and economists In fact there is a partial disconnection between patent demographics and productivity gains but also the development of actors who do not innovate and who develop business models that their detractors equate with a capture of annuities or a dangerous commodification of patents This book provides a less Manichaeian view of the position of patents in the system of contemporary innovation It first recalls that these criticisms are not new before arguing that if these criticisms have been revived it is because of a partial shift from an integrated innovation system to a much more fragmented and open system This shift accompanied the promotion of a more competitive economy The authors show that this movement is coherent with a more intensive use of patents but also one that is more focused on their signal function than on their function of direct monetary incentive to innovation [University of Chicago Law Review: Volume 80, Number 4 - Fall 2013](#)

rootedness literary texts exposed the circulations of persons ideas and affections at the heart of citizenship This book brings together an unlikely combination of writers Olaudah Equiano Jane Austen Mary Shelley and Herman Melville to show how literature in the Age of Revolution exposed contradictions in notions of liberty and slavery that impacted how citizenship was conceived and practiced **Institutions and Accounting Practices after the Financial Crisis** Victoria
