Name _____

1. A wave front is the portion of the medium's surface in which all particles are _____. The front is always _____ to the direction the wave is traveling.

Use dotted lines to draw the wave fronts created by these adjacent waves. Use an arrow to show the direction of the wave.

2. The turning back of a wave at a boundary of a new medium is called _____. If the new medium is very similar to the old, (most, little) will be transmitted and (most, little) will be reflected. For the following examples, consider the new medium to be very different from the old, so almost all of the wave will be _____.

Draw the reflected waves:

3. The Law of Reflection states: Both angles are drawn from the wave to the _____, which is _____ to the boundary. For the following, draw the normal, the reflected wave, labeling $\angle i$ and $\angle r$ reflection. With dotted lines, draw the wave fronts.

Modern Plasma Physics: Volume 1, Physical Kinetics of Turbulent

Plasmas Patrick H. Diamond, Sanae-I. Itoh, Kimitaka Itoh, 2010-06-17 This three volume series presents the ideas models and approaches essential to understanding plasma dynamics and self organization for researchers and graduate students in plasma physics controlled fusion and related fields such as plasma astrophysics Volume I develops the physical kinetics of plasma turbulence through a focus on quasi particle models and dynamics It discusses the essential physics concepts and theoretical methods for describing weak and strong fluid and phase space turbulence in plasma systems far from equilibrium The book connects the traditionally plasma topic of weak or wave turbulence theory to more familiar fluid turbulence theory and extends both to the realm of collisionless phase space turbulence This gives readers a deeper understanding of these related fields and builds a foundation for future applications to multi scale processes of self organization in tokamaks and other confined plasmas This book emphasizes the conceptual foundations and physical intuition underpinnings of plasma turbulence theory
