Allen, 1968 **Sound Matters** Margaret E. Lee, 2018-11-06 Sound matters The New Testament's first audiences were listeners not readers They heard its compositions read aloud and understood their messages as linear streams of sound To understand the New Testament's meaning in the way its earliest audiences did we must hear its audible features and understand its words as spoken sounds Sound Matters presents essays by ten scholars from five countries and three continents who explore the New Testament through sound mapping a technique invented by Margaret Lee and Bernard Scott for analyzing Greek texts as speech Sound Matters demonstrates the value and uses of this technique as a prelude and aid to interpretation The essays that make up this volume illustrate the wide range of interpretive possibilities that emerge when sound mapping restores the spoken sounds of the New Testament and revives its living voice **Manuscripts of the Greek**

Studies on ›P. Oxy.‹ XXXI 2537 Linda Rocchi, 2020-11-09 Among the very few papyri devoted to the work of the Attic orator Lysias one of the most interesting is certainly P Oxy XXXI 2537 Dated palaeographically to the late 2nd early 3rd century CE it contains the summaries of 22 Lysianic speeches 18 of which were formerly unknown or known just by the title and brief quotations in lexicographers And yet despite the undeniable richness of this collection the papyrus has generally received little attention from modern scholarship and no complete survey of its many aspects of significance has been yet produced This work aims to fill this gap along with a new transcription and critical edition based on autopsy of the papyrus this book provides a translation and the first exhaustive commentary of the text Through careful textual and juridical analysis the author examines both the relationship between summaries and speeches with a discussion of the significant legal features of each procedure and the overall importance of this papyrus for the history of the corpus of Lysias The book will thus be of interest for papyrologists

dimension are crucial to interpretation Sound Mapping the New Testament explores writing technology in the Greco Roman world and uses ancient Greek literary criticism for descriptions of grammar as a science of sound and literary composition as a woven fabric of speech Based on these perspectives and a close analysis of writings from the four Gospels Paul and Q Lee and Scott advance a theory of sound analysis that enables modern readers to hear the New Testament afresh This second edition includes a new introduction which reviews a decade of sound mapping scholarship
