Ways Of Worldmaking Ways Of Worldmaking:

Ways of Worldmaking Nelson Goodman, 1978-01-01 Provides a workable notion of the kinds of skills and capacities that are central for those who work in the arts *Cultural Ways of Worldmaking* Vera Nünning, Ansgar Nünning, Birgit Neumann, 2010 Doctype html public w3c dtd html 4 0 transitional en html meta http equiv content type content text html charset iso 8859 1 meta content mshtml 6 00 6000 16939 name generator body Taking as its point of departure Nelson Goodman's theory of symbol systems as delineated in his seminal book *Ways of Worldmaking* this volume gauges the possibilities and perspectives offered by the worldmaking approach as a model for the study of culture The volume serves to demonstrate how specific media and narratives affect the worlds that are created and shows how Cultural Ways of Worldmaking Vera Nünning, Ansgar Nünning, Birgit Neumann, 2010-06-29 Taking as its point of departure Nelson Goodman's theory of symbol systems as delineated in his seminal book *Ways of Worldmaking* this volume gauges the possibilities and perspectives offered by the worldmaking approach as a model for the study of culture Its main objectives are to explore the usefulness and scope of the approach for the study of culture and to supplement Goodman's philosophy of worldmaking with a number of complementary disciplinary perspectives literary and cultural approaches and new questions and applications It focuses on three key issues or concepts which illuminate ways of worldmaking and their interdisciplinary relevance and ramifications viz 1 theoretical approaches to ways of worldmaking 2 the impact of media on ways of worldmaking and 3 narratives as ways of worldmaking The volume serves to demonstrate how specific media and narratives affect the worlds that are created and shows how these worlds are established as socially relevant It also illustrates the extent to which ways of worldmaking are imbued with cultural values and thus inevitably implicated in power relations **Varieties of World-making** Nathalie Karagiannis, Peter Wagner, 2007-01-01 Drawn from the elite ranks of sociology law international relations political philosophy and history this book cuts through polarized rhetoric to examine the global situation It proposes that the contemporary global network of business politics and culture be viewed from the interdisciplinary perspective of world making *Orbis Terrarum, Ways of Worldmaking* Museum Plantin-Moretus, Antwerpen Open, 2000 Against Relativism James Franklin Harris, 1992 Recent decades have witnessed the extraordinary growth of radical relativism a doctrine which now dominates the entire culture from popular music to journalism and from religion to school curricula According to the radical relativist creed any proposition can be true or false in relation to a chosen framework the evaluation of fundamental theories or paradigms is beyond argument there are no universal standards of rationality and methodologically Anything goes As James Harris explains in *Against Relativism* the new relativism undoes the work of the Enlightenment and inevitably leads to the conclusion that Galileo was wrong to insist that the Earth indeed moves Succor for relativism has come from many philosophical schools both Analytic and Continental Among the sources of the new relativism are the collapse of Logical Positivism and the shift within anthropology from a linear evolutionary model to numerous models

for understanding human culture In this detailed critique Professor Harris has selected the strongest and most plausible arguments for relativism within contemporary academic philosophy He turns the techniques of relativism against relativism itself showing that it is ultimately self refuting or otherwise ineffectual He demonstrates that Quine s rejection of the analytic synthetic distinction appeals to the very analytic truths Quine tries to dispel that Kuhn s celebrated account of paradigms must be either self refuting or unintelligible that Rorty cannot avoid presupposing the epistemological principles he attacks and that although feminist criticisms of science exert a welcome corrective attempts to develop a distinctively feminist science are misconceived and unhelpful to feminism In all these discussions the author explains the arguments he is criticizing for the benefit of the non specialist reader so that this work can serve as a partisan but fair introduction to some of the most important of present day philosophy

Narratology in the Age of Cross-disciplinary Narrative Research

Sandra Heinen,Roy Sommer,2009 Narrative Research has developed into an international and interdisciplinary field This volume collects fifteen essays which look at narrative and narrativity from various perspectives including literary studies and hermeneutics cognitive theory and creativity research metaphor studies and film theory and intermediality

Theories and Things Willard Van Orman Quine,1981 Here are the most recent writings some of them unpublished of the preeminent philosopher of our time Quine is always whatever his subject an elegant writer witty precise and forceful Admirers of his earlier books will welcome this new volume

The Art of World-Making Harry Gould,2017-06-26 On its face *The Art of World Making* focuses on honouring the career of Nicholas Greenwood Onuf and his contributions to the study of international relations of equal importance however while using Onuf s work as their touchstone the contributions to this volume range widely across IR theory making important interventions in some of the most important topics in the field today The volume considers the place of Constructivism and Republicanism in the field of international relations and the contestation that accompanies the question of their place in the field asking What explains the dominance of some forms of Constructivism and the relative lack of influence of other forms What can rule oriented Constructivism the focus here provide our field that other forms of Constructivism have been unable to Into what new and productive directions can Constructivism be taken What are its gaps and what are the resources to remedy those gaps What can Republicanism tell us about ongoing issues in international law global governance liberalism and crisis Drawing together essays from some of the leading scholars in the field space is given after each chapter for a detailed and highly personal response piece to each contribution written by Onuf This unique volume will be essential reading for students and scholars of international relations

Goodman for Architects Remei Capdevila-Werning,2013-10-15 American philosopher Nelson Goodman 1906 1998 was one of the foremost analytical thinkers of the twentieth century with groundbreaking contributions in the fields of logic philosophy of science epistemology and aesthetics This book is an introduction to the aspects of Goodman s philosophy which have been the most influential among architects and architectural theorists Goodman specifically discussed architecture in his major work on

aesthetics *The Languages of Art* *An Approach to a Theory of Symbols* 1968 and in two essays *How Buildings Mean* 1985 and *On Capturing Cities* 1991 His main philosophical notions in *Ways of Worldmaking* 1978 also apply well to architecture Goodman's thought is particularly attractive because of its constructive aspect there is not a given and immutable world but both knowledge and reality are constantly built and rebuilt Whereas other theories such as deconstruction implicitly entail an undoing of modern precepts Goodman's conception of world making offers a positive constructive way to understand how a plural reality is made and remade Goodman's approach to architecture is not only relevant thinking in providing new insights to understanding the built environment but serves also as an illustration of analytical thinking in architecture This book shows that the methods concepts and ways of arguing characteristic of analytical philosophy are helpful tools to examine buildings in a novel and fruitful way and they will certainly enhance the architect's critical skills when designing and thinking about architecture
