveness of countercultural movements that existed long before the storied 1960s and imagines the similar sweeping changes we could make today including where we live how we work what we eat and the media we consume White the most inspiringly wicked social critic of the moment Will Blythe Elle reveals how the products of our current so called resistance from Ken Burns to Black Panther rarely offer a meaningful challenge to power and how our loyalty to the American Lifestyle is self defeating and keeps us from making any real social change The world has been turned upside down but thankfully we now have a guide for righting it on our terms **Transcendent** Curtis

White,2023-01-17 Scholars of Buddhism will benefit from White s shrewd takes Publishers Weekly Acclaimed cultural critic Curtis White examines current fissures in Western Buddhism and argues against the growth of scientific and corporate dharma particularly in Stephen Batchelor s Secular Buddhist movement In *Transcendent* celebrated cultural critic Curtis White asks what Buddhism will look like in the future Do we want a secular Buddhism that looks like corporations and neuroscience Or do we want a Buddhism that still provides refuge from the debased world of money and things

Transcendence is not about magic realms where spirits fly about the world is as Shunryu Suzuki put it its own magic We only need to reclaim it and reclaim our humanity while we re at it The problem White suggests is a culture that recognizes only things capitalist things and science things and aggressively denies the idea that the world of things has a beyond We re told by science ideologues like the New Atheists that we live in a secular age and that philosophy is dead and art is only an amusement and transcendence is not wanted because science can provide all the wonder and beauty we need *Transcendent* is a call for the re enchantment not only of Buddhism but also of our Western art traditions White recalls the risks and the raptures of the English Romantics Beat poets and the children of the counterculture all in the name of a living world and in defiance of our current world of climate catastrophe contagious disease and social collapse Falter Bill

McKibben,2019-04-16 Thirty years ago Bill McKibben offered one of the earliest warnings about climate change Now he broadens the warning the entire human game he suggests has begun to play itself out Bill McKibben s groundbreaking book *The End of Nature* issued in dozens of languages and long regarded as a classic was the first book to alert us to global warming But the danger is broader than that even as climate change shrinks the space where our civilization can exist new technologies like artificial intelligence and robotics threaten to bleach away the variety of human experience Falter tells the story of these converging trends and of the ideological fervor that keeps us from bringing them under control And then drawing on McKibben s experience in building 350.org the first truly global citizens movement to combat climate change it

offers some possible ways out of the trap We re at a bleak moment in human history and we ll either confront that bleakness or watch the civilization our forebears built slip away Falter is a powerful and sobering call to arms to save not only our planet but also our humanity

A Shimmering, Serrated Monster! Mark Leyner, 2024-12-03 An all access ticket to the celebrated and wholly original mind of Mark Leyner one of the smartest and funniest humans since Aristophanes Jay McInerney Praised as chaotic and vibrant Charles Yu visionary Sam Lipsyte and supremely original John Cusack the work of Mark Leyner has inspired a generation of contemporary novelists and has long deserved its place of recognition among the literary superstars of the seismic postmodernism influenced movement of the early 21st century A Shimmering Serrated Monster The Mark Leyner Reader samples the staggering highlights from Leyner s extraordinary career in all of its bizarre and infatuating glory with excerpts spanning from his groundbreaking early novels *My Cousin My Gastroenterologist* 1990 and *Et Tu Babe* 1992 to his modern masterpieces *The Sugar Frosted Nutsack* 2012 and *The Last Orgy of the Divine Hermit* 2021 Appreciations from modern masters introduce each novel and the book includes original pieces in Leyner s irrepressible voice including a timeline *The Story So Far* and a new Afterword *The Highlighted Passages* This comprehensive volume is the perfect entry point for readers attracted to mind expanding prose and a bouquet of delights for those who have loved any of his past works

Feeling Machines Shawn Bender, 2024-11-19 In recent years debates over healthcare have accompanied rapid advances in technology from the expansion of telehealth services to artificial intelligence driven diagnostics In this book Shawn Bender delves into the world of Japanese robots engineered for care Care robots kaigo robotto emerged early in the 21st century when roboticists began converting assembly line technologies into responsive machines for older adults and people with disabilities These robots are meant to be felt and programmed to feel While some greet them with enthusiasm others fear that they might replace a fundamentally human task Based on fieldwork in Japan Denmark and Germany Bender traces the emergence of care robots in Japan and examines their impact on therapeutic practice around the world Social science scholarship on robotics tends to be either speculative imagining life together with robots or experimental observing robot human interaction in laboratories or through short term field studies Instead Bender follows roboticists developing technologies in Japan and travels with the robots themselves into everyday sites of care tracking the integration of robots into institutional care and the connection of care practice to robotics development By exploring the application of Japanese robotics across the globe *Feeling Machines* highlights the entanglements of therapeutic practice and technological innovation in an age of more than human care
