Perspective Eric Brymer,Francesco Feletti,Erik Monasterio,Robert D. Schweitzer,2020-03-30 Extreme sports those activities that lie on the outermost edges of independent adventurous leisure activities where a mismanaged mistake or accident would most likely result in death have developed into a significant worldwide phenomenon Brymer Patterson 2002 and Generation Z turn to extreme sports because they are popular and linked to escapism Giannoulakis Pursglove 2017 Arguably extreme sports now support a multi billion dollar industry and the momentum seems to be intensifying Traditional explanations for why extreme sports have become so popular are varied For some the popularity is explained as the desire to rebel against a society that is becoming too risk averse for others it is about the spectacle and the merchandise that is associated with organised activities and athletes For others it is just that there are a lot of people attracted by risk and danger or just want to show off For others still it is about the desire to belong to sub cultures and the glamour that goes with extreme sports Some seek mastery in their chosen activity and in situations of significant challenges This confusion is unfortunate as despite their popularity there is still a negative perception about extreme sports participation There is a pressing need for clarity The dominant research perspective has focused on positivist theory driven perspectives that attempt to match extreme sports against predetermined characteristics For the most part empirical research has conformed to predetermined societal perspectives Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation This special edition brings together cutting edge research and thought examining psychology and extreme sports with particular attention paid to the examination of motivations for initial participation continued participation effective performance and outcomes from participation References Brymer E Schweitzer R 2017a Phenomenology and the extreme sports experience NY Routledge Brymer E Schweitzer R D 2017b Evoking the Ineffable The phenomenology of extreme sports Psychology of Consciousness Theory Research and Practice 4 1 63 74 Giannoulakis C Pursglove L K 2017 Evolution of the Action Sport Setting In S E Klein Ed Defining Sport Conceptions and Borderlines Lexington Books London 128 146 Patterson I 2002 Baby Boomers and Adventure Tourism The Importance of Marketing the Leisure Experience World Leisure Journal 44 2 4 10 DOI 10 1080 04419057 2002 9674265

International Perspectives on Consumers' Access to Justice Charles E. F. Rickett,Thomas G. W. Telfer,2003-03-20 Consumer

protection law in the age of globalisation poses new challenges for policy makers This book highlights the difficulties of framing regulatory responses to the problem of consumers access to justice in the new international economy The growth of international consumer transactions in the wake of technological change and the globalisation of markets suggests that

governments can no longer develop consumer protection law in isolation from the international legal arena. Leading scholars consider the broader theme of access to justice from socio-legal law and economics perspectives. Topics include standard form contracts, the legal challenges posed by mass infections such as mad cow disease and CJD, ombudsman schemes, class actions, alternative dispute resolution, consumer bankruptcy, conflict of laws and cross-border transactions. This book demonstrates that advancing and achieving access to justice for consumers proves to be a challenging and sometimes elusive task.

Understanding Consumers of Food Products Lynn Frewer, Hans Van Trijp, 2006-12-22. In order for food businesses, scientists and policy makers to develop successful products, services and policies, it is essential that they understand food consumers and how they decide which products to buy. Food consumer behaviour is the result of various factors, including the motivations of different consumers, the attributes of specific foods and the environment in which food choices occur. Recognising diversity between individual consumers, different stages of life and different cultural contexts is increasingly important as markets become increasingly diverse and international. The book begins with a comprehensive introduction and analysis of the key drivers of consumer food choices, such as the environment and sensory product features. Part two examines the role of consumers' attitudes towards quality and marketing and their views on food preparation and technology. Part three covers cultural and individual differences in food choice, as well as addressing potentially influential factors such as age and gender. Important topics such as public health and methods to change consumers' preferences for unhealthy foods are discussed in part four. The final section concludes with advice on developing coherent safety policies and the consumers' responsibility for food production and consumption. *Understanding consumers of food products* is a standard reference for all those in the food industry concerned with product development and regulation. Develop an understanding of buyer behaviour to assist developing successful products. Recognise the diversity between consumers and learn how to cater for their needs. Covers cultural and individual differences in food choice.
