Warships of the Great War Era David Hobbs,2014-10-14 The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world many of which are official contemporary artefacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid seventeenth century to the present day As such they represent a three dimensional archive of unique importance and authority Treated as historical evidence they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve This book is one of a series that takes a selection of the best models to tell the story of specific ship types in this case the various classes of warship that fought in the First World War from dreadnoughts to coastal motor boats It reproduces a large number of model photos all in full colour and including many close up and detail views These are captioned in depth but many are also annotated to focus attention on interesting or unusual features Although pictorial in emphasis the book weaves the pictures into an authoritative text producing an unusual and attractive form of technical history

Wooden Warship Construction

Brian Lavery, 2017-04-30 A wonderful book detailing the construction of the Royal Navy's sailing warships from the maritime historian and author of *Nelson's Navy: Pirates and Privateers*. The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world, many of which are official contemporary artifacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid-seventeenth century to the present day. As such, they represent a three-dimensional archive of unique importance and authority. Treated as historical evidence, they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve. This book takes a selection of the best models to both describe and demonstrate the development of warship construction in all its complexity from the beginning of the 18th century to the end of wooden shipbuilding. For this purpose, it reproduces a large number of model photos, all in full color and including many close-up and detail views. These are captioned in depth, but many are also annotated to focus attention on interesting or unusual features which can be shown far more clearly than described. Although pictorial in emphasis, the book weaves the pictures into an authoritative text, producing an unusual and attractive form of technical history. This book includes plentiful visual representations of actual ships in model form, and the accompanying graphics make for wonderful reading. I cannot express enough how enjoyable this book is to read. *Spotter Up*: A high-quality book which is recommended to all ship historians and modellers. *Military Modelling*
