Treating Aids Politics Of Difference Paradox Of Prevention:

Treating AIDS Thurka Sangaramoorthy, 2014-03-26 There is an inherently powerful and complex paradox underlying HIV AIDS prevention between the focus on collective advocacy mobilized to combat global HIV AIDS and the staggeringly disproportionate rates of HIV AIDS in many places In Treating AIDS Thurka Sangaramoorthy examines the everyday practices of HIV AIDS prevention in the United States from the perspective of AIDS experts and Haitian immigrants in South Florida Although there is worldwide emphasis on the universality of HIV AIDS as a social political economic and biomedical problem developments in HIV AIDS prevention are rooted in and focused exclusively on disparities in HIV AIDS morbidity and mortality framed through the rubric of race ethnicity and nationality Everyone is at equal risk for contracting HIV AIDS Sangaramoorthy notes but the ways in which people experience and manage that risk and the disease itself is highly dependent on race ethnic identity sexuality gender immigration status and other notions of difference Sangaramoorthy documents in detail the work of AIDS prevention programs and their effect on the health and well being of Haitians a transnational community long plagued by the stigma of being stereotyped in public discourse as disease carriers By tracing the ways in which public knowledge of AIDS prevention science circulates from sites of surveillance and regulation to various clinics and hospitals to the social worlds embraced by this immigrant community she ultimately demonstrates the ways in which AIDS prevention programs help to reinforce categories of individual and collective difference and how they continue to sustain the persistent and pernicious idea of race and ethnicity as risk factors for the disease

idea of race and ethnicity as risk factors for the disease **Prescribing HIV Prevention** Nicola Bulled, 2016-06-16 Critical health communication scholars point out that the acceptance of HIV risk prevention methods are bound inside inequitable structures of power and knowledge Nicola Bulled's in depth ethnographic account of how these messages are selected transmitted and reacted to by young adults in the AIDS torn population of Lesotho in southern Africa provides a crucial example of the importance of a culture centered approach to health communication She shows the clash between traditional western perceptions of how increased knowledge will increase compliance with western ideas of prevention and mixed messages offered by local religious educational and media institutions Bulled also demonstrates how structural and geographical forces prevent the delivery and acceptance of health messages and how local communities shape their own knowledge of health disease and illness This volume will be of interest to medical anthropologists and sociologists to those in health communication and to researchers working on issues related to HIV *Routledge Handbook on the Politics of Global Health* Richard Parker, Jonathan García, 2018-12-07 In the early twenty first century key public health issues and challenges have taken centre stage on the global scene and health has been placed at the heart of our collective aspirations for human development and well being But significant debate exists not only about the causes but also about the possible solutions for nearly all of the most important global health challenges Competing visions of the values and perspectives that should underlie global health policies have emerged ranging from an emphasis on cost effectiveness and resource constraints on one extreme to new calls for health and human rights and renewed calls for health and social justice on the other The role of different intergovernmental agencies bilateral or unilateral donors public or private institutions and initiatives has increasingly been called into question whilst the spread of neoliberal policies and programmes and existing international trade regimes and intellectual property rights are deeply implicated in relation to global health responses This volume critically evaluates how the global health industry has evolved and how the interests of diverse political and economic stakeholders are shaping the context of a rapidly changing institutional landscape Bringing together leading authors from across the world the Handbook's eight sections explore Critical perspectives on global health Globalisation neoliberalism and health systems The changing shape of global health governance Development assistance and the politics of global health Scale up scale down and the sustainability of global health programmes Intellectual property rights trade relations and global health Humanitarian emergencies and global health politics Human rights social justice and global health The Routledge Handbook on the Politics of Global Health addresses both the emerging issues and conceptualisations of the political strategies policy making processes and global governance of global health along with expanding upon and highlighting the critical priorities in this rapidly evolving field It provides an authoritative overview for students practitioners researchers and policymakers working in or concerned with the politics of public health around the globe **Public Secrets and Private Sufferings in the South African AIDS Epidemic** Jonathan Stadler, 2021-04-26 This book tells the story of the HIV

epidemic in South Africa and asks why after more than three decades it has not normalised Despite considerable efforts to prevent infection and ambitious targets set to end the epidemic by 2030 HIV infections are increasing among young women and treatment uptake and adherence have been uneven Focusing on the years preceding and following treatment access this book addresses why an end to AIDS may be misplaced optimism By examining public discourses and private narratives about infection illness and death this work reveals the contradictions between the lived experiences of AIDS suffering on the one hand and biomedical certainties on the other Based on long term ethnographic research in rural villages of the South African lowveld and within HIV prevention interventions in South Africa more generally this book offers an intimate perspective on the social and cultural responses to the epidemic

Queer Emergent Justin Perez, 2025-04-11 In *Queer Emergent* Justin Perez explores how advances in HIV prevention work alongside broader economic and political shifts in global health to shape queer subjectivities Drawing on ethnographic research among gay and transgender communities in urban Amazonian Peru Perez describes how queer social worlds emerge through scandalous storytelling a practice of exaggerating and embellishing stories about everyday life that transgresses social norms and hierarchies Perez shows that through such storytelling gay and transgender communities contested the assumptions of global HIV prevention's shift from the provision of costly antiretrovirals to the mitigation of social conditions like discrimination and stigma He argues that the global ambition to End AIDS by 2030 is not just a technical project oriented at ending the epidemic but also a project of sexual subjectification and ongoing social transformation By taking seriously the scandalous stories that gay and transgender Peruvians circulated as they responded to new forms of HIV prevention Perez reveals how they imagine possibilities of what could be as the effort to end AIDS continues to play out in the present

Living with HIV in Post-Crisis Times David A.B. Murray, 2021-08-18 Over the past decade effective prevention and treatment policies have resulted in global health organizations claiming that the end of the HIV AIDS crisis is near and that HIV AIDS is now a chronic but manageable disease These proclamations have been accompanied by stagnant or decreasing public interest in and financial support for people living with HIV and the organizations that support them minimizing significant global disparities in the management and control of the HIV pandemic The contributors to this edited collection explore how diverse communities of people living with HIV PLHIV and organizations that support them are navigating physical social political and economic challenges during these so called post crisis times

Epidemics and Society Frank M. Snowden, 2019-01-01 As seen on 60 Minutes a brilliant and sobering Paul Kennedy Wall Street Journal look at the history and human costs of pandemic outbreaks The World Economic Forum 1 book to read for context on the coronavirus outbreak Well written highly entertaining and relevant Financial Times Best Books of 2020 Readers Choice This sweeping exploration of the impact of epidemic diseases looks at how mass infectious outbreaks have shaped society from the Black Death to today In a clear and accessible style Frank M Snowden reveals the ways that diseases have not only influenced medical science and public health but also transformed the

arts religion intellectual history and warfare A multidisciplinary and comparative investigation of the medical and social history of the major epidemics this volume touches on themes such as the evolution of medical therapy plague literature poverty the environment and mass hysteria In addition to providing historical perspective on diseases such as smallpox cholera and tuberculosis Snowden examines the fallout from recent epidemics such as HIV AIDS SARS and Ebola and the question of the world s preparedness for the next generation of diseases
