Une Brève Histoire L'avenir Collectif:

Une brève histoire de l'avenir Jacques Attali, 2009-10-28 Jacques Attali raconte ici l'incroyable histoire des cinquante prochaines années telle qu'on peut l'imaginer partir de tout ce que l'on sait de l'histoire et de la science. Il dévoile la façon dont évolueront les rapports entre les nations et comment les bouleversements démographiques, les mouvements de population, les mutations du travail, les nouvelles formes du marché, le terrorisme, la violence, les changements climatiques, l'emprise croissante du religieux viendront chahuter notre quotidien. Il revient aussi comment des progrès techniques stupéfiants bouleverseront le travail, le loisir, l'éducation, la santé, les cultures et les systèmes politiques. Comment des murs aujourd'hui considérés comme scandaleux seront un jour admises. Il montre enfin qu'il serait possible d'aller vers l'abondance, d'éliminer la pauvreté, de faire profiter chacun quittement des bienfaits de la technologie et de l'imagination marchande, de préserver la liberté de ses propres excès comme de ses ennemis, de laisser aux générations venir un environnement mieux protégé de faire naître, partir de toutes les sagesse du monde, de nouvelles façons de vivre et de créer ensemble. Quelle France en 2030 ?

Frédéric Denhez, 2009-02-11 Quel sera l'impact du dérèglement climatique sur nos paysages, nos côtes, notre agriculture, notre biodiversité, nos villes, nos modes de vie ? Le changement climatique est en marche et même aux dires de nombreux experts, il s'accélère et risque de nous prendre de vitesse. Le phénomène n'est pas planétaire. Il ne s'arrêtera pas aux frontières de notre douce France. Notre climat tempère les microclimats de nos petits pays, ne seront-ils bientôt que des souvenirs nostalgiques ? Dans le même temps, notre pays devra affronter un autre défi : comment passer d'une dépendance au pétrole d'autres formes d'énergie ? Ces deux enjeux majeurs auront un impact décisif sur tous les secteurs : Production d'énergie, agriculture, industrie, tourisme, transports, modes de vie. Des changements notables sont appelés se produire en l'espace d'une génération. Quelle est notre part de responsabilité que pouvons-nous faire dès présent ? Quelle France laisserons-nous nos enfants ? Cette enquête, sans prétendre reposer sur l'ensemble des données scientifiques disponibles, envisage les scénarios les plus probables et sans alarmisme, mais aussi sans concession s'adresse chacun de nous. Car l'avenir dépendra en grande partie des choix que nous ferons.

Une brève histoire de l'espoir Mathieu Bédisse, 2025-09-17 T00:00:00-04:00 Afin d'apprivoiser l'incertitude de notre temps, Mathieu Bédisse suit le fil de l'histoire de l'humanité, la recherche de ce qui a tenu et de ce que devrait être encore notre rapport à l'espoir. Parce que si l'espoir est aussi vital que l'air que nous respirons, trop espérer nous risquons de tomber dans le désespoir ou pire, dans l'apathie. De la découverte du feu à l'avènement de Trump, en passant par la Grèce antique, les religions monothéistes et les mouvements révolutionnaires, une brève histoire de l'espoir offre un panorama saisissant des réflexions littéraires et philosophiques qui ont marqué l'aventure humaine. En ces temps troubles, ce texte en fragments, aussi accessible qu'il est rudimentaire, rappelle que le pire n'est pas inéluctable et que notre tâche est d'imaginer la suite plutôt que de craindre la fin. **Une brève histoire de la géographie** Jean-Jacques Bavoux, 2023-10-04 la croisée des chemins avec quatre grands champs de la pensée : imaginaire, science, philosophie et religion. L'histoire de la géographie revient sur les fondements sur lesquels vont se

tablir les géographies des temps modernes et contemporains La géographie est elle seulement un inventaire ou d j une science Quelles représentations et quelles explications du monde propose t elle Quelles sont ses relations avec l art et la littérature le surnaturel et les mythes Comment ajuste t elle son discours aux omniprésents conditionnements des superstitions et aux puissantes exigences des religions Sa vision de l espace terrestre est elle influenc e par la succession et les contradictions des cadrages philosophiques Au fil d un grand parcours diachronique cet ouvrage a pour ambition de retracer deux mill naires de géographie Il s efforce d abord de d finir et d limiter la place de la géographie au sein du champ des connaissances et des milieux savants Il analyse ensuite ses principaux objets d tude savoir le d voilement de ce qu est la planète dans sa globalit et la description exploratoire des composants qui sont sa surface Enfin ce livre tudie les fondements conceptuels et les normes méthodologique

Afroeurpean Cartographies Dominic Thomas, 2014-10-21 Literary production is increasingly shaped by globalization and the complex nature of cultural political and social interaction As such longstanding colonial and postcolonial relations between Africa and Europe have yielded a range of challenging questions and new generations of writers with roots in Africa have invariably found themselves navigating new geographic terrains and negotiating racialized identities while simultaneously exploring the potential of literature in addressing the
