Treatment of Stuttering, 2010 The Science and Practice of Stuttering Treatment Suzana Jelcic Jaksic, Mark Onslow, 2012-06-07

The Science and Practice of Stuttering Treatment A Symposium is a comprehensive resource for practitioners and researchers that spans the scientific basis and clinical management of stutters in people of all ages from preschoolers to adults Written by an international team of clinical and research leaders in the field of speech and language pathology as well as scientists from the fields of epidemiology and neurology the book offers a truly comprehensive coverage of contemporary stuttering management Each chapter provides information on the Theoretical Basis of the Treatment Outline of the Treatment Scientific Evidence for the Treatment Advantages and Disadvantages of the Treatment Planned Future Empirical Development and conclude with an in depth critical review This book is a must have resource for speech and language pathologists researchers and educators worldwide FEATURES Offers a rigorous critical review of each treatment Written by leading international experts in the field Completely up to date with the latest clinical and scientific research This book is the output from the Research Symposium held in Croatia in 2010 This text is unusual in that it not only reflects the content of the Symposium presentations but also reports the discussion that the presentations generated The discussions that ensued were recorded and transcribed The consistent organisation of each paper in the collection allows the reader to quickly access the critical information and to make direct comparisons across therapies and provides the reader with a comprehensive overview of a variety of speech restructuring programs The advantages disadvantages and the discussion sections in each chapter help the reader with appraisal of the material presented and to make some judgements about generality and value The reader feels exposed to the atmosphere and dynamics of the Symposium in a way that is rarely captured outside the conference auditorium A review from Sharon Millard PhD MRCSLT Research Lead and Expert Speech and Language Therapist The Michael Palin Centre Whittington Health London UK **Treatment of Stuttering**

Barry Guitar, 2010 Using an evidence based approach this textbook and clinical reference gives you the tools to determine the optimal treatment to eliminate or reduce a client's stuttering Moreover it guides you step by step through the implementation of all the latest tested and proven treatments Treatment of Stuttering begins with a discussion of basic concepts that helps you better understand the science underlying the treatment options The book is then organized into sections with an overview chapter beginning each section that offers a critical evaluation of the treatments covered in that section The final chapter shows you how to manage specific clinical scenarios taking advantage of everything you've learned from the text Features to Help You Treat stuttering successfully Summary tables beginning each section offer a quick overview of the core elements of the treatments covered in the section Key terms that you need to understand are in bold in the text and defined in the glossary Case studies with critical thinking questions put you in the place of a speech pathologist evaluating clients deciding treatments and solving problems Chapter review questions enable you to access your grasp of key

concepts as you advance in the text Suggested readings lead to additional information about specific Stuttering treatments Written by leading speech pathologists Barry Guitar and Rebecca McCauley Treatment of Stuttering is a reference you can count on to guide you to the best treatments for your clients Book jacket *A Handbook on Stuttering, Seventh Edition* Oliver Bloodstein, Nan Bernstein Ratner, Shelley B. Brundage, 2021-06-25 The revised edition of A Handbook on Stuttering continues its remarkable role as the authoritative first line resource for researchers and clinicians who work in the field of fluency and stuttering Now in its seventh edition this unique book goes beyond merely updating the text to include coverage of roughly 1 000 articles related to stuttering research and practice that have been published since 2008 This extended coverage integrates the more traditional body of research with evolving views of stuttering as a multi factorial dynamic disorder Comprehensive clear and accurate this text provides evidence based practical information critical to understanding stuttering By thoroughly examining the intricacies of the disorder A Handbook on Stuttering Seventh Edition lays the foundation needed before considering assessment and treatment New to the Seventh Edition A completely reorganized table of contents including two new chapters The deletion of approximately 1 000 non peer reviewed references from the previous edition to assure discussion of the highest quality evidence on stuttering New content on the development of stuttering across the lifespan and assessment Given the Handbook s historic role as a primary reference for allied professionals a new chapter that addresses myths and misconceptions about stuttering Expanded coverage on the role of temperament in childhood stuttering Expanded coverage of brain based research genetics and treatment findings A thoroughly updated chapter on conditions under which stuttering fluctuates Brief tutorial overviews of critical concepts in genetics neuroimaging language analysis and other relevant constructs to better enable reader appreciation of research findings A greater selection of conceptual illustrations of basic concepts and findings than in prior editions Integrated cross referencing to content across chapters Music, Brain, and Rehabilitation: Emerging Therapeutic Applications and Potential Neural Mechanisms Teppo Särkämö, Eckart Altenmüller, Antoni Rodríguez-Fornells, Isabelle Peretz, 2016-08-05 Music is an important source of enjoyment learning and well being in life as well as a rich powerful and versatile stimulus for the brain With the advance of modern neuroimaging techniques during the past decades we are now beginning to understand better what goes on in the healthy brain when we hear play think and feel music and how the structure and function of the brain can change as a result of musical training and expertise For more than a century music has also been studied in the field of neurology where the focus has mostly been on musical deficits and symptoms caused by neurological illness e g amusia musicogenic epilepsy or on occupational diseases of professional musicians e g focal dystonia hearing loss Recently however there has been increasing interest and progress also in adopting music as a therapeutic tool in neurological rehabilitation and many novel music based rehabilitation methods have been developed to facilitate motor cognitive emotional and social functioning of infants children and adults suffering from a debilitating neurological illness or disorder Traditionally the fields of music

neuroscience and music therapy have progressed rather independently but they are now beginning to integrate and merge in clinical neurology providing novel and important information about how music is processed in the damaged or abnormal brain how structural and functional recovery of the brain can be enhanced by music based rehabilitation methods and what neural mechanisms underlie the therapeutic effects of music Ideally this information can be used to better understand how and why music works in rehabilitation and to develop more effective music based applications that can be targeted and tailored towards individual rehabilitation needs The aim of this Research Topic is to bring together research across multiple disciplines with a special focus on music brain and neurological rehabilitation We encourage researchers working in the field to submit a paper presenting either original empirical research novel theoretical or conceptual perspectives a review or methodological advances related to following two core topics 1 how are musical skills and attributes e g perceiving music experiencing music emotionally playing or singing affected by a developmental or acquired neurological illness or disorder for example stroke aphasia brain injury Alzheimer s disease Parkinson s disease autism ADHD dyslexia focal dystonia or tinnitus and 2 what is the applicability effectiveness and mechanisms of music based rehabilitation methods for persons with a neurological illness or disorder Research methodology can include behavioural physiological and or neuroimaging techniques and studies can be either clinical group studies or case studies studies of healthy subjects are applicable only if their findings have clear clinical implications
