

WEAPONIZING ANTHROPOLOGY

DAVID H. PRICE

When we think of the word "weapon," we think of guns, bombs, and other tools of war. But what if we think of it differently? What if we think of it as a tool of war against the very people it is supposed to protect? This is the central theme of *Weaponizing Anthropology*, a book that explores the ways in which the field of anthropology has been used to justify and perpetuate violence against indigenous peoples.

Weaponizing Anthropology Social Science In Service Of The Militarized State Counterpunch:

Weaponizing Anthropology David H. Price, 2011-08-16 The ongoing battle for hearts and minds in Iraq and Afghanistan is a military strategy inspired originally by efforts at domestic social control and counterinsurgency in the United States. *Weaponizing Anthropology* documents how anthropological knowledge and ethnographic methods are harnessed by military and intelligence agencies in post 9 11 America to placate hostile foreign populations. David H Price outlines the ethical implications of appropriating this traditional academic discourse for use by embedded militarized research teams. Price's inquiry into past relationships between anthropologists and the CIA, FBI and Pentagon provides the historical base for this expose of the current abuses of anthropology by military and intelligence agencies. *Weaponizing Anthropology* explores the ways that recent shifts in funding sources for university students threaten academic freedom as new secretive CIA linked fellowship programs rapidly infiltrate American university campuses. Price examines the specific uses of anthropological knowledge in military doctrine that have appeared in a new generation of counterinsurgency manuals and paramilitary social science units like the Human Terrain Teams. David H Price is the author of *Threatening Anthropology*, *McCarthyism and the FBI's Surveillance of Activist Anthropologists* and *Anthropological Intelligence: The Deployment and Neglect of American Anthropology in the Second World War*. He is a member of the Network of Concerned Anthropologists and teaches at St Martin's College in Lacey, Washington.

Transforming Ethnomusicology Volume I Beverley Diamond, Salwa El-Shawan Castelo-Branco, 2021-03-09 This two volume collection transforms our understanding of the discipline of ethnomusicology by exploring how ethnomusicologists can contribute to positive social and environmental change within institutional frameworks. The first volume focuses on ethical practice and collaboration and offers strategies for promoting institutional and methodological change.

Militarization Roberto J. González, Hugh Gusterson, Gustaaf Houtman, 2019-12-06 *Militarization: A Reader* offers a range of critical perspectives on the dynamics of militarization as a social, economic, political, cultural and environmental phenomenon. It portrays militarism as the condition in which military values and frameworks come to dominate state structures and public culture both in foreign relations and in the domestic sphere. Featuring short, readable essays by anthropologists, historians, political scientists, cultural theorists and media commentators, the Reader probes militarism's ideologies, including those that valorize warriors, armed conflict and weaponry. Outlining contemporary militarization processes at work around the world, the Reader offers a wide-ranging examination of a phenomenon that touches the lives of billions of people. In collaboration with Catherine Besteman, Andrew Bickford, Catherine Lutz, Katherine T. McCaffrey, Austin Miller, David H. Price, David Vine.

A Theory of Forced Labour Migration Ali Kadri, 2020-06-02 This book focuses on labour dislocation and migration of Palestinians between 1967 and 1992. In particular, it highlights the social transformations in the occupied Palestinian territory where Palestinian labour was permitted to work in Israel from 1968 onwards. Elaborating on the results of the policy which saw a gradual increase in the number of Palestinian workers

commuting daily from a negligible proportion of the actively participating labour force to 35 percent of all employed persons and 60 percent of all wage paid workers the book studies this unique case which embodies characteristics from permanent migration situations not only in the de jure but also the de facto sense insofar as it embeds higher risks and reallocates resources as if it was a permanent relocation scenario Illustrated with tables and econometric results the book identifies the determinants and implications of migrant labour from the West Bank using two broad methodologies the neoclassical and the historical structural method Each of these methods is divided into two branches the classical divided into price determined and a choice theoretic framework and the historical structural divided into dependency and Marxist theory In order to gain a comprehensive understanding of the situation all four perspectives are employed in the investigation In doing so what emerges is a structure for the book which takes shape along the different lines of migration literature The book provides new insights into the making of wage labour and labour migration theory

War Virtually Roberto J. González, 2024-04-23 A critical look at how the US military is weaponizing technology and data for new kinds of warfare and why we must resist *War Virtually* is the story of how scientists programmers and engineers are racing to develop data driven technologies for fighting virtual wars both at home and abroad In this landmark book Roberto J González gives us a lucid and gripping account of what lies behind the autonomous weapons robotic systems predictive modeling software advanced surveillance programs and psyops techniques that are transforming the nature of military conflict González a cultural anthropologist takes a critical approach to the techno utopian view of these advancements and their dubious promise of a less deadly and more efficient warfare With clear accessible prose this book exposes the high tech underpinnings of contemporary military operations and the cultural assumptions they're built on Chapters cover automated battlefield robotics social scientists involvement in experimental defense research the blurred line between political consulting and propaganda in the internet era and the military's use of big data to craft new counterinsurgency methods based on predicting conflict González also lays bare the processes by which the Pentagon and US intelligence agencies have quietly joined forces with Big Tech raising an alarming prospect that someday Google Amazon and other Silicon Valley firms might merge with some of the world's biggest defense contractors *War Virtually* takes an unflinching look at an algorithmic future where new military technologies threaten democratic governance and human survival

Diversity and Education Michael Vavrus, 2014-11-01 **Cold War Anthropology** David H. Price, Professor of Religious Studies History Jewish Studies and Medieval Studies David H Price, 2016-04-01 In *Cold War Anthropology* David H Price offers a provocative account of the profound influence that the American security state has had on the field of anthropology since the Second World War Using a wealth of information unearthed in CIA FBI and military records he maps out the intricate connections between academia and the intelligence community and the strategic use of anthropological research to further the goals of the American military complex The rise of area studies programs funded both openly and covertly by government agencies encouraged anthropologists to produce

work that had intellectual value within the field while also shaping global counterinsurgency and development programs that furthered America's Cold War objectives. Ultimately the moral issues raised by these activities prompted the American Anthropological Association to establish its first ethics code. Price concludes by comparing Cold War era anthropology to the anthropological expertise deployed by the military in the post 9/11 era.

Social Science Goes to War Montgomery McFate, Janice H. Laurence, 2015-01-11 This volume addresses themes of enduring importance for US national security such as the role of US forces in nation building, challenges of interagency coordination, innovation during wartime, and the larger strategic issues of the need for socio-cultural knowledge in American foreign policy. This book gives the reader insight into the growth and development of HTS, the largest single investment ever made by the Department of Defense in applied social science. This book also conveys what the experience of working on a small team in a combat zone was really like, both good and bad.

Anthropological Intelligence David H. Price, 2008-06-09 Cultural history of anthropologists' involvement with US intelligence agencies as spies and informants during World War II.

Anthropology and Global Counterinsurgency John D. Kelly, Beatrice Jauregui, Sean T. Mitchell, Jeremy Walton, 2010-04-15 Global events of the early twenty-first century have placed new stress on the relationship among anthropology, governance, and war. Facing prolonged insurgency, segments of the US military have taken a new interest in anthropology, prompting intense ethical and scholarly debate. Inspired by these issues, the essays in *Anthropology and Global Counterinsurgency* consider how anthropologists can and should respond to military overtures and they articulate anthropological perspectives on global war and power relations. This book investigates the shifting boundaries between military and civil state violence, perceptions and effects of American power around the globe, the history of counterinsurgency doctrine and practice, and debate over culture, knowledge, and conscience in counterinsurgency. These wide-ranging essays shed new light on the fraught world of Pax Americana and on the ethical and political dilemmas faced by anthropologists and military personnel alike when attempting to understand and intervene in our world.

Considering Anthropology and Small Wars Montgomery McFate, 2020-12-17 This book includes a variety of chapters that consider the role and importance of anthropology in small wars and insurgencies. Almost every war since the origins of the discipline at the beginning of the 19th century has involved anthropology and anthropologists. The chapters in this book fall into the following myriad categories of military anthropology: Anthropology for the military. In some cases anthropologists participated directly as uniformed combatants, having the purpose of directly providing expert knowledge with the goal of improving operations and strategy. Anthropology of the military. Anthropologists have also been known to study state militaries. Sometimes this scholarship is undertaken with the objective of providing the military with information about its own internal systems and processes in order to improve its performance. At other times the objective is to study the military as a human group to identify and describe its culture and social processes. Anthropology of war. As a discipline, anthropology has also had a long history of studying warfare itself. This book considers the anthropology of small wars and

insurgencies through an analysis of the Islamic State's military adaptation in Iraq Al Shabaab recruiting in Somalia religion in Israeli combat units as well as many other topics The chapters in this book were originally published as a special issue of the journal *Small Wars Insurgencies* *Anthropology At the Dawn of the Cold War* Dustin M. Wax, 2008-01-20 This book breaks new ground in the history of anthropology opening up an explicit examination of anthropology in the Cold War era With historical distance Cold War anthropology has begun to emerge as a distinct field within the discipline This book brings a number of different approaches to bear on the questions raised by anthropology's Cold War history The contributors show how anthropologists became both tools and victims of the Cold War state during the rise of the United States in the post War period Examining the intersection between science and power this book is a compelling read for anthropologists historians sociologists and anyone interested in the way in which colonial and neo colonial knowledge is produced and constructed

Anthropology in the Armed Services Louis Dupree, 1958 **Military Anthropology** Montgomery McFate, 2018 A candid reassessment of the role of anthropologists in mediating encounters between Western armies and non Western peoples

Anthropologists in the SecurityScape Robert Albro, 2012 Debate about the role of social scientists in national security environments is being fought with renewed passion This book provides a foundation for the debate with accounts of the work of cultural physical and linguistic anthropologists and archaeologists in governmental and military organizations and the private sector Practicing Military Anthropology Robert A. Rubinstein, Kerry B. Fosher, Clementine K. Fujimura, 2012 The relationship between anthropologists and the United States military has commanded a lot of attention especially in regard to the controversial Human Terrain System HTS that embeds anthropologists in military operations in Iraq and Afghanistan Conversations at professional meetings in the pages of disciplinary journals and in books have been heated and frequently harshly polemical with some participants branding military anthropologists as war criminals In this book a number of anthropologists who have either worked with the US armed forces or who teach at military service academies reflect on what they do and teach in their military anthropologist personae Through their personal accounts they show that the practice of military anthropology is much more than HTS and that they are more than mere technicians of the state as critics allege Revealed here are thoughtful and moving essays that deal with issues of ethics morality and professional decorum Whether one agrees with these accounts or not they do show that the linkage of anthropology with the military is complex and multi faceted and the importance of frank and open exchanges of ideas for dealing with the relationship of military anthropology to the wider discipline Essential reading for those considering anthropology as a career those concerned about the relationship of the academy to the military and for those seeking to fathom transformations in our lives following 9 11 and the ongoing war against terror
