

An aerial photograph of a dry, cracked riverbed. Several boats are stranded on the sand, including a large green and white tugboat in the foreground and several smaller boats further back. The sand is light brown and shows deep, winding cracks. The sky is not visible, but the overall scene is one of extreme drought.

Water in Crisis Peter H. Gleick, 1993 Among the most compelling environmental issues of today and tomorrow are those concerning the world's fresh water resources Peter H Gleick's important new volume Water in Crisis addresses the timely and sometimes controversial aspects of world water use At stake are water quality quantity and possible future conflicts over shared international water resources Nine essays by leading specialists from fields as diverse as hydrology zoology and law among others cover such issues as the status of developments in international water law hydroelectric power the possible effects of climatic change on water resources and the state of fresh water fisheries Particular chapters explore access to clean drinking water and sanitation the use of water for energy and food production the quality of rivers lakes and inland seas and the condition of natural aquatic ecosystems A joint project of the Pacific Institute and the Stockholm Environment Institute this book is a comprehensive guide to the world's fresh water resources Hydrologists engineers policy makers professionals in the environmental sciences as well as lay readers will find Water in Crisis a dynamic resource and information packed reference More than 200 tables of fresh water data supplement this important volume *Vision for Water and Nature*, 2000 **What is Water?** Jamie Linton, 2010 We all know what water is and we often take it for granted

Because it seems so natural we seldom question how we see water But the spectre of a worldwide water crisis suggests that there might be something fundamentally wrong with the way we think about water Jamie Linton dives into the history of the modern concept of water that water can be stripped of its wider environmental social and cultural contexts and reduced to a

scientific abstraction to mere H₂O This abstraction has given modern society licence to dam divert and manipulate water with impunity giving rise to a growing suite of problems Linton argues that part of the solution to the water crisis involves deliberately reinvesting water with social content

A World of Water P. Boomgaard, 2007-01-01 Water in its many guises has always played a powerful role in shaping Southeast Asian histories cultures societies and economies This volume the rewritten results of an international workshop with participants from eight countries contains thirteen essays representing a broad range of approaches to the study of Southeast Asia with water as the central theme As it was exposed to the sea the region was more accessible to outside political economic and cultural influences than many landlocked areas Easy access through sea routes also stimulated trade from an early age However the same easy access made Southeast Asia vulnerable to political control by strong outsiders The sea is moreover a source of food but also of many hazards At the same time Southeast Asian societies and cultures are confronted with and permeated by water from heaven in the form of rain flash floods irrigation water water in rivers brooks and swamps water driven power plants and pumped or piped water in addition to water as a carrier of sewage and pollution Finally the volume deals with the role of water in classification systems beliefs myths illness and healing

Groundwater around the World Jean Margat, Jac van der Gun, 2013-03-19 This book presents a unique and up to date summary of what is known about groundwater on our planet from a global perspective and in terms of area specific factual information Unlike most textbooks on groundwater it does not deal with theoretical principles but rather with the overall picture that emerges as a result of countless observations studies and other activities related to groundwater in all parts of the world The focus is on showing the role and geographical diversity of groundwater a natural resource of great importance in daily life but poorly understood by the general public and even by many water sector professionals The book starts by analysing groundwater in the context of the hydrological cycle Subsequently groundwater systems as physical units with their boundaries mainly defined by geological conditions are reviewed The next chapter looks at groundwater as a resource paying attention among others to its quantity and quality to the differentiation between renewable and non renewable resources and to the techniques for withdrawing groundwater This is followed by a systematic documentation of the quantities of groundwater withdrawn and used around the world and of the corresponding shares of groundwater in each of the main water use sectors After that steadily growing needs for groundwater management interventions are identified resulting from local human activities and global change including demography economic development and climate change Finally groundwater resources management is addressed and real life cases are described that illustrate actions taken and experiences with different issues in different parts of the world The authors attempted to write this book in such a way that it is accessible to a wider readership than just groundwater professionals It will also benefit non groundwater specialists who work in groundwater related fields water managers land use planners environmentalists agronomists engineers economists lawyers and journalists by broadening their understanding of groundwater and making them aware of the huge variety of

groundwater settings Groundwater specialists will use the book as a convenient reference on the geographical diversity of groundwater Part of the contents or interpretations offered may even be new to them or enhance their knowledge of some aspects The many maps tables and references will save much time for those who would otherwise have to search elsewhere for basic information on the globe s groundwater Agricultural development: New perspectives in a changing world Otsuka, Keijiro, ed.,Fan, Shenggen, ed.,2021-01-14 Agricultural Development New Perspectives in a Changing World is the first comprehensive exploration of key emerging issues facing developing country agriculture today from rapid urbanization to rural transformation to climate change In this four part volume top experts offer the latest research in the field of agricultural development Using new lenses to examine today s biggest challenges contributors address topics such as nutrition and health gender and household decision making agrifood value chains natural resource management and political economy The book also covers most developing regions providing a critical global perspective at a time when many pressing challenges extend beyond national borders Tying all this together Agricultural Development explores policy options and strategies for developing sustainable agriculture and reducing food insecurity and malnutrition The changing global landscape combined with new and better data technologies and understanding means that agriculture can and must contribute to a wider range of development outcomes than ever before including reducing poverty ensuring adequate nutrition creating strong food value chains improving environmental sustainability and promoting gender equity and equality Agricultural Development New Perspectives in a Changing World with its unprecedented breadth and scope will be an indispensable resource for the next generation of policymakers researchers and students dedicated to improving agriculture for global wellbeing *Sustaining Water Quality - From Local Challenges to Global Solutions* ,2025-02-05 Sustaining Water Quality From Local Challenges to Global Solutions explores the challenges and solutions for water quality in a rapidly changing world This book takes readers on a journey through innovative technologies regulations and multidisciplinary methodologies for the management and sustainability of water resources protecting the environment and biodiversity

Security of Public Water Supplies Rolf A. Deininger,Peter Literathy,Jamie Bartram,2012-12-06 The best of all things is water Pindar 460 B C The provision of secure drinking water for its citizens is an aim of every government and is a priority item to all the NATO and CP countries The quantity of water in most of these countries is usually adequate but the quality in many cases is not With the development of new analytical methods one suddenly finds new substances of human origin in drinking water Also new microorganisms and their toxins pass through the conventional treatment plants to show up in the finished water What aU of this means to public health is not quite clear at the moment but it seems that increased vigilance is necessary to provide safe drinking water to all citizens The NATO Advanced Research Workshop was organized to focus on five major areas of concern Inorganic contaminants focusing on arsenic and copper Organic contaminants focusing on petroleum products and insecticides and pesticides Biological bacteriological problems in raw water finished water and in

the distribution system River water watch and surveillance systems The role of research the economics of privatization the support of international organizations This volume presents the papers that were delivered at the workshop over a period of four and one half days The workshop was attended by over 40 scientists government officials and academics from 20 NATO and CP countries

Water Resource Conflicts and International Security Dhirendra K. Vajpeyi, 2012-01-01 Water Resource Conflicts and International Security A Global Perspective is an edited collection by Dhirendra K Vajpeyi which analyzes the increasing global demand for water in economic and social development and the dire need to efficiently manage this vital natural resource particularly in water scarce countries in the Middle East Asia and Africa Several environmental and human induced factors such as urbanization industrialization climate change and agricultural needs have created a near crisis situation in many countries Subsequently there is an increasingly intense competition to utilize available water resources in these most heavily affected regions transboundary rivers lakes and streams which are shared by more than one country pose potential for political conflict armed conflict and in the best of cases cooperation The contributors of Water Resource Conflicts and International Security present ten case studies in seven chapters highlighting the competition between countries in Asia Africa and the Middle East In his conclusion Dhirendra K Vajpeyi suggests several policy measures that governments may implement in order to minimize the potential for conflict
