A Theory of Environmental Leadership Mark Manolopoulos, 2021-03-15 In A Theory of Environmental Leadership Mark Manolopoulos draws on his original model of leading outlined in his cutting edge book Following Reason to derive and develop the first properly systematic model of eco leadership Suppose humanity's relation with the Earth may be described in terms of leadership stages or modalities once

upon a time the Earth led or ruled humanity and now we humans rule or lead the Earth When the Earth led the Earth flourished now that humankind leads the Earth flounders ecological crises multiply and intensify However there might be a third stage or modality of leadership humanity leading for the Earth leading in a way that allows the world including humans to re flourish What would be the nature of this truly environmental form of leadership A Theory of Environmental Leadership identifies and critically analyzes the two basic and incompatible positions associated with the way we construe and interact with the non human anthropocentrism human supremacism and ecocentrism ecological egalitarianism By rigorously analyzing and leveraging this polarity this book outlines an innovative theory of eco leadership together with some of its confronting but necessary measures Expansive and incredibly timely A Theory of Environmental Leadership is ideal for a range of audiences from scholars and students of environmental leadership studies to activists and policymakers The book s remarkable clarity and engaging character also makes it suitable for the general public Innovation in Environmental Leadership Benjamin W. Redekop, Deborah Rigling Gallagher, Rian Satterwhite, 2018-01-19 Innovation in Environmental Leadership offers innovative approaches to leadership from a post industrial and ecological vantage point Chapters in this collection are written by leading scholars and practitioners of environmental leadership from around the globe and are informed by a variety of critical perspectives including post heroic approaches systems thinking and the emerging insights of Critical Leadership Studies CLS By taking the natural environment seriously as a foundational context for leadership Innovation in Environmental Leadership offers fresh insights and compelling visions of leadership pertinent to 21st century environmental and social challenges Concepts and understandings of leadership emerged as part of an extractive industrial system this work asks its readers to re think what leadership looks like in an ecologically sustainable biological system This book provides fresh insights and critical perspectives on the vibrant and growing field of environmental leadership It shows the latest state of knowledge on the topic and will be of interest both to students at an advanced level academics and reflective practitioners It addresses the topics with regard to leadership theory and environmental leadership and will be of interest to researchers academics and students in the fields of sustainability environmental ethics natural resource management environmental studies business management public policy and environmental management
