Water Law Poverty And Development:

Water Law, Poverty, and Development Philippe Cullet, 2009-07-16 This monograph comprehensively examines water law regulations and reform in the present decade going beyond a simple analysis of existing water law and regulations to encompass environmental social economic and human rights aspects of water as a natural resource Using the specific case of India and on the related international law and policy framework that directly influences water regulatory developments in India this book offers what will be the first and only analysis of water law reforms taking place at the national level in many developing countries in their domestic and international context On the one hand international freshwater law remains under developed and existing legal instruments such as the 1997 UN Convention only address a limited set of relevant issues Yet the international law and policy framework concerning freshwater is increasingly important in shaping up law reforms taking place at the national level in particular in developing countries Indeed non binding resolutions such as the Dublin Statement on Water and Sustainable Development 1992 have had an immense influence on water law reforms in most developing countries This book seeks to conceive of and analyse freshwater regulation in a broader context and go beyond a literature that either lauds or criticises ongoing water sector reforms to provide an analytical basis for the reforms which all countries will have to adopt in the near or medium term future

Water Law in India Philippe Cullet, Sujith Koonan, 2018-02-15 First published in 2011 Water Law in India is the only book to offer a comprehensive survey of the legal instruments concerning water in India It presents a variety of national and state level instruments that make up the complex and diverse field of water law and policy This book fills a critical gap in the study of water law providing a rich reference point for the entire gamut of legal mechanisms available in India This

edition has been extensively revised to include new instruments on water regulation such as the draft National Water Framework Bill 2016 and the Model Groundwater Sustainable Management Act 2016 new water related instruments in such varied fields as criminal law land acquisition law and rural employment legislation and a chapter on international legal instruments Chapters on drinking water supply environmental dimensions of water conservation water infrastructure for irrigation and flood control groundwater regulation and institutions catering to water have been thoroughly updated for a complete coverage of water law

An Endogenous Theory of Property Rights Peter Ho, 2018-10-15 From a neo liberal neo classical paradigm secure formal and private property rights are crucial to fostering sustained development Institutions that fail to respond to shifting socio economic opportunities are thus forced to make new arrangements The enigma is posed by developments on the ground Why would the removal of authoritarian institutions during the Arab Spring or Iraq War not increase market efficiency but rather cause the reverse while China and India despite persisting insecure informal and common institutions featured sustained growth This collection posits that understanding these paradoxes requires a refocusing from form to function detached from normative assumptions about institutional appearance In so doing three things are accomplished First starting from case studies on land it is ascertained that the argument can be meaningfully extended to labour capital and beyond Second the argument validates the Credibility Thesis that is once institutions persist they fulfil a function Third the collection studies development broadly construed by including the modes of production and beyond the rural and urban the developed and developing This is why it reviews property rights from China and India to Turkey Mexico and Malaysia covering issues such as customary rights and privatization mining and pastoralism dam building and irrigation but also state owned banks trade unions and notaries This book was originally published as a special issue of *The Journal of Peasant Studies*

The Rio Declaration on Environment and Development Jorge E. Viñuales, 2015-02-05 The international community has long grappled with the issue of safeguarding the environment and encouraging sustainable development often with little result The 1992 Rio Declaration on Environment and Development was an emphatic attempt to address this issue setting down 27 key principles for the international community to follow These principles define the rights of people to sustainable development and the responsibilities of states to safeguard the common environment The Rio Declaration established that long term economic progress required a connection to environmental protection It was designed as an authoritative and comprehensive statement of the principles of sustainable development law an instrument to take stock of the past international and domestic practice a guide for the design of new multilateral environmental regimes and as a reference for litigation This commentary provides an authoritative and comprehensive overview of the principles of the Declaration written by over thirty inter disciplinary contributors including both leading practitioners and academics Each principle is analysed in light of its origins and rationale The book investigates each principle s travaux pr paratoires setting out the main points of controversy and the position of different countries or groups It analyses the scope and dimensions of

each principle providing an in depth understanding of its legal effects including whether it can be relied before a domestic or international court It also assesses the impact of the principles on subsequent soft law and treaty development as well as domestic and international jurisprudence The authors demonstrate the ways in which the principles interact with each other and finally provide a detailed analysis of the shortcomings and future potential of each principle This book will be of vital importance to practitioners scholars and students of international environmental law and sustainable development

Public-Private Partnerships in Global Development Timothy E. Nielander, 2020-11-27 The global development community has articulated many collective aspirations in the Sustainable Development Goals SDGs aimed at transforming the world Given the complicated issues that accompany globalization State and non State actors continue to explore the utility of public private cooperation mechanisms Public private cooperation initiatives strive for global governance mechanisms involving oversight by all of the actors and operating frameworks that include multiple states intergovernmental organizations NGOs private sector companies and prominent individuals EDITED BOOK ON HUMAN RIGHTS & STATE OBLIGATIONS Dr. K. Advancing Environmental Justice for Marginalized Communities in India Alan Diduck, Kirit Patel, Aruna Kumar Malik, 2021-09-16 This interdisciplinary collection examines social equity and environmental justice in India It assesses the effectiveness of environmental policies and institutions in rendering justice for marginalized communities while ensuring protection of the environment It also analyses the influence of the neoliberal state and its political economies on the development and outcomes of these policies and institutions The book provides a unique perspective on environmental justice because of its consistent emphasis on social justice rather than the prevailing predominant analyses from legal or environmental perspectives It explores the themes of effectiveness and equity as they pertain to public policy instruments such as environmental impact assessment environmental licensing and enforcement public hearings and environmental activism strategies The four interlinked dimensions of environmental justice namely recognition justice procedural justice distributive justice and restorative justice provide the core of the book s conceptual framework The contributions draw on ideas and methods from development studies environmental geography environmental law and policy natural resource management public administration and political economy The book concludes by considering planning policy and institutional reforms and community based initiatives that are needed to promote and protect environmental justice in India Offering an important reference for researchers and scholars this book will appeal to those in law geography environmental studies natural resource management development studies sociology and political science It will also be of interest to community based researchers environmentalists and other civil society activists natural resource managers and policy makers *Global*

Political Ecology Richard Peet, Paul Robbins, Michael Watts, 2010-12-17 The world is caught in the mesh of a series of environmental crises. So far attempts at resolving the deep basis of these have been superficial and disorganized. Global Political Ecology links the political economy of global capitalism with the political ecology of a series of environmental disasters and failed attempts at environmental policies. This critical volume draws together contributions from twenty-five leading intellectuals in the field. It begins with an introductory chapter that introduces the readers to political ecology and summarizes the book's main findings. The following seven sections cover topics on the political ecology of war and the disaster state, fuelling capitalism, energy scarcity and abundance, global governance of health bodies and genomics, the contradictions of global food capital, marginal product, effluents, waste and garbage, water as a commodity, a human right and power, the functions and dysfunctions of the global green economy, political ecology of the global climate and carbon emissions. This book contains accounts of the main currents of thought in each area that bring the topics completely up to date. The individual chapters contain a theoretical introduction linking in with the main themes of political ecology as well as empirical information and case material. Global Political Ecology serves as a valuable reference for students interested in political ecology, environmental justice and geography.

The Commons in a Glocal World Tobias Haller, Thomas Breu, Tine De Moor, Christian Rohr, Heinzpeter Znoj, 2019-04-30 This volume focuses on how in Europe the debate on the commons is discussed in regard to historical and contemporary dimensions, critically referencing the work of Elinor Ostrom. It also explores from the perspective of new institutional political ecology (NIPE) how Europe directly and indirectly affected and affects the commons globally. Most of the research on the management of commons pool resources is limited to dealing with one of two topics: either the interaction between local participatory governance and development of institutions for commons management or a political economy approach that focuses on global change as it is related to the increasingly globalised expansion of capitalist modes of production, consumption and societal reproduction. This volume bridges the two, addressing how global players affect the commons worldwide and how they relate to responses emerging from within the commons in a global-local-glocal world. Authors from a range of academic disciplines present research findings on recent developments on the commons, including historical insights, new innovations for participatory institutions building in Europe or several types of commons grabbing, especially in Africa, related to European investments and restrictions on the management of commons at the international level. European case studies are included, providing interesting examples of local participation in commons resource management while simultaneously showing Europe as a centre for globalized capitalism and its norms and values affecting the rest of the world, particularly developing countries. This book will be of interest to students and researchers from a wide range of disciplines, including natural resource management, environmental governance, political geography and environmental history.
