Water Engineering Hydraulics Distribution And Treatment:

Water Engineering Nazih K. Shammas, Lawrence K. Wang, 2015-05-26 Details the design and process of water supply systems tracing the progression from source to sink Organized and logical flow tracing the connections in the water supply system from the water's source to its eventual use Emphasized coverage of water supply infrastructure and the design of water treatment processes Inclusion of fundamentals and practical examples so as to connect theory with the realities of design Provision of useful reference for practicing engineers who require a more in depth coverage higher level students studying drinking water systems as well as students in preparation for the FE PE examinations Inclusion of examples and homework questions in both SI and US units

Handbook of Advanced Industrial and Hazardous Wastes

Management Lawrence K. Wang, Mu-Hao S. Wang, Yung-Tse Hung, Nazih K. Shammas, Jiaping Paul Chen, 2017-10-30 This volume provides in depth coverage of environmental pollution sources waste characteristics control technologies management strategies facility innovations process alternatives costs case histories effluent standards and future trends in waste treatment processes It delineates methodologies technologies and the regional and global effects of important pollution control practices It focuses on specific industrial and manufacturing wastes and their remediation Topics include heavy metals electronics chemical and textile manufacturing

Control of Heavy Metals in the Environment Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, Jiaping Paul Chen, 2025-02-28 Offering broad coverage of advanced principals and applications Control of Heavy Metals in the Environment mini series provides chemical and environmental engineers with the most complete resource available on the remediation of heavy metal contaminants with an emphasis on advanced and alternative approaches It investigates a variety of environmental pollution sources and waste characteristics that require a multitude of remediation methods It then details the latest in clean tech advances including fungal bioprocesses and addresses recycling and disposal techniques as well as metals pollution from the transportation industry The authors delve into costs and effluent standards and offer several illustrative case histories to illustrate the regional and global effects of key pollution control practices Features Provides technical information for industrial and hazardous waste treatment Discusses the control treatment and management of metal emissions from motor vehicles Explores the newest methods of clean production and waste minimization Includes numerous figures tables examples and case histories

Remediation of Heavy Metals in the Environment Jiaping Paul Chen, Lawrence K. Wang, Mu-Hao S. Wang, Yung-Tse Hung, Nazih K. Shammas, 2016-11-18 This book provides in depth coverage of environmental pollution sources waste characteristics control technologies management strategies facility innovations process alternatives costs case histories effluent standards and future trends in waste treatment processes It delineates methodologies technologies and the regional and global effects of important pollution control practices It focuses on toxic heavy metals in the environment various heavy metal decontamination technologies brownfield restoration and industrial agricultural and radioactive waste management It

discusses the importance of metals such as lead chromium cadmium zinc copper nickel iron and mercury

Water and Wastewater Engineering, Volume 1 Lawrence K. Wang, Mu-Hao Sung Wang, Nazih K. Shammam, 2024-04-16 WATER and WASTEWATER ENGINEERING The classic guide to water and wastewater engineering returns Water and wastewater engineering is a crucial branch of civil engineering dealing with water resources and with the challenges posed by water and wastewater Generations of engineers have developed techniques for purifying desalinating and transforming water and wastewater techniques which have only grown more critical as climate change and global population growth create new challenges and opportunities There has never been a more urgent need for a comprehensive guide to the management of water and its various engineering subdisciplines Water and Wastewater Engineering Hydraulics Hydrology and Management 4th edition offers key fundamentals in a practical context to engineers and engineering students Updated to address growing urbanization and industrialization with corresponding stress on water and wastewater systems this vital textbook has been fully revised to reflect the latest research and case studies This volume focuses primarily with hydrology and hydraulics along with chapters treating groundwater and surface water sources Readers of Hydraulics Hydrology and Management will also find Coverage of water supply water sources water distribution and more Detailed treatment of both sanitary sewer and urban stormwater drainage In depth analysis of infrastructure issues with respect to water resources pumping and handling This textbook is ideal for advanced students in civil environmental and chemical engineering departments as well as for early career engineers plant managers and urban and regional planners

Environmental Flotation Engineering Lawrence K. Wang, Mu-Hao Sung Wang, Nazih K. Shammam, Donald B. Aulenbach, 2021-02-12 This volume covers topics on humanitarian engineering education of the Lenox Institute of Water Technology and recent advances in potable water and wastewater flotation processes The specific advancements covered include chemical coagulation and precipitation enhancements first wave of flotation advancement for potable water treatment second wave of flotation technology advancement for wastewater treatment innovative circular gravity flotation fiber detection fiber separation independent physicochemical wastewater treatment systems primary flotation clarification secondary flotation clarification tertiary treatment activated sludge and flotation wastewater treatment cold weather wastewater conditions operation and performance of the AquaDAF process system operation and performance of the Clari DAF process system water purification spectrophotometric determination of dissolved proteins biological and physicochemical sequencing batch reactors and sedimentation and flotation comparisons The book will be of value to advanced undergraduate and graduate students to designers of flotation systems and to scientists and researchers

Natural Resources and Control Processes Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, Nazih K. Shammam, 2016-08-10 This edited book has been designed to serve as a natural resources engineering reference book as well as a supplemental textbook This volume is part of the Handbook of Environmental Engineering series an incredible collection of methodologies that study the effects of pollution and waste in their three basic

forms gas solid and liquid It complements two other books in the series including Environmental and Natural Resources Engineering and Integrated Natural Resources Management that serve as a basis for advanced study or specialized investigation of the theory and analysis of various natural resources systems This book covers the management of many waste sources including those from agricultural livestock deep wells industries manufacturing dyes and municipal solid waste incinerators The purpose of this book is to thoroughly prepare the reader for understanding the sources treatment and control methods of toxic wastes shown to have harmful effects on the environment Chapters provide information on some of the most innovative and ground breaking advances in waste characterization control treatment and management from a panel of esteemed experts

Waste Treatment in the Biotechnology, Agricultural and Food Industries Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, 2023-11-30 This book and its sister book Volume 1 of the Handbook of Environmental Engineering HEE series have been designed to serve as a mini series covering waste treatment in biotechnology agricultural and food industries It is expected to be of value to advanced undergraduate and graduate students to designers of sustainable biological resources systems and to scientists and researchers The aim of these books is to provide information on bio environmental engineering and to serve as a basis for advanced study or specialized investigation of the theory and analysis of various agricultural and natural resources systems Volume 2 covers topics on a application of secondary flotation filtration and coagulant recycle for improvement of a pulp mill primary waste treatment facility b management of solid and hazardous wastes c microbial enzymes for wastewater treatment d a multi criteria approach to appropriate treatment technology selection for water reclamation e chemicals used in agriculture hazards and associated toxicity issues f biochar for adsorptive removal of pharmaceuticals from environmental water g treatment of palm oil mill effluent h treatment and management of solid waste by incineration i technologies for removal of volatile organic compounds VOC from industrial effluents and or potable water sources j treatment of healthcare waste

Environmental and Natural Resources Engineering Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, Nazih K.
