Wasted Lives Modernity And Its Outcasts:

Wasted Lives Zygmunt Bauman, 2013-04-26 The production of human waste or more precisely wasted lives the superfluous populations of migrants refugees and other outcasts is an inevitable outcome of modernization It is an unavoidable side effect of economic progress and the quest for order which is characteristic of modernity As long as large parts of the world remained wholly or partly unaffected by modernization they were treated by modernizing societies as lands that were able to absorb the excess of population in the developed countries Global solutions were sought and temporarily found to locally produced overpopulation problems But as modernization has reached the furthest lands of the planet redundant population is produced everywhere and all localities have to bear the consequences of modernity's global triumph They are now confronted with the need to seek in vain it seems local solutions to globally produced problems The global spread of the modernity has given rise to growing quantities of human beings who are deprived of adequate means of survival but the planet is fast running out of places to put them Hence the new anxieties about immigrants and asylum seekers and the growing role played by diffuse security fears on the contemporary political agenda With characteristic brilliance this new book by Zygmunt Bauman unravels the impact of this transformation on our contemporary culture and politics and shows that the problem of coping with human waste provides a key for understanding some otherwise baffling features of our shared life from the strategies of global domination to the most intimate aspects of human relationships

popular Infecting the City public art festival and the persistent state of restlessness of a city still grappling with the legacies of colonialism inequality and racial segregation The concept of restlessness provides a critical tool for understanding public space in a country desiring economic and political stability as expressed through transient art forms such as Santu Mofokeng's billboard photography The volume shifts the focus of public art discourse in South Africa from static forms like monuments and statues to dynamic temporary interventions offering fresh perspectives on public art as an interactive community engaged practice The interventions engage with protest public intimacy audience interaction and the disrupted topography of apartheid cities Through an examination of seminal artworks contributors address diverse forms of expression that range from site specific performances immersive installations film and photography to online performances They introduce new perspectives on public sphere performance such as Khanyisile Mbongwa's reimagining of township alleyways for public encounters and Mbongeni Mtshali's study of everyday performances that challenge colonial and neo colonial spatial organisation The book is divided into three sections The Restless City Public Art for Multiple Publics and Land Home Belonging It features both critical essays and visual documentation of the powerful often temporary public artworks providing readers with an opportunity to explore cutting edge artistic practices that tackle global issues like inequality segregation and public space reclamation Restless Infections reads public spheres through a multi and interdisciplinary lens and makes a strong contribution to our understanding of the complexities of public art in South Africa It will appeal to academics students and practitioners across the fields of art cultural studies and social justice
